OUTSTAFFING

with

THE APP SOLUTIONS

We turn your ideas into a new driving force of your business
OUTSTAFFING TO MEET YOUR URGENT BUSINESS NEEDS

There is time when you feel it is difficult to manage everything in-house and the reason is lack of resources, time, and spending funds on creating special departments and so on. So, you probably begin thinking of new solutions and in what way you can boost the success of your business.

Outstaffing is much talked about in case customer owns a good technical team but it is not enough to successfully launch the product. He definitely needs some help.

Another important factor is that applying outstaffing service will be a right decision if your company plans to involve investors as they can easily get acquainted not just with you but also with a part of team that creates, develops and launches the future product.
DEDICATED TEAM MODEL IS A GOOD IDEA FOR YOU AS IT WILL HELP TO:

1. Avoid any labor disputes and paper work – we have professional accountants, lawyers and HR managers for this;

2. Provide your developers with white salary and official employment;

3. Provide you developers with good social program and working place at The APP Solutions company.
MODEL TO SET UP A DEDICATED TEAM

- We provide workspace in our company's office in Kyiv, Ukraine.
- Our clients participate in hiring interviews, choose best candidates and have full control over the team's daily work.
- We help build and maintain the clients' team in terms of ongoing payroll, accounting, stationery, hardware, internet, rent, utility, coffee, tea, and other administrative duties.
- The team works at fixed monthly cost, no hidden expenses.
- The team activities are managed by a Project Manager.
Our approach to structuring dedicated teams

1. Is flexible enough to suit any client’s needs

2. Allows to quickly and effectively extend your team

3. Helps our clients find the best cost efficient solution for their development needs
IN CASE YOU HAVE A PROJECT MANAGER WITHIN YOUR TEAM

- You will get a team extension with MindPark
- You can personally interview each candidate and choose the most suitable ones
- The specialists will be reporting directly to your team lead
- Your project manager will be responsible for team’s activity planning
WHY YOU MIGHT NEED PROJECT MANAGER IN YOUR DEDICATED TEAM

- For establishing the scope of the project, ensuring the business case for the project remains valid;
- For planning the number of iterations;
- For maintaining the overall project plan including software release dates;
- For managing risks and issues which are escalated by the dedicated team;
- For communicating with the executives including reporting progress.
WHY YOU MIGHT NEED A FULLY STACKED TEAM

• All your product development cycle is done in one building
• The communication among the team is greatly improved
• Your communication with the whole team improves
• You are saving on administrative costs

Does The App Solutions provide NDA and long term contract to ensure stable and safe project flow?

We work under strict NDA terms. We also have specific NDA terms with our developers. This will make sure that our relationship will never be revealed. Signing the contract with The App Solutions is the next step of the proceedings. This is your personal guidance to the work and your written companion if any dispute is raised.

Our contract ensures that service delivery and support run smoothly, with no surprises, and benefits are realized as set out in the business case, through development of a good working relationship and clear understanding on both sides of what is required. Our lawyers will be glad to answer all your questions.

Whom you can hire?

We only offer dedicated team model for Middle and Senior Developers having more than 3 years of relevant experience.
Will our development teams work during our client’s local working hours?

We generally try to cover at least 3 to 4 hours common working time window (As per client’s working hours) between client and the development team to setup easy communication process.

Which issue tracking tools will developers use?

We use Jira. However our team will be happy to adapt to any other tools you use for project development and management.

Who will be selecting developers for your team?

Generally we are the best judge of which of our developers will be suitable for your projects once we understand your needs. We would first suggest you best of the developers that can fulfill your needs. However, if you are not satisfied with that, we can offer you alternatives and you can make a selection.

Will our client get report on hours spent on the project?

Yes, we believe in 100% transparency. You would get weekly and monthly reports of your team’s work and time spent on each task.
