• Content Management System (CMS)

Services

• Google Analytics
• FireBase chat

Technologies

• Java
• Objective-C
• FireBase
• Android SDK
• Angular JS
• NodeJS
• ExpressJS
• MongoDB
• Twilio
• Amazon Web Services

nanoRaider

NanoRaider app has been developed to connect with nanoRaider identiFINDER R300 (a portable dosimeter that measures in real time the gamma and neutron dose rate) and smart watch. We have developed features like warnings and smart alerts, smart dose rates logging system with GPS tracking.

Features

• Connects to the portable dosimeter
• Supports Android Wear
• Displays alert when gamma dose becomes dangerous
• Smart alarms with dose treshold customization
• Smart logging system with GPS tracking
