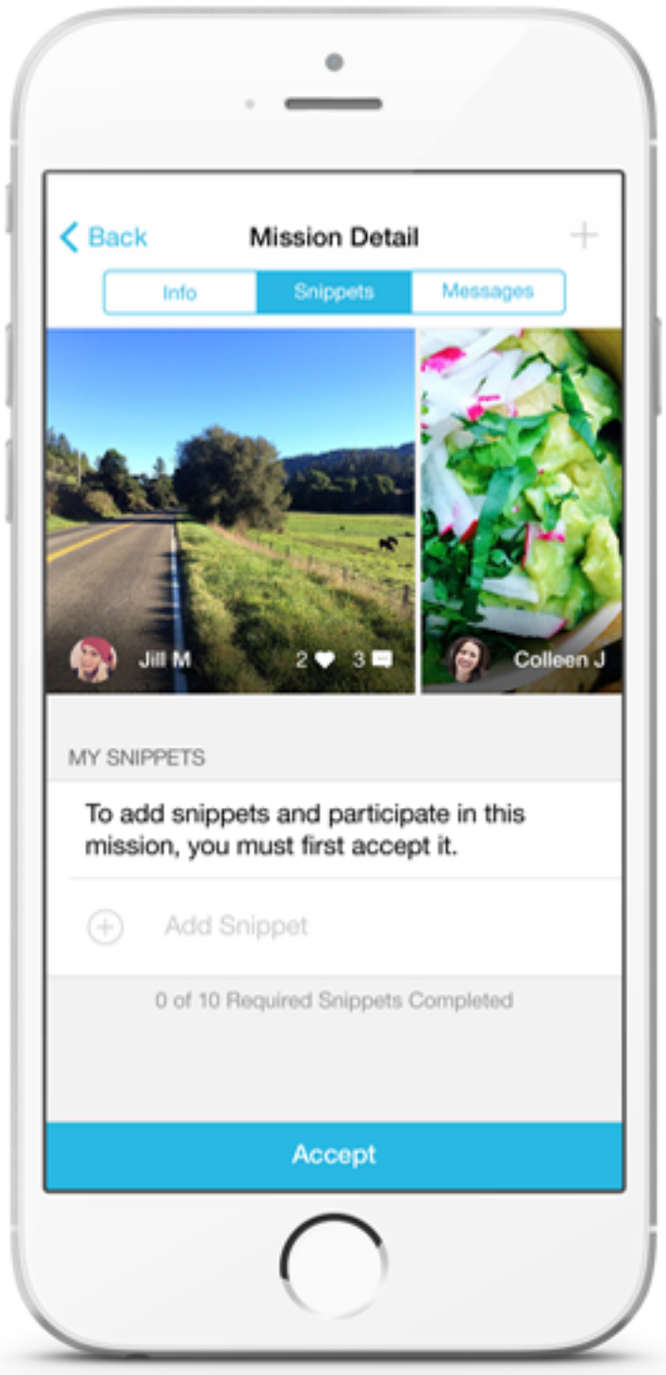
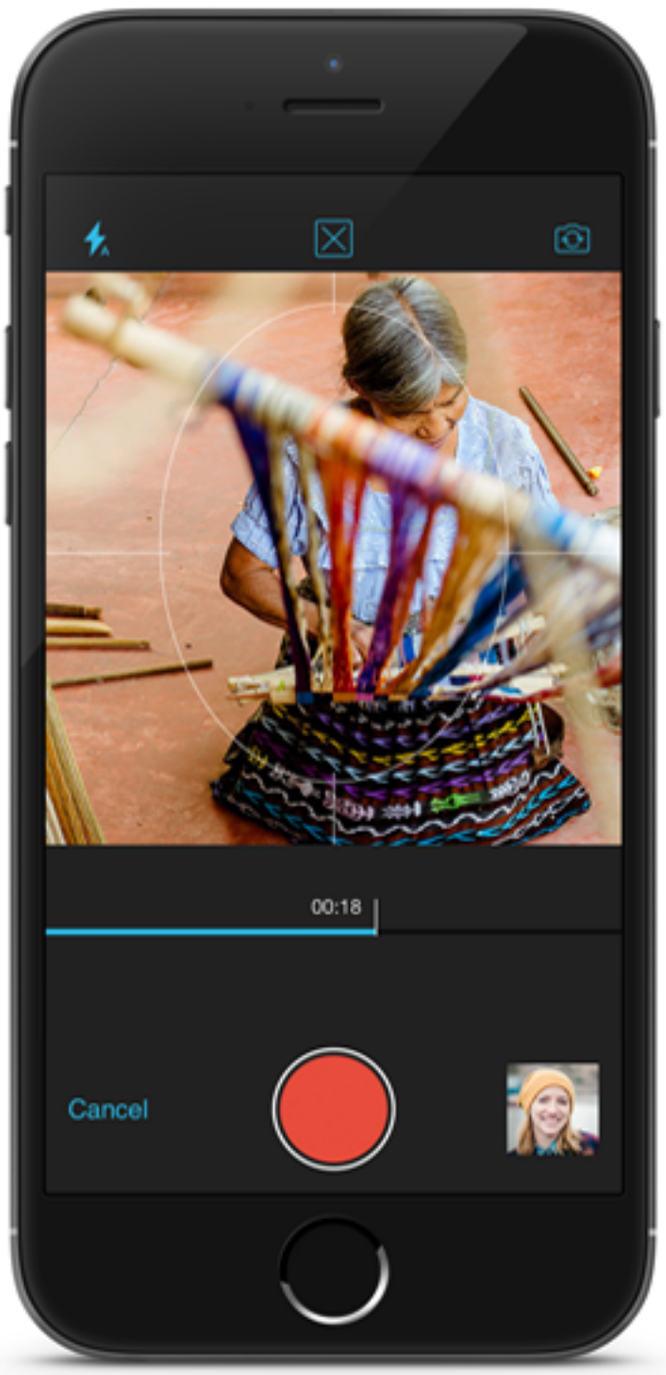
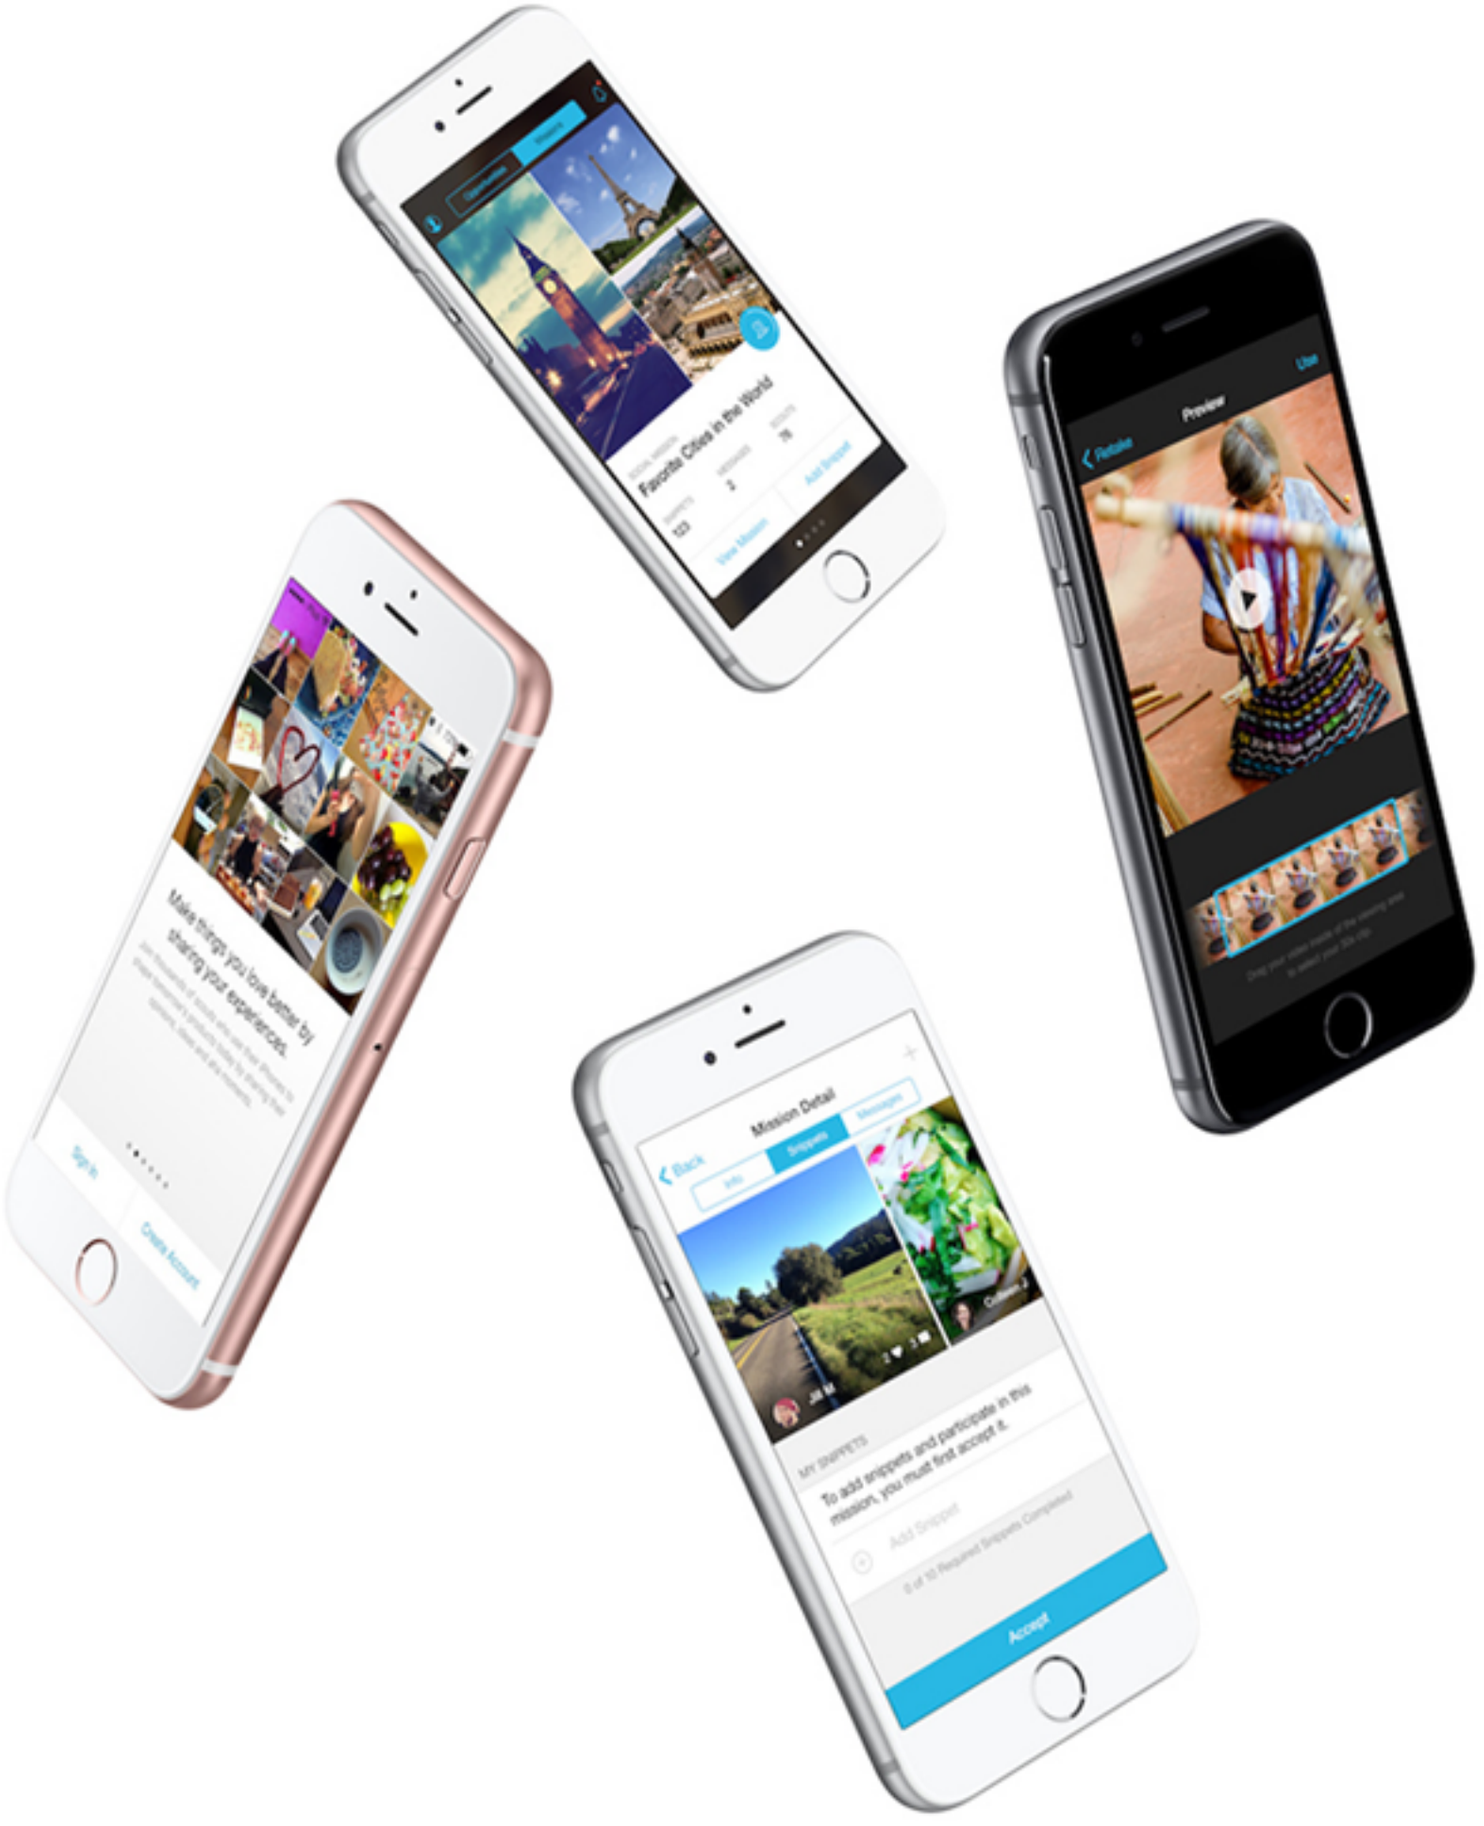
SIEMENS

Dscout

Moments-based research. It's a web and mobile platform that enables companies to reveal how users experience their products, services, and brands. Dscout captures thoughts, reactions and behaviors as they happen.





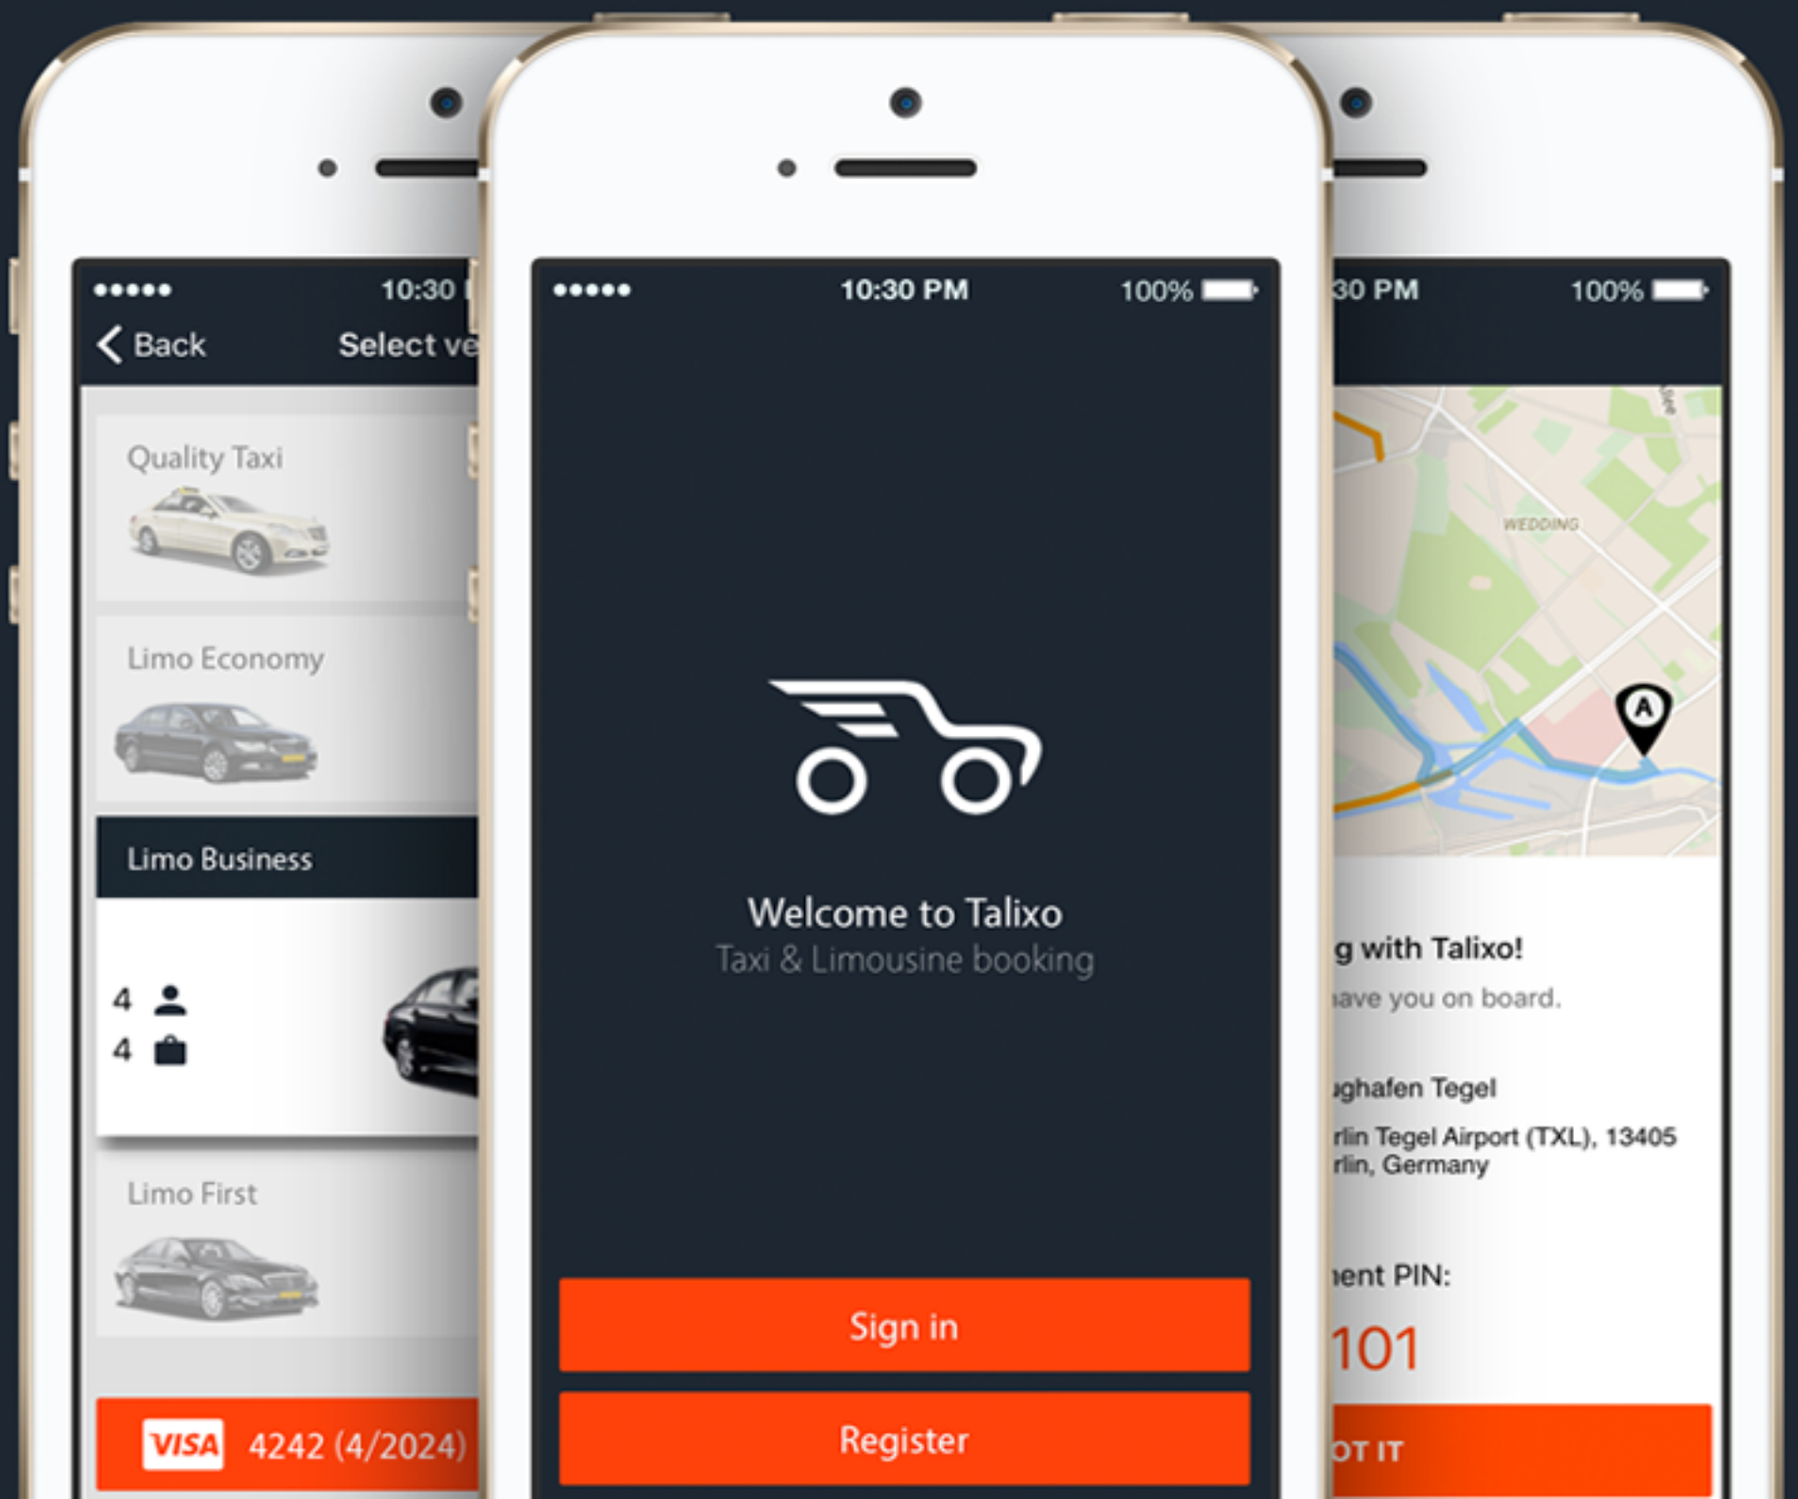


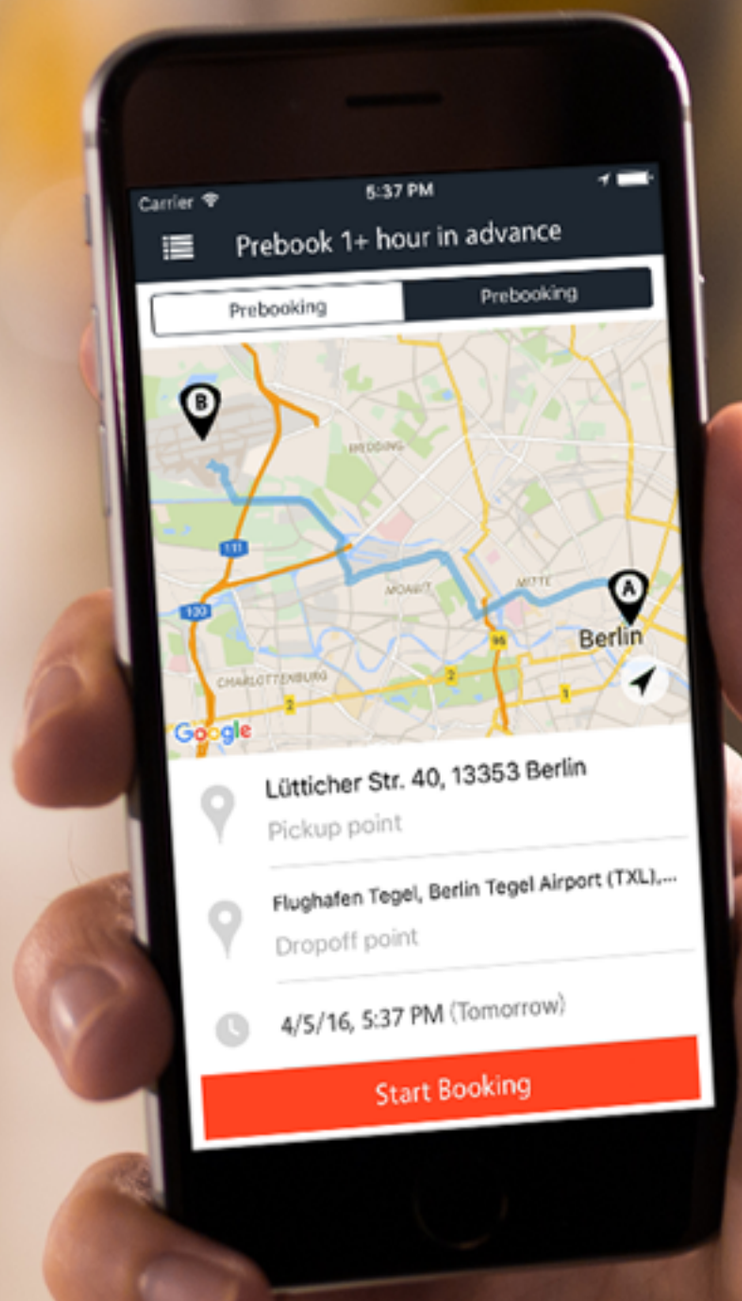
Dscout core features:

- Custom camera module with easy to use video editing tools.
- Unobtrusive background data synchronization.
- Smooth animations and impressive transitions.
- Enhanced with iOS powerful technologies: Spotlight, deeplinking, Keychain, Core Data.

Talixo

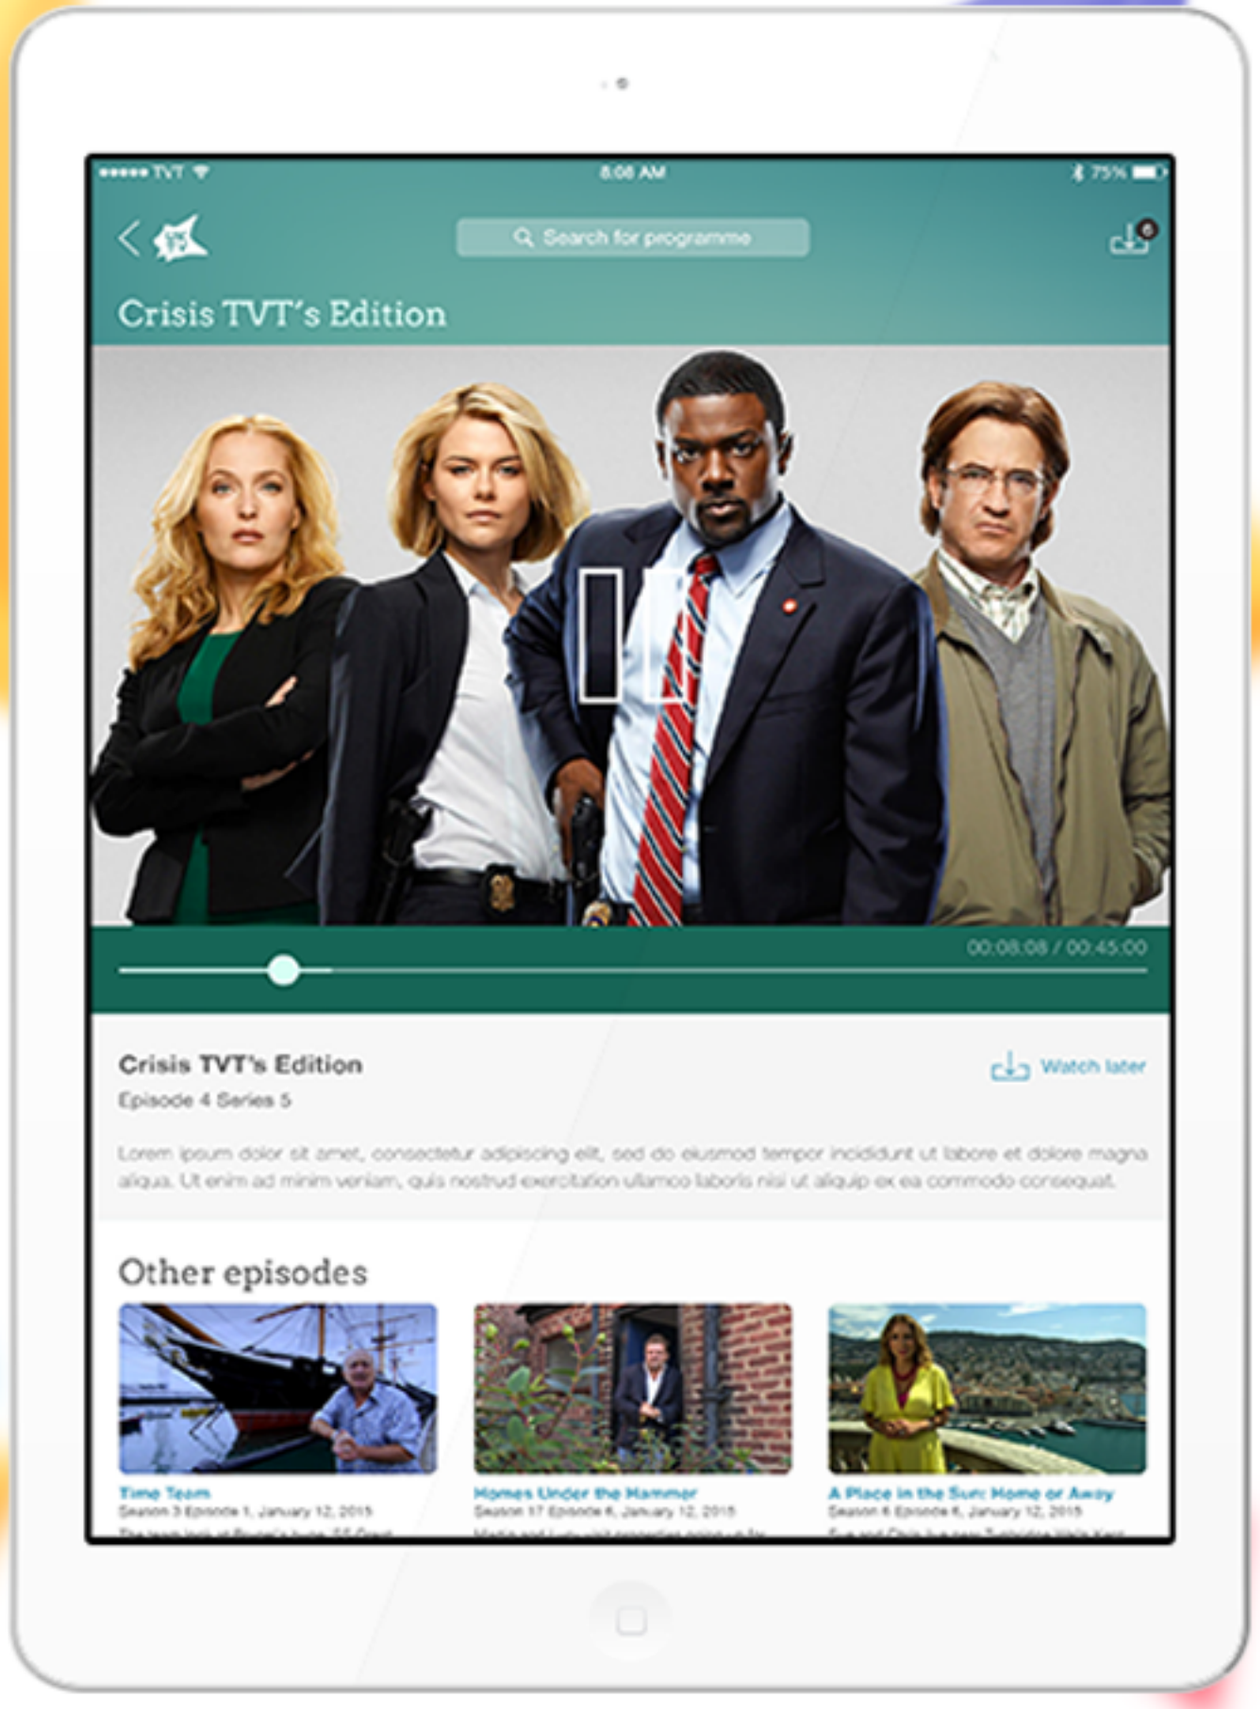
It’s a booking platform for limousines and taxis, which optimizes the booking process for both, customers and drivers.





Prismake has assisted this fast growing startup in development of **Customer and Driver** core applications and variety of white label apps bradned by taxi companies throughout the World.

Talixo helps people commute with pleasure in **426 cities worldwide**.



Content View

TVT is a leading independent digital media lab providing and delivering content and systems for the world's principal broadcasters. With our help, they are entering now the world of mobile with a Netflix-like application for enterprise users.

Socialmist

It's a Swedish company with a mission of adding an extra dimension of music to our online life. The applicaion allows users to enrich their videos with songs from SoundCloud music library. It also incorporate video and image editing and filtering.

Prismake has built Socialmist camera which embraces some hi-tech features:

1. Real time video and image filtering with GPUImage library.
2. Low-level camera integration to minimise shutter lag.
3. Rich media playback and editing features.
4. SoundCloud audio integration.

Usher

A complete virtual ticket booth solution build for iPad and intended to be used in places like hotels and visitor centers.

Usher enables users to
browse and book attractions,
events, pay for the tickets
and print them wirelessly.
