TBZD Info

TBZ is a retailer of fashion jewelry that needed an ERP system to manage sales orders, purchase orders, inventory, and accounting. The system had to be efficient in order to process a large daily volume of orders and customizable in order to support both current and future business processes.

Solution

JEWEL.NET software addresses end-to-end functions involved in jewelry manufacturing companies. Starting with Order Handling to production, inventory, returns & repairs and integration of all these with accounting.

JEWEL.NET Software improves productivity and profitability of your jewelry business by providing:

- Accurate tracking of all business transactions. Comparing periodical data provides information necessary to control costs, improve customer services and generate higher profit
- Inventory module that is specifically designed to provide you utmost control on your diamonds and color stones inventory
- Provision to let you sale goods on Memo – a transaction very much specific to jewelry industry
- Powerful security features that permits view and access only by authorized personnel

Technology

.Net Framework 3.5, Visual Studio 2010, C# 3.0, Infragistics 9.2 Control Toolkit, Crystal Report 13.0, SQL Server 2008.

Portfolio » Testimonials

dbtStaff™

It has been a pleasure to work with you and your team over the years. As our business needs, processes, tools, and objectives have evolved, you and your team have kept in step with us all along the way.

We have enjoyed outstanding customer service and benefited from the team's dedication and commitment, which is beyond compare. No matter the time of day, nor day of week, you unhesitatingly demonstrate that commitment if and when needed. Leadership and team members alike are extremely reliable and have excellent, proven work ethics.
Whether it is research, analysis, concept validation, project planning, design, development, or testing, we have truly benefited and gained efficiencies as a result of services provided. We look to you for help with urgent needs and can always count on you for quick responses and support. Your experience, knowledge, skill, and mastery of the workings of our product has been, and continues to be, invaluable.

We appreciate that you not only listen and work to fully understand our needs, but based upon your deep knowledge of our product, knowledge in development, technology, quality assurance, and business processes, you are willing to make recommendations to address our needs and offer ideas for improvements.

You and your team have played a fundamental role in our growth and success. We thank you.

We greatly value our relationship and would unhesitatingly recommend you, your team, and your services to anyone.

TRIBHOVANDAS BHIMJI ZAVERI
DELHI PVT. LTD.

Keeping a close check on real time inventories of standard bars, finished goods and cash is the most important part of our Jewelry Retail business and the most toughest. It used to be too much time consuming and still the element of doubt always remained.

After we got ***intotachus*** team to customize and create an ERP for us, it has now become so simple and the real time figures are on my finger tips now.

I am happy we took that decision. Thank you ***intotachus*** *.*

How We Work » Pricing Models

TIME & MATERIAL

Enormous flexibility and control over your budget, enabling to manage and change the development process on the go.

Good for: projects with few or many unknowns and having flexible project scope or for the projects in their maintenance phases.

==========

DEDICATED TEAM

Extension of your own team, it gives maximum control but requires more involvement into project management from the customer's part.

Good for: projects which are constantly innovating and developing and having own project management staff.

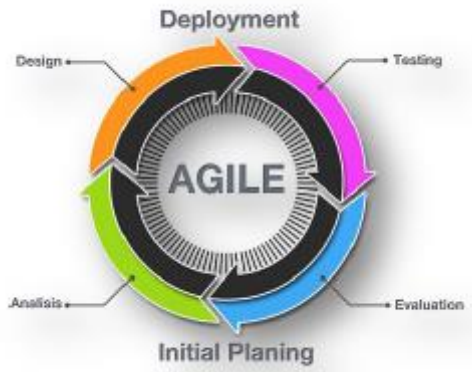
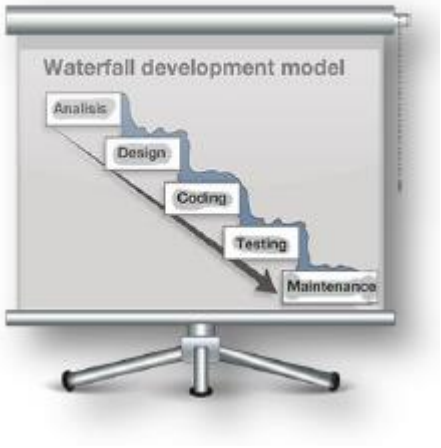
How We Work » Methodologies

AGILE

Based on continuous iterations each having its own Design, Development, and Testing Cycle, our Agile process enables to deliver you solutions faster, with less need for detailed documentation, i.e. for less investment costs and with shorter time-to-market.





We drive you all the way through Conception, Initiation, Analysis, Design, Coding, Testing, Implementation and Maintenance stages that ensure you have the robust software meeting your goals and initial requirements.

Value Proposition

Confidence
We use only cutting-edge technologies to develop best-in-class solutions for our customers. The use, for instance, of the wide-spread and efficient Java, Groove and Grail enables us to create scalable solutions which can be easily adapted to customers' emerging needs.

Responsibility
Driven by the passion our software developers deliver the enormous volume of code, yet producing it of the highest quality and on time.

Reasonable Pricing
We neither overestimate nor underestimate our skills and experience, our customers always get quality-proven software development services valued for the money they invested.

No Bureaucracy
Our compact well-balanced team applies best efforts to eradicate bureaucracy to the ground concentrating all the attention on efficient and productive customer-oriented solutions instead.
