Enterprise Mobility Solution

Ranosys, a leading mobile app development company based in Singapore, prides itself with a dedicated team of mobile experts and 8+ years of experience in mobility. We have deployed more than 300 apps on Play Store and iTunes. Ranosys has a dedicated team of developers who are well-versed with cross-platform mobile app development frameworks such as Cordova, Ionic, Titanium, and Xamarin along with dedicated Android and iOS teams. Ranosys provides complete end-to-end mobility solutions to the organizations of all sizes. Our mobile app developers pay heed to client's requirements and offer them the best possible and effective solutions.

Ranosys has developed engaging mobile apps for various industries - from eCommerce to healthcare. Our mobility offerings combine device and technology expertise to enhance the experience of the end-users.

Android App Development
The adroit developers of Ranosys focus on excellence and perfection to ensure that Android apps comply with the strategic business objectives of the clients.

iOS App Development
Ranosys provides high-performing iOS apps for different domains and ensures an unparalleled experience for the end-users and competitive advantage for the clients.

Titanium
Ranosys helps clients create an engaging mobile experience through phenomenal apps which are developed using advanced technologies and feature-rich frameworks.

Ionic
Ionic, an HTML5 mobile app development framework, has eminently altered the way mobile apps are built. Ranosys creates apps with compelling UI/UX using Ionic frameworks.

Cordova
Cordova is the talk of the town in the mobile app industry. The users can get Android, iPhone, Windows and Blackberry apps, all on one platform. Ranosys has skilled Cordova/Phonegap experts to cater the needs of not only the corporate giants but also the SMEs.

Xamarin
The deft team of professionals at Ranosys makes use of the latest tools and techniques and develop simple yet swift enterprise mobile apps on Xamarin. Ranosys ensures that the client's mobile app is incorporated with rich features and high functionality.

RANOSYS
TECHNOLOGIES

Wireframing
Once the client shares the entire requirements, Ranosys makes a blueprint and provides wireframes so that the client would be able to look and feel the mobile project in real scenarios.

Creative Design
Once the client approves the wireframes and mock-ups, Ranosys converts the wireframes to innovative designs and UI/UX.

Project Architecture
Ranosys puts a lot of efforts to set up a project in the right manner, to accelerate the deployment process and make it smoother.

Agile Approach
Ranosys follows an agile approach and divides the whole project into milestones and sprints to ascertain continuous deliveries in a timely manner.

Quality Analysis
Instead of testing the whole project after completion, Ranosys performs quality analysis after each milestone to deliver an error-free app.

App Maintenance
Ranosys also provides the service of maintaining the app to ensure that there is no crash down at any point in time.

Submission on the App Stores
After the project gets approved by the client, Ranosys deploys the app on the Play Store and iTunes and ensures that it gets maximum exposure and downloads.

Mobile App SEO
Ranosys has skilled developers who have knack in app optimization techniques, to help clients boost their apps download.

Enterprise Mobility

Ranosys offers a wide range of enterprise mobility solutions to its clients - from pre-built frameworks to enterprise solutions, UI design and testing to mobility advisory services.
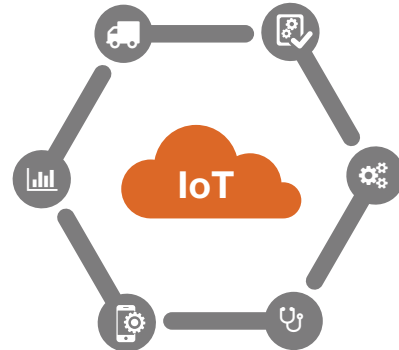

Custom Mobile Application Development

With a focus on quality and performance, Ranosys leverages the best and latest mobile app development techniques to keep the clients one step ahead of the competitors.

Internet of Things

Ranosys has a team of experts who are well-acquainted with the development process of the IoT apps and help clients interact with the customers more effectively and create opportunities for new sources of revenue.

Mobile App Prototyping / UI

Ranosys offers excellent mobile app prototyping services using various platforms and tools that enable clients to get a real feel of the app before final development and prevent extra cost for fixing pitfalls.

RANOSYS
TECHNOLOGIES

Mobile Apps Testing

Ranosys does thorough cross-platform mobile app testing to make sure that the app does not require any fixes, is compatible with all the devices and meets the requisite standards.

Mobile App Support and Maintenance

Ranosys does not leave the clients in limbo after delivery of the project. We offer ongoing technical assistance and app maintenance services to keep them at the forefront of competitive edge.
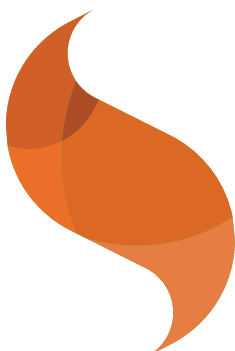

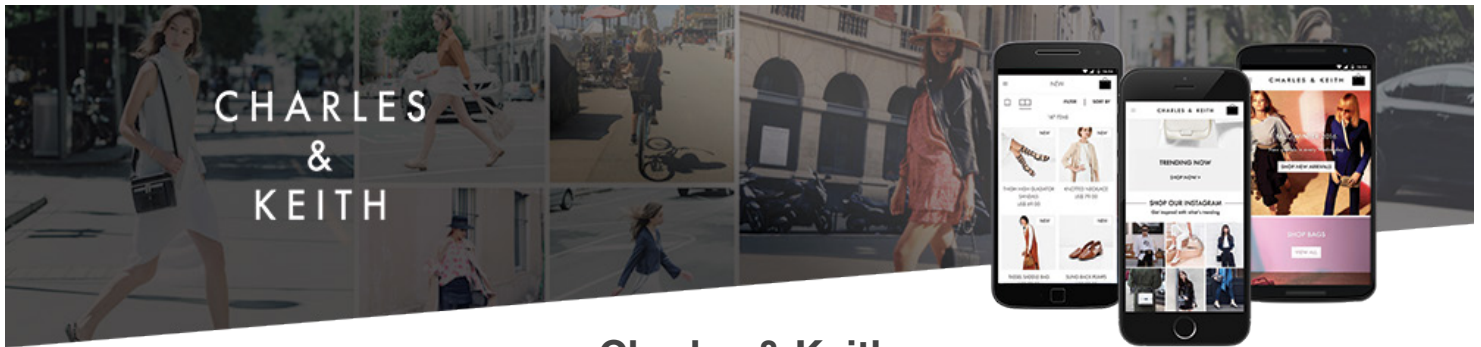

24/7

App Store Optimization

Ranosys helps clients get maximum returns on the investment by driving more downloads for an app through app store optimization (ASO) services. ASO increases the ranking of the app in the search results of the app store.

Sencha Touch Application Development

Ranosys builds native mobile apps for Android, iPad, tablets, and iPhone using Sencha Touch, a high-performance HTML5 mobile app framework. Sencha Touch helps create world-class apps in no time, with a remarkable user experience.

Charles & Keith

Ranosys designed and developed the native Android and iOS apps for Charles & Keith, with easy navigation and notification features, to enhance the online shopping experience of the customers. The users can also easily locate and get directions to the nearest Charles & Keith store with the help of the app.
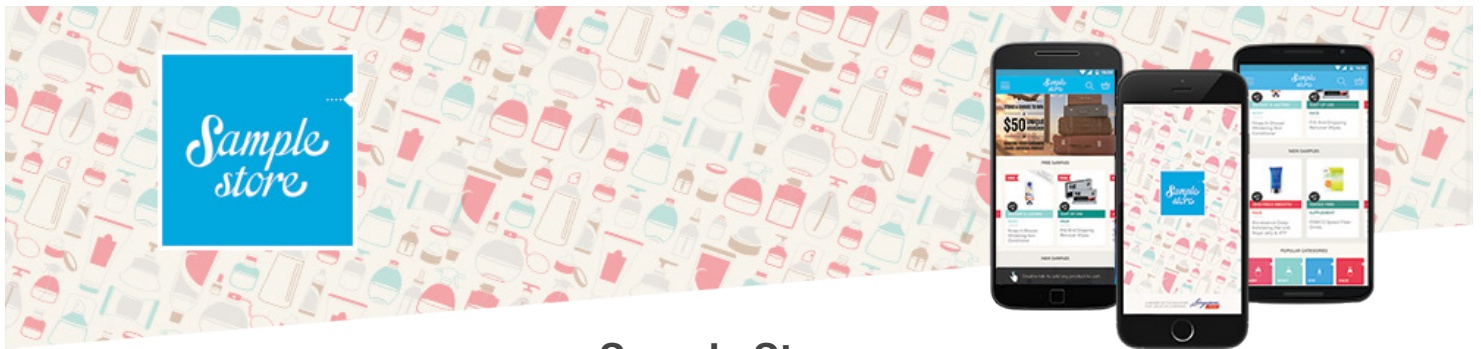

My Health Wallet

Ranosys designed and developed My Health Wallet mobile app for the corporate members of Parkway Shenton, to help them check their benefit entitlement, entitlement utilization and available balance, as well as submit claims via their mobile device. The app has also enabled the users to get quick connectivity with Clinic Locator and eCard, making claim processes and clinic visits easier and more pleasant.
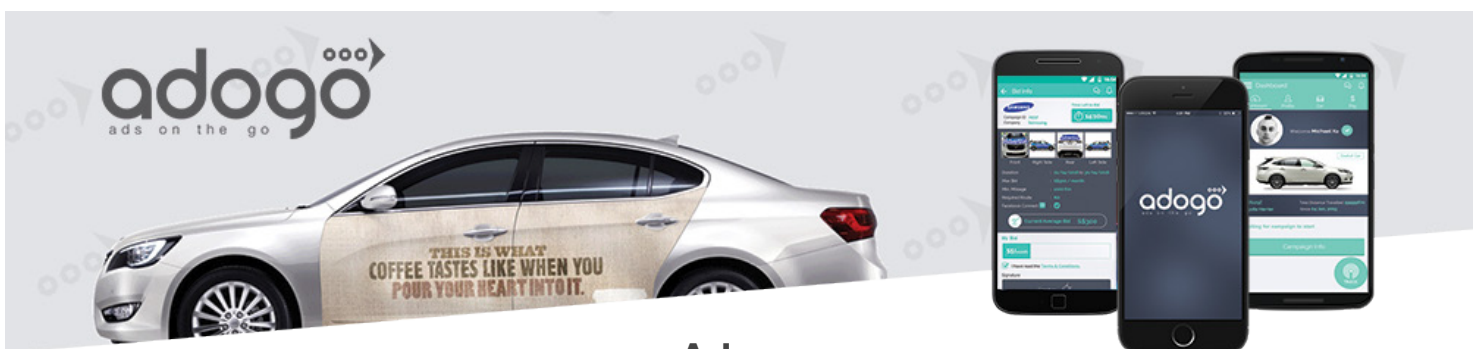

SBS Transit Group

Ranosys developed a hybrid mobile application for the SBS Transit Group, using Ionic framework. The app has made it easy for the bus captains of SBS buses to view their profile, daily tasks, and salary slips. Besides this, the captains can apply for leave, view their leave status and get notifications from SBS.
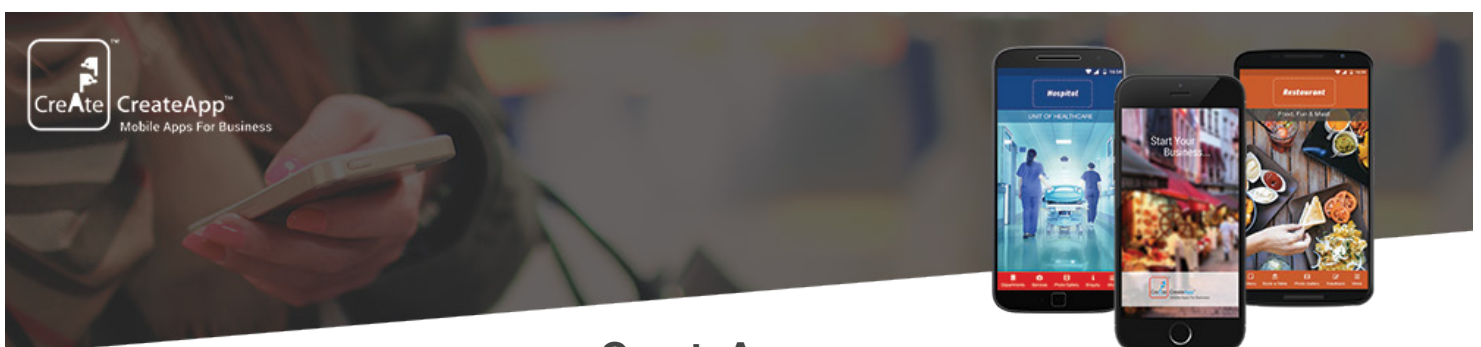

Sample Store

Ranosys developed a native iOS and Android eCommerce app for the Sample Store which allows the customers to experience the products conveniently before they decide to buy them. The app has made shopping a delightful experience for the users and helped Sample Store connect with new customers.

Adogo

Ranosys developed Android and iOS apps for Adogo. The app allows drivers to register with Adogo, customize their profile and get notification of every campaign. This app helps drivers enhance their passive incomes without altering their daily routine. The app has also assisted Adogo in taking advertising on cars to a whole new level.

CreateApp

Ranosys created Create App, a very effective native app creation tool, in 12 languages. It enables SMEs to develop their own mobile app without coding knowledge. More than 500 SMEs are benefited by this tool. The app can be created in 5 simple steps and over 40 features can be implemented.

Engagement Models

We have various models to cater the requirements of our clients.

Fixed-Cost Milestone Billing Model

This is the most popular model where requirements are finalized before starting the project. With milestone-based payment terms, this model provides a suitable monitoring mechanism for clients to track regular progress and justify the payments.

Time & Material Billing Model

In this engagement model, the client and Ranosys agree to an initial project comprising of Project Manager, Backend Developer, Mobile Developer, UI/UX Expert, QA Engineers, etc., with a pre-decided weekly/monthly billing. The teams work together and follow an Agile methodology to drive the development process.

Hire a Mobile App Developer Model

This model works well for the clients who have an in-house technical team, but need a mobile expert. Ranosys assigns a Mobile App Expert as per the specifications and requirements of the clients to help them manage their priorities and deliverables for a fixed monthly price.
