SOFTWARE DEVELOPMENT & IT CONSULTING

WHO WE ARE

Quantox Technology is the renowned outsourcing company from Serbia, focused on delivering Value to Clients, providing them the best professional treatment and the highest level of quality in services. We are fully committed to Clients satisfaction, so provide the best solutions in efficient, effective, and cost-effective manner. We don't sell our services, we satisfy Clients needs and ensure Client Happiness. We are proud that our clients are among top in the World in their industries. We work in 10 different time zone with clients coming from more than 13 countries such as USA, Canada, UK, Italy, Germany, Israel, Romania, Netherlands, Check Republic, France, Dubai...

Our team has grown to include more than 160 highly qualified experts. We have development offices in 3 different cities in Serbia: Belgrade, Kragujevac and Cacak and also sales office in Los Angeles.

We are finalizing ISO 9001 standards certification process so in next few months we will be certified for quality.

WHAT SERVICES WE PROVIDE

We are committed to fulfilling Clients needs and achieving the highest level of their satisfaction, so provide the services in which we have awesome experience and excellent results confirmed through many significant projects for well-known clients.

WE ARE VERY PROUD OF PROVIDING SERVICES LIKE:

IT Consulting

Project Management

Front End / JavaScript Development

Back End development (PHP, PYTHON, RUBY, JAVA)

Mobile development (iOS. Android)

Smart TV Apps development

Web Design

QA Engineering

DevOps and Sys Admin services (AWS, DigitalOcean, Private Servers...)

Data Analyst

Virtual Assistants (content writers, bloggers, uploaders, video editing, images processing...)

OUR APPROACH

Hourly based.

For quick and small fixes or smaller projects. This model is usually applied when clients need some small project done which takes less than 8 weeks or in cases when they need some quick fix on existing applications or platforms.

Per Project.

In cases when clients want us to completely develop their project from planning and scoping to IT consulting regarding technology stack to be used or team structure, timeline, and costs.

Dedicated service.

In case client needs constant support, maintenance or upgrades or is building really big platform that will take 6+ months we advise to go with this option and take full time dedicated developer or team of developers or project manager if needed too.

FACTS

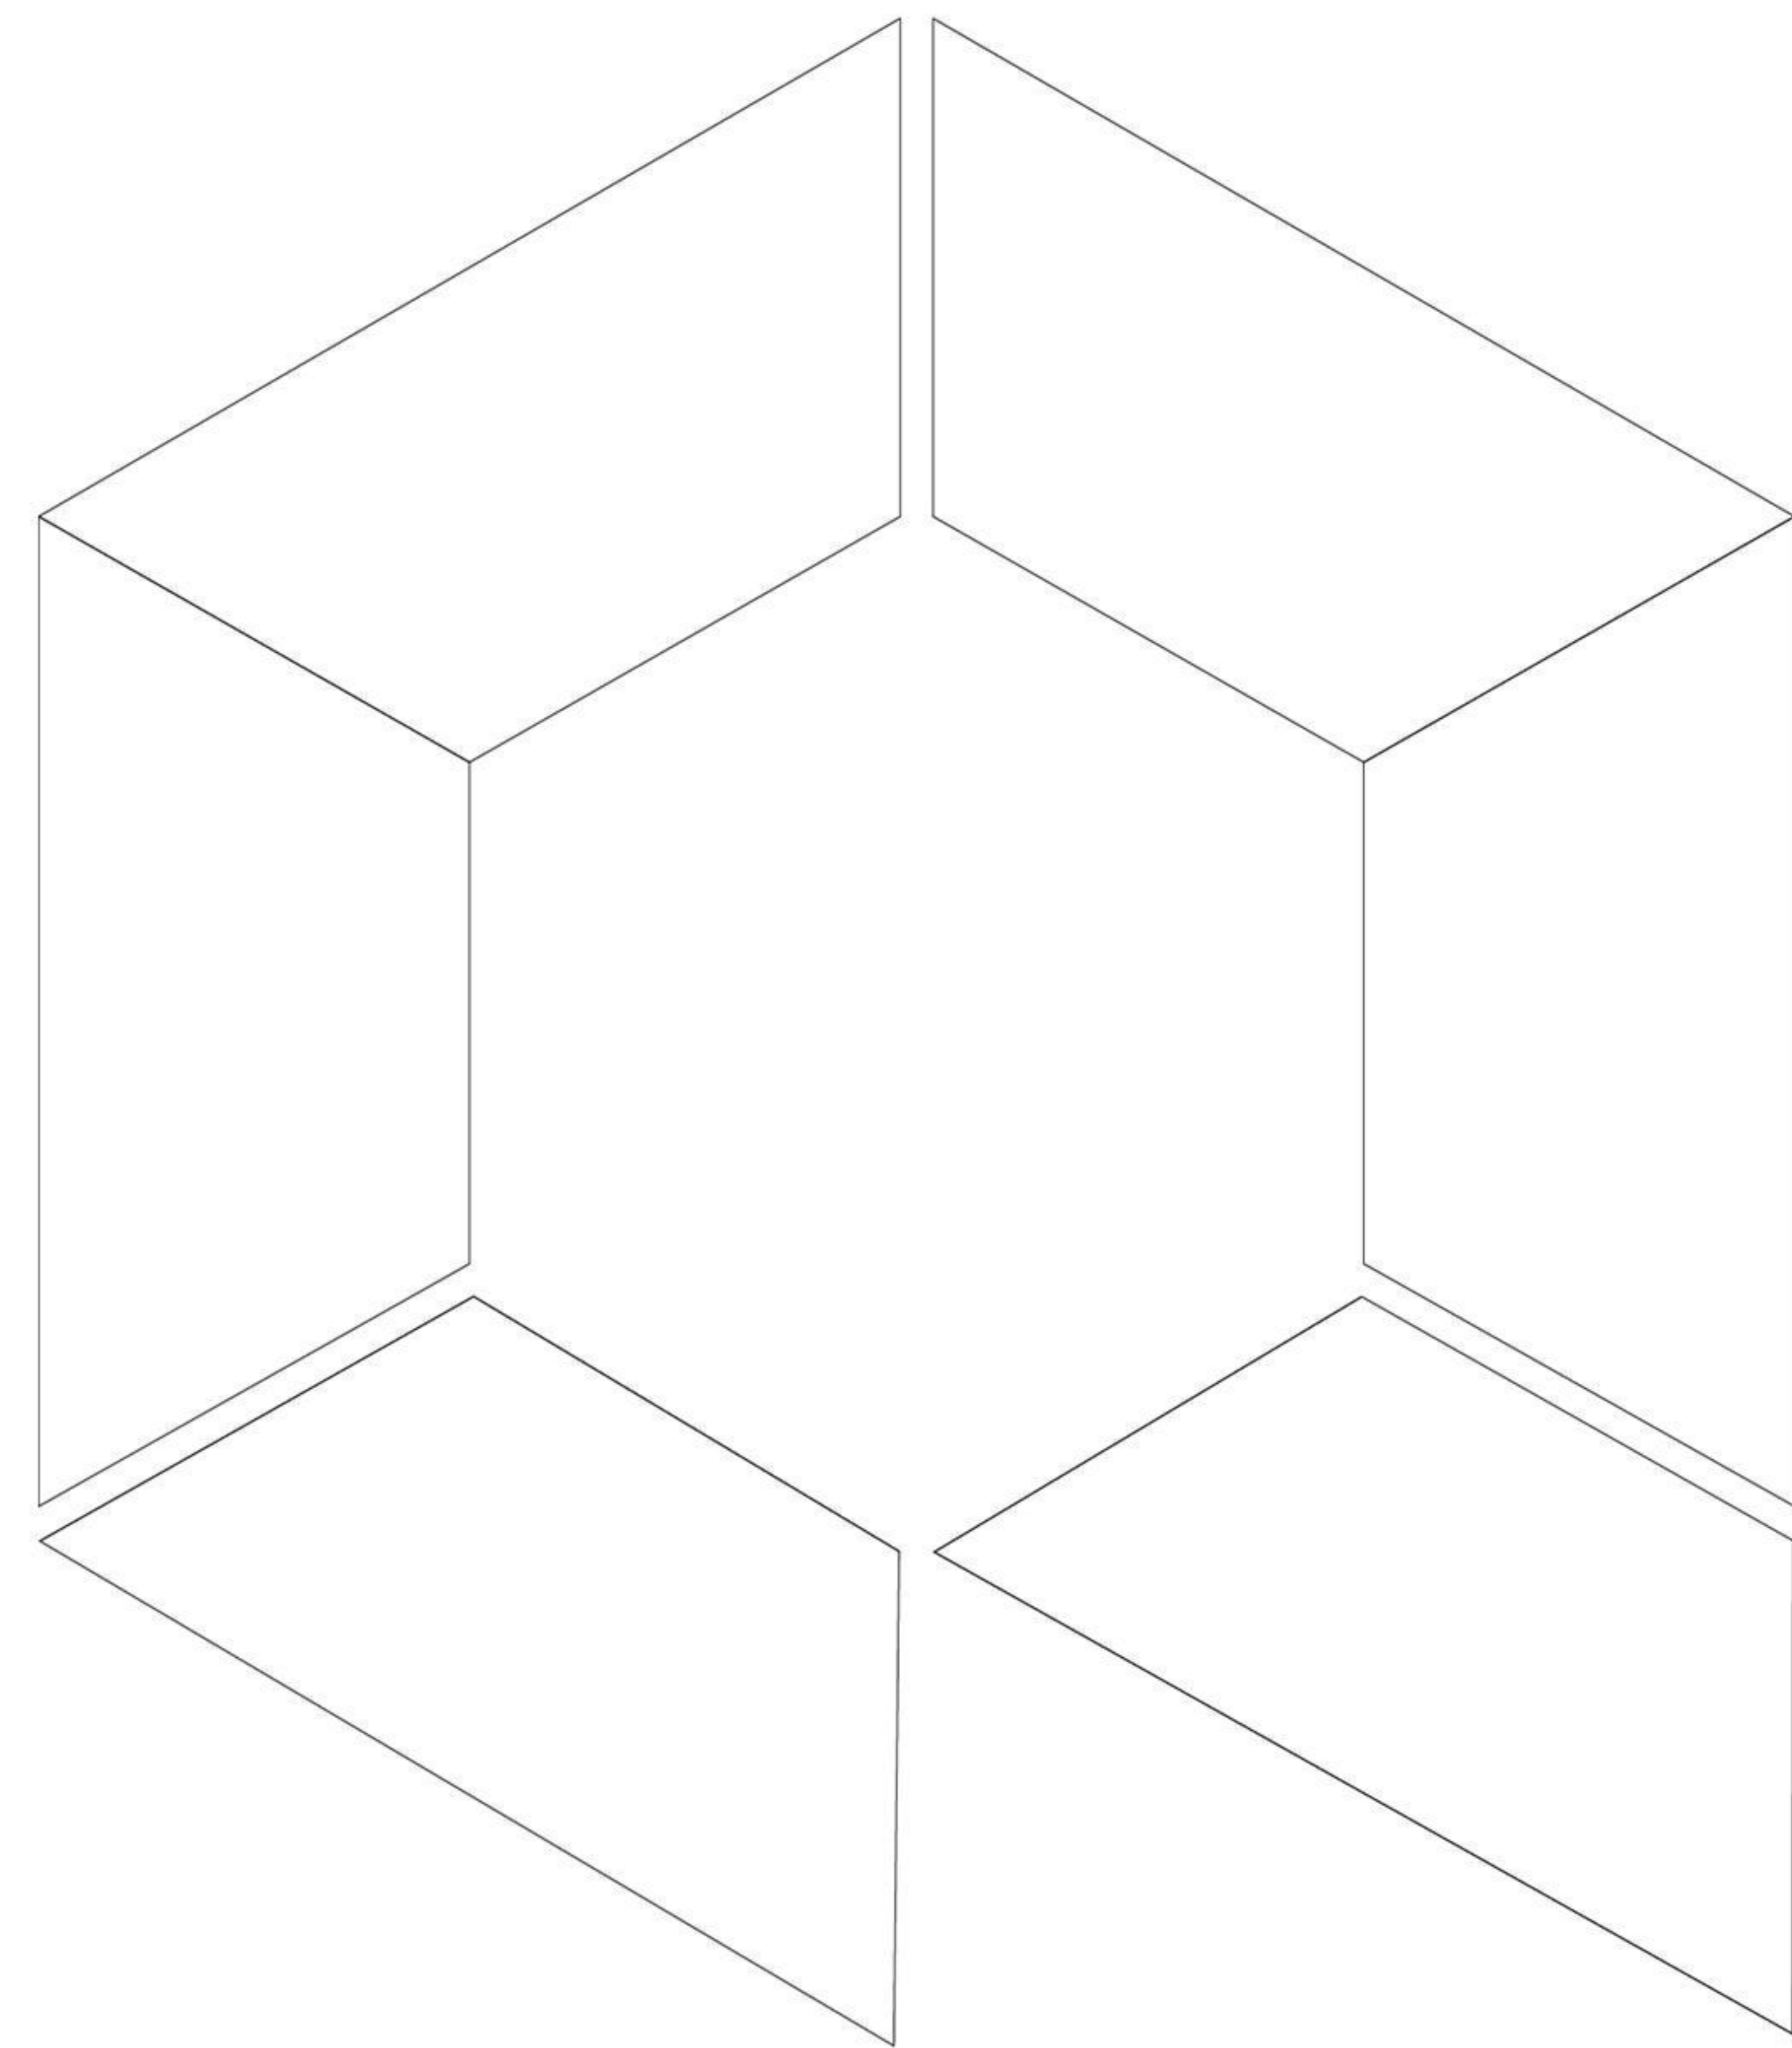

- More than 120 completed projects
- 160 highly qualified developers and still growing
- Offices in 4 different locations
- Working in 13+ different countries
- Handling work coming from 10 different time zones.
- In process of ISO 9001 certification

INDUSTRIES

Online marketing

WEB PLATFORMS

TxCare

TxCare is a Lead Management CRM which is used to collect the callers data from incoming calls. The system is able to collect a lot of callers data before the call is transferred to the destination number, using the third party software webhook. The additional data are collected manually by the call agents when they are asking questions to callers. The goal is to gather all the data and decide the best facility to forward the call off, who will be buying that leads.

TECHNOLOGIES USED

FRONTEND			
BACKEND			

Storydoc

Storydoc is simply the best SaaS to boost healthcare's workflows. The patients tell their life stories to your chatbot. Then, we tell their stories to your caregivers.

Storydoc is CMS (bot builder) for building an interactive chatbot fitted to any clinical needs, which helps patients to tell their stories about any medical issue by choosing from picture carousels, paperdolls and severity scales among 12 questioning mechanisms.

TECHNOLOGIES USED

FRONTEND

Ionic 2 (Angular 2)

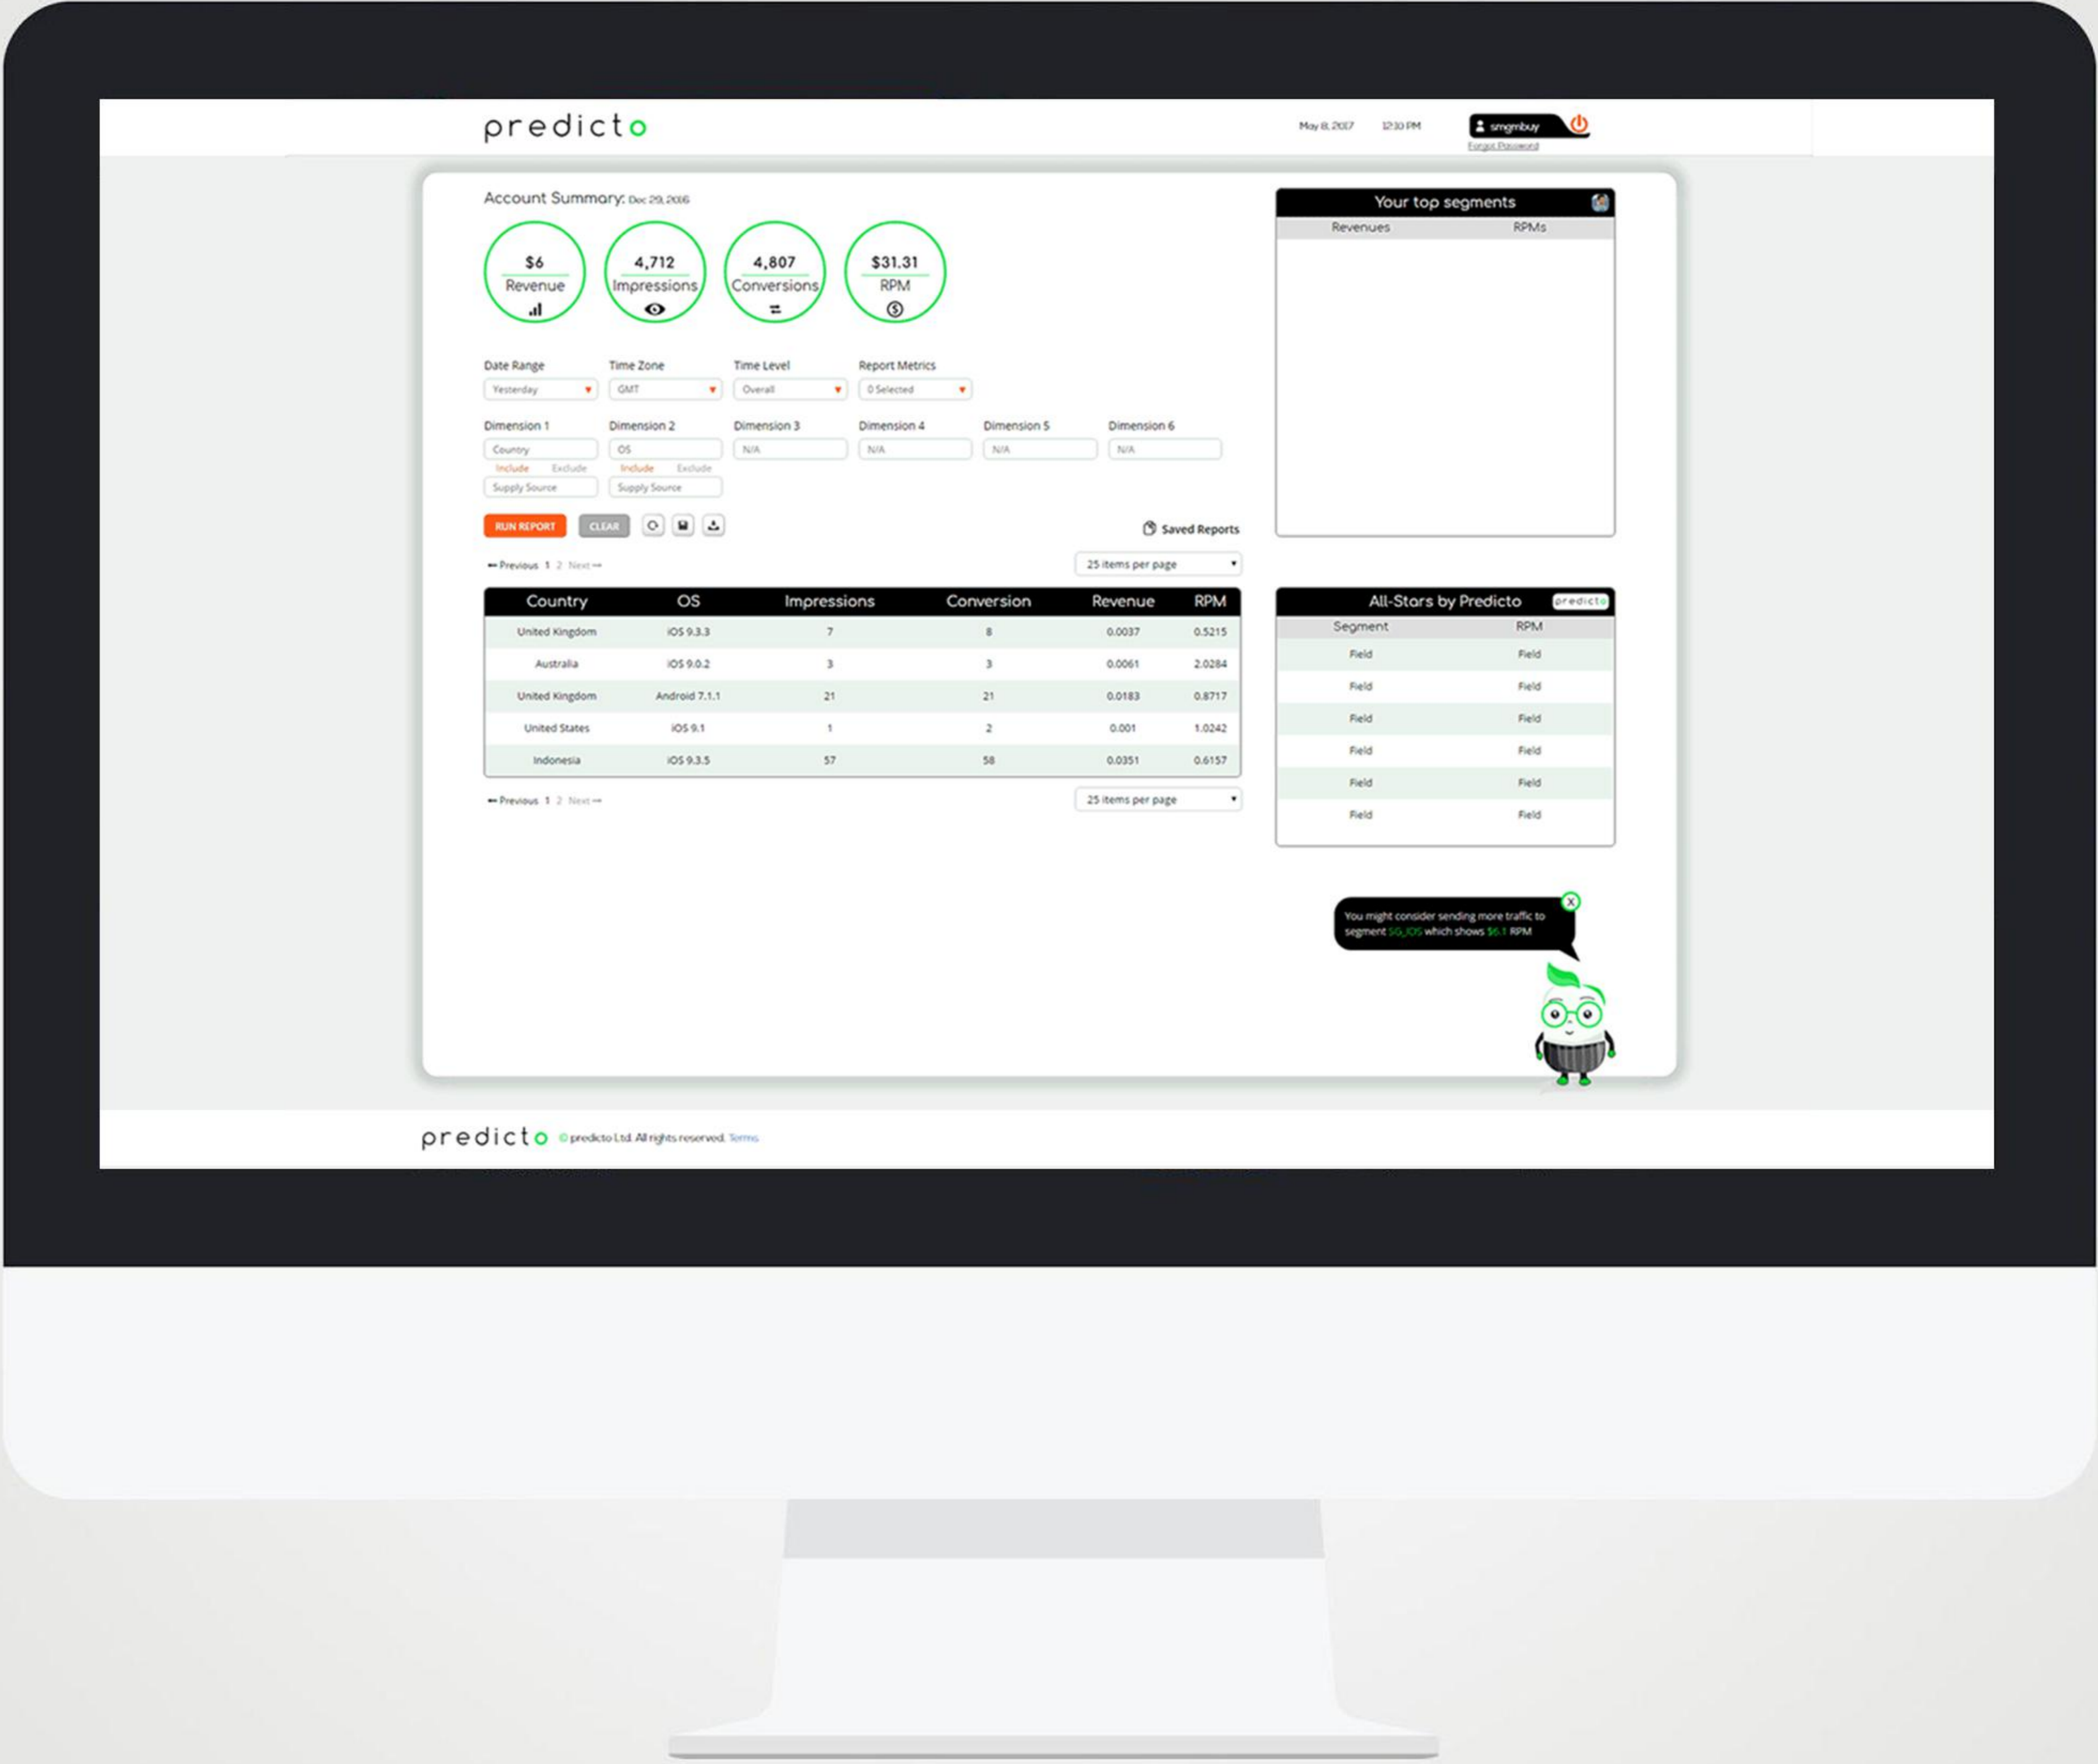

Vidride

Dashboard and widget-creation pages for a video sharing platform. Allows users to create and preview widgets, and track their overall performance.

TECHNOLOGIES USED

KISS MENU - Mobile Ordering System

Beautiful and intuitive design of our app makes your ordering process easier than ever. Being only a few clicks away from your final selection, you are now able to receive a complete offer of the venue on your own mobile device.

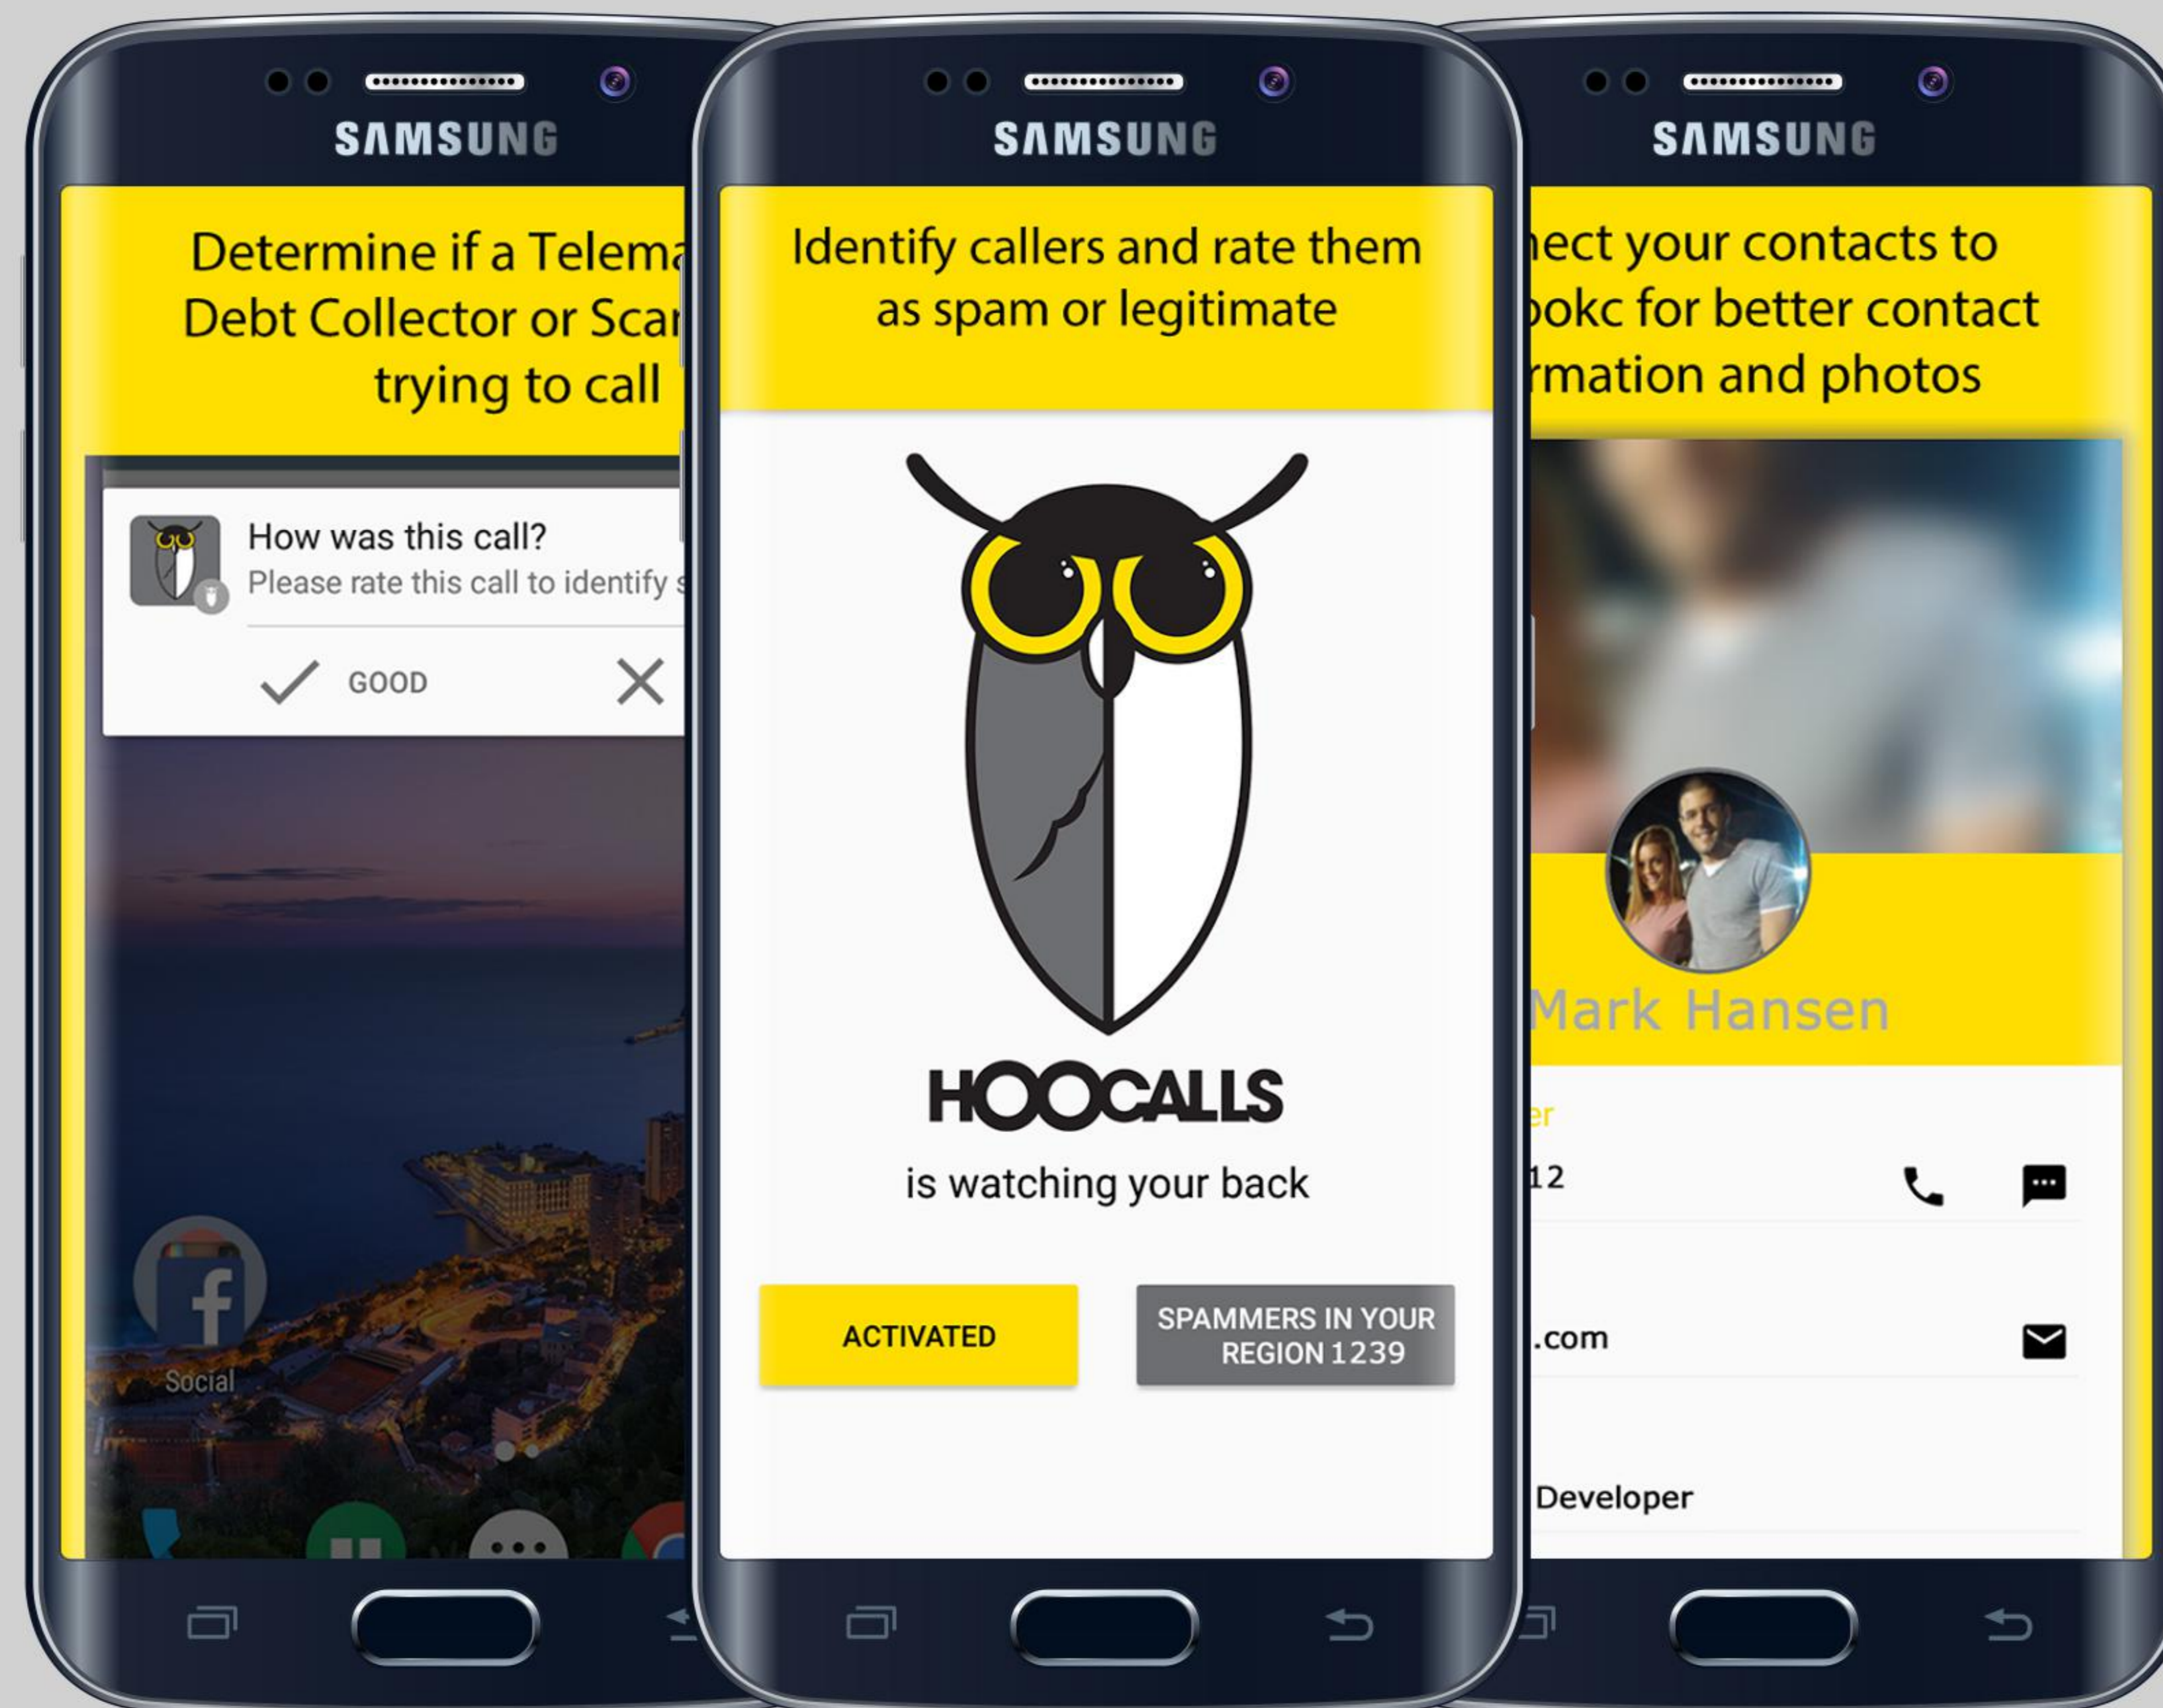

Expressing yourself has never been easier.
Instantly share the perfect prop for the moment.
Just like one, two, three...

Elevator

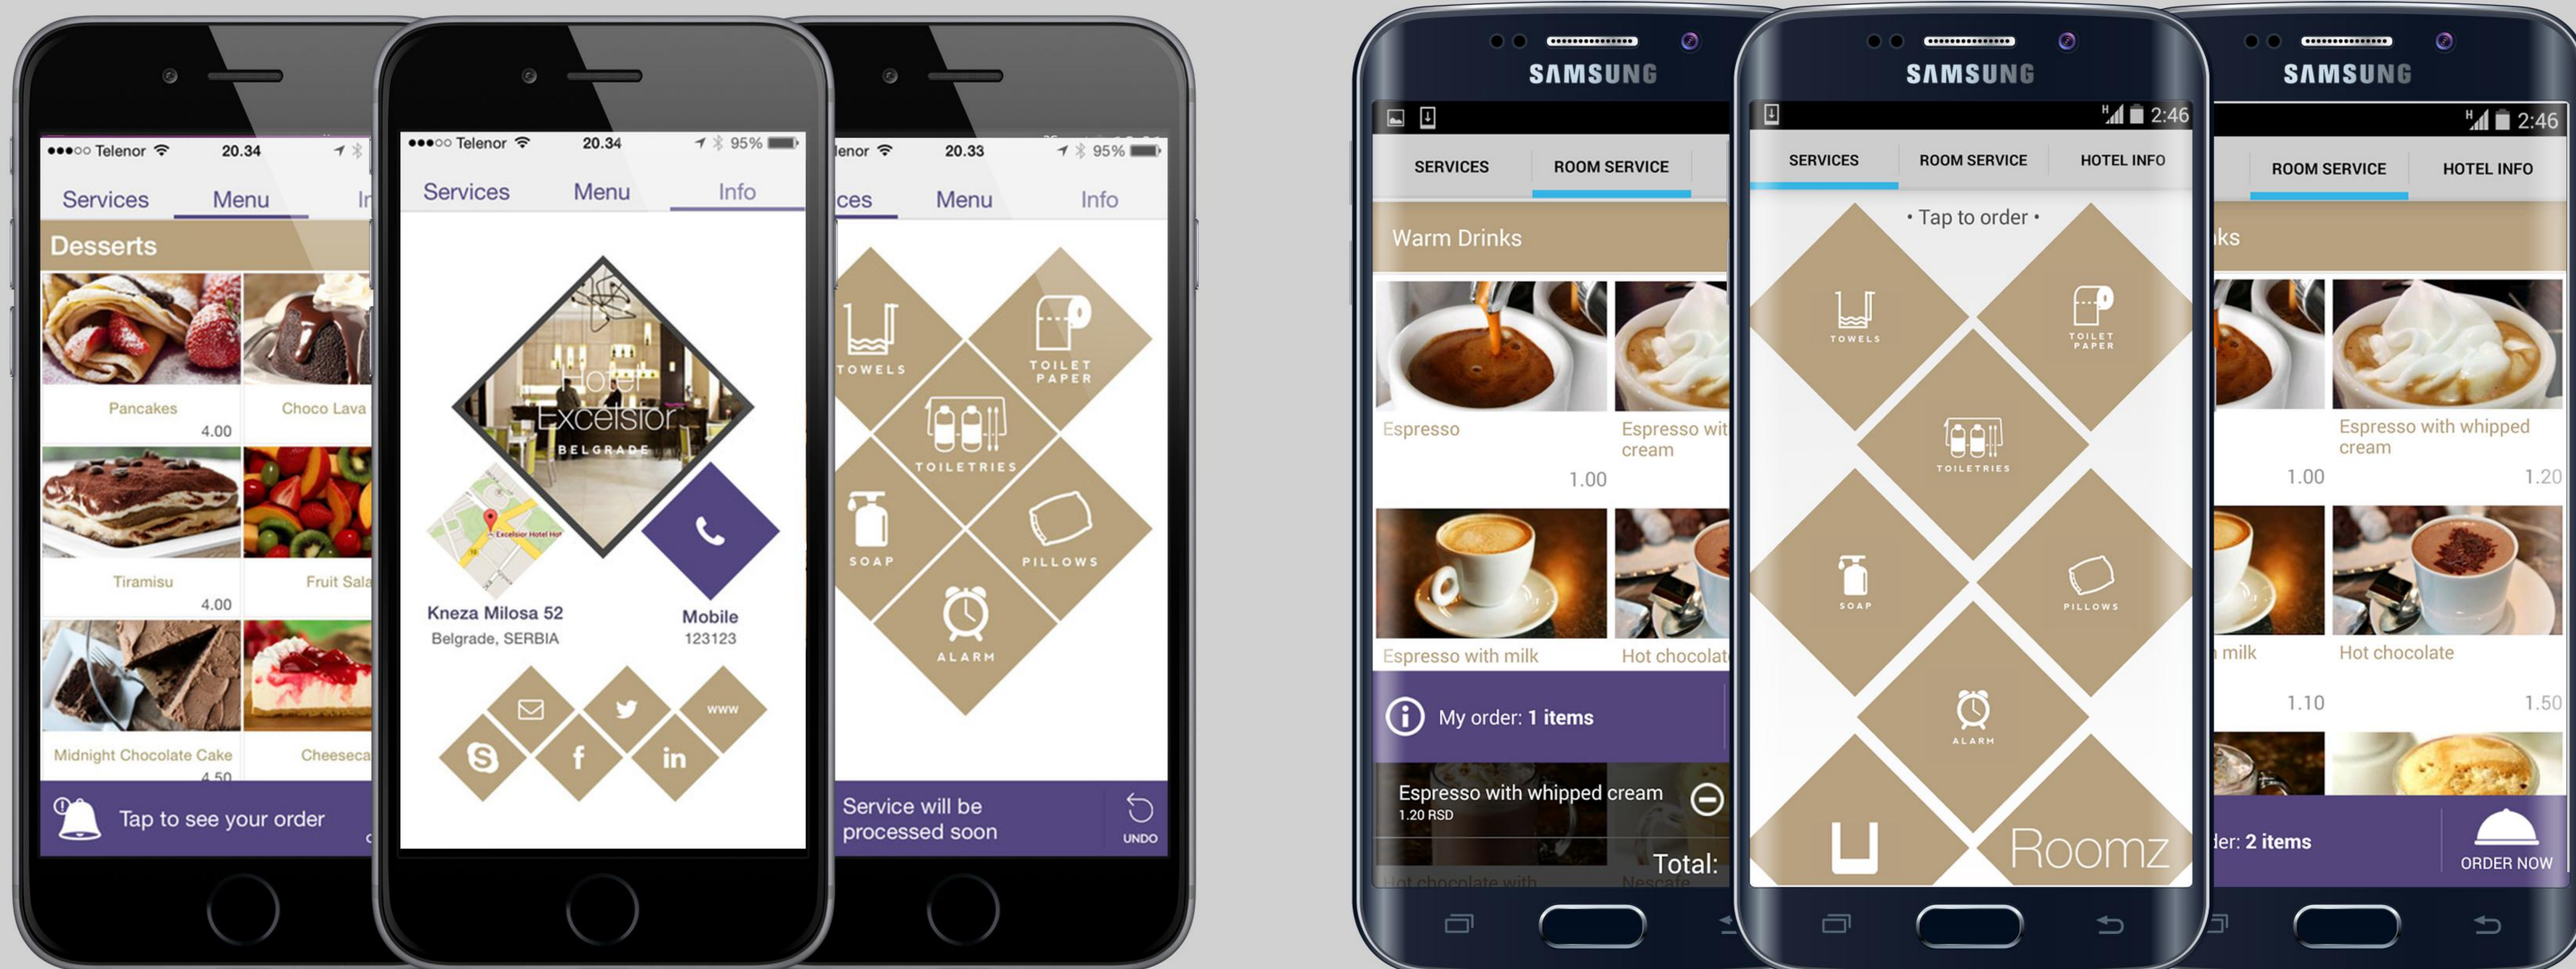

Elevator is a new and exciting way to get noticed by recruiters and to apply for jobs.

The average resume, if it's ever lucky to be seen, is scanned as quickly as 30 seconds. This isn't enough time to make a great first impression, especially if you're not the Shakespeare of resume writing.

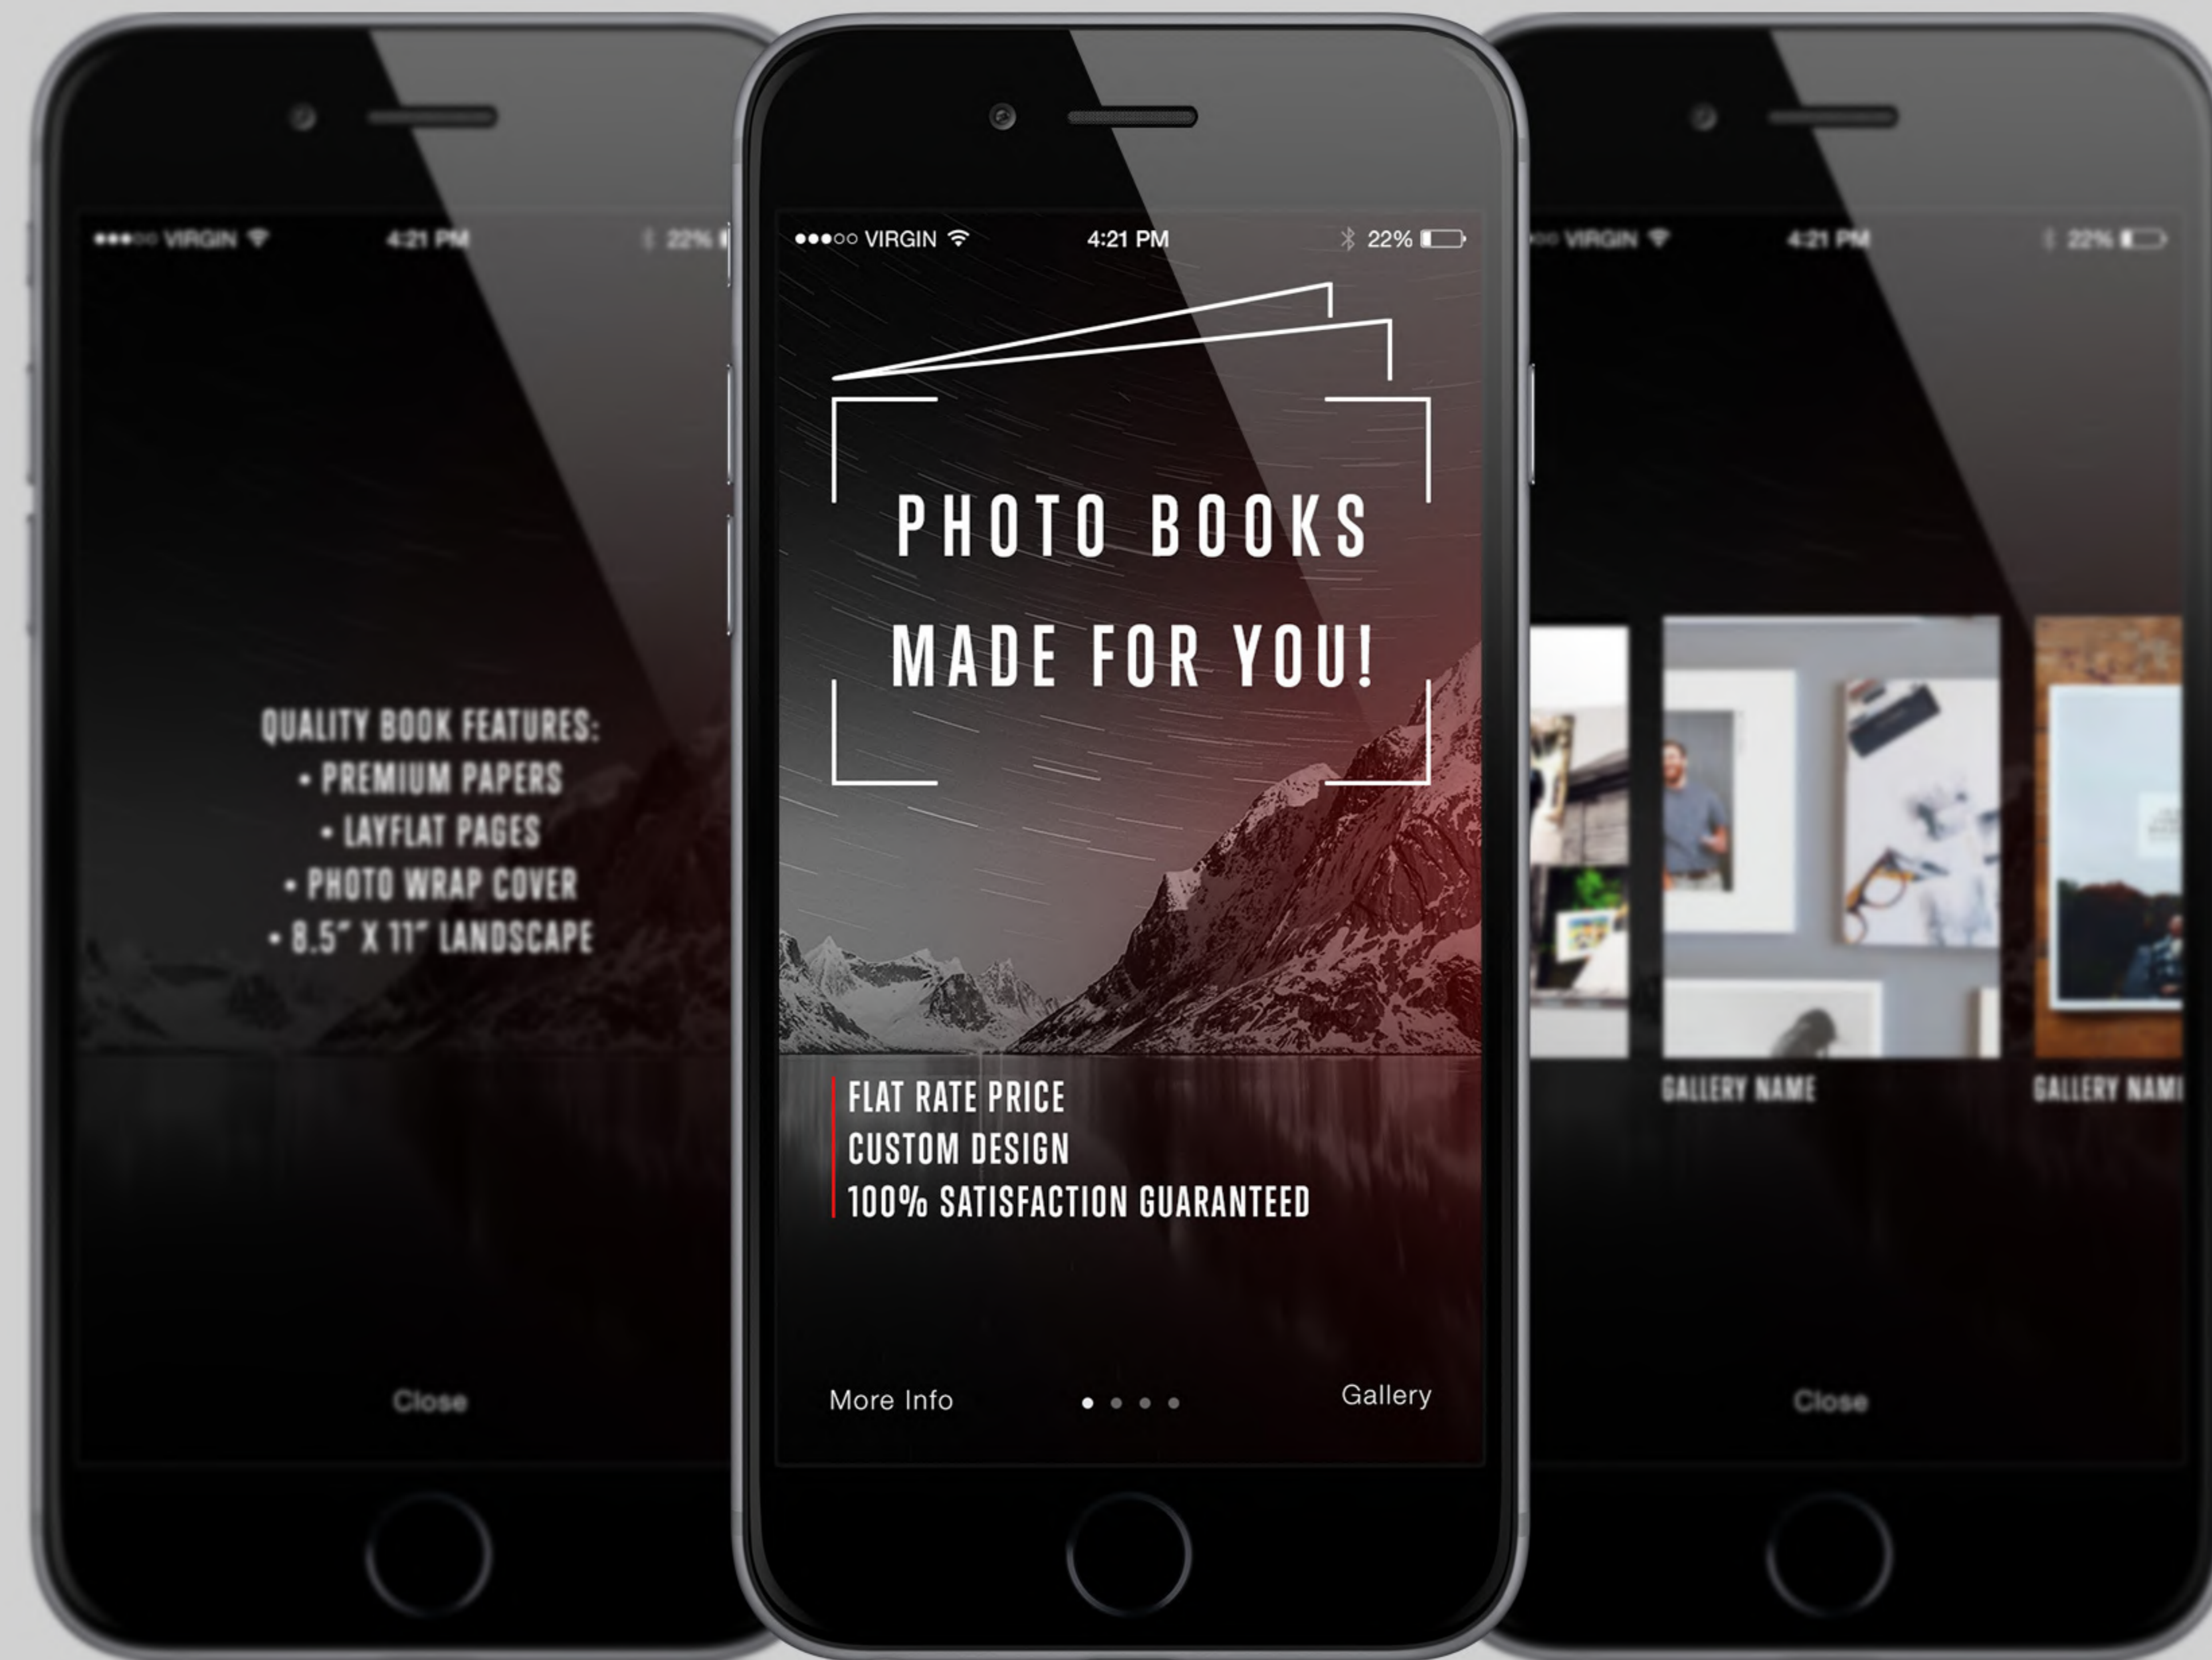

hOOCalls - Identify Spam Calls

hOOCalls makes it easy to quickly determine if a Telemarketer, Debt Collector or Scammer is trying to call you as well as provide you with the ability to take action to block them from calling you in the future.

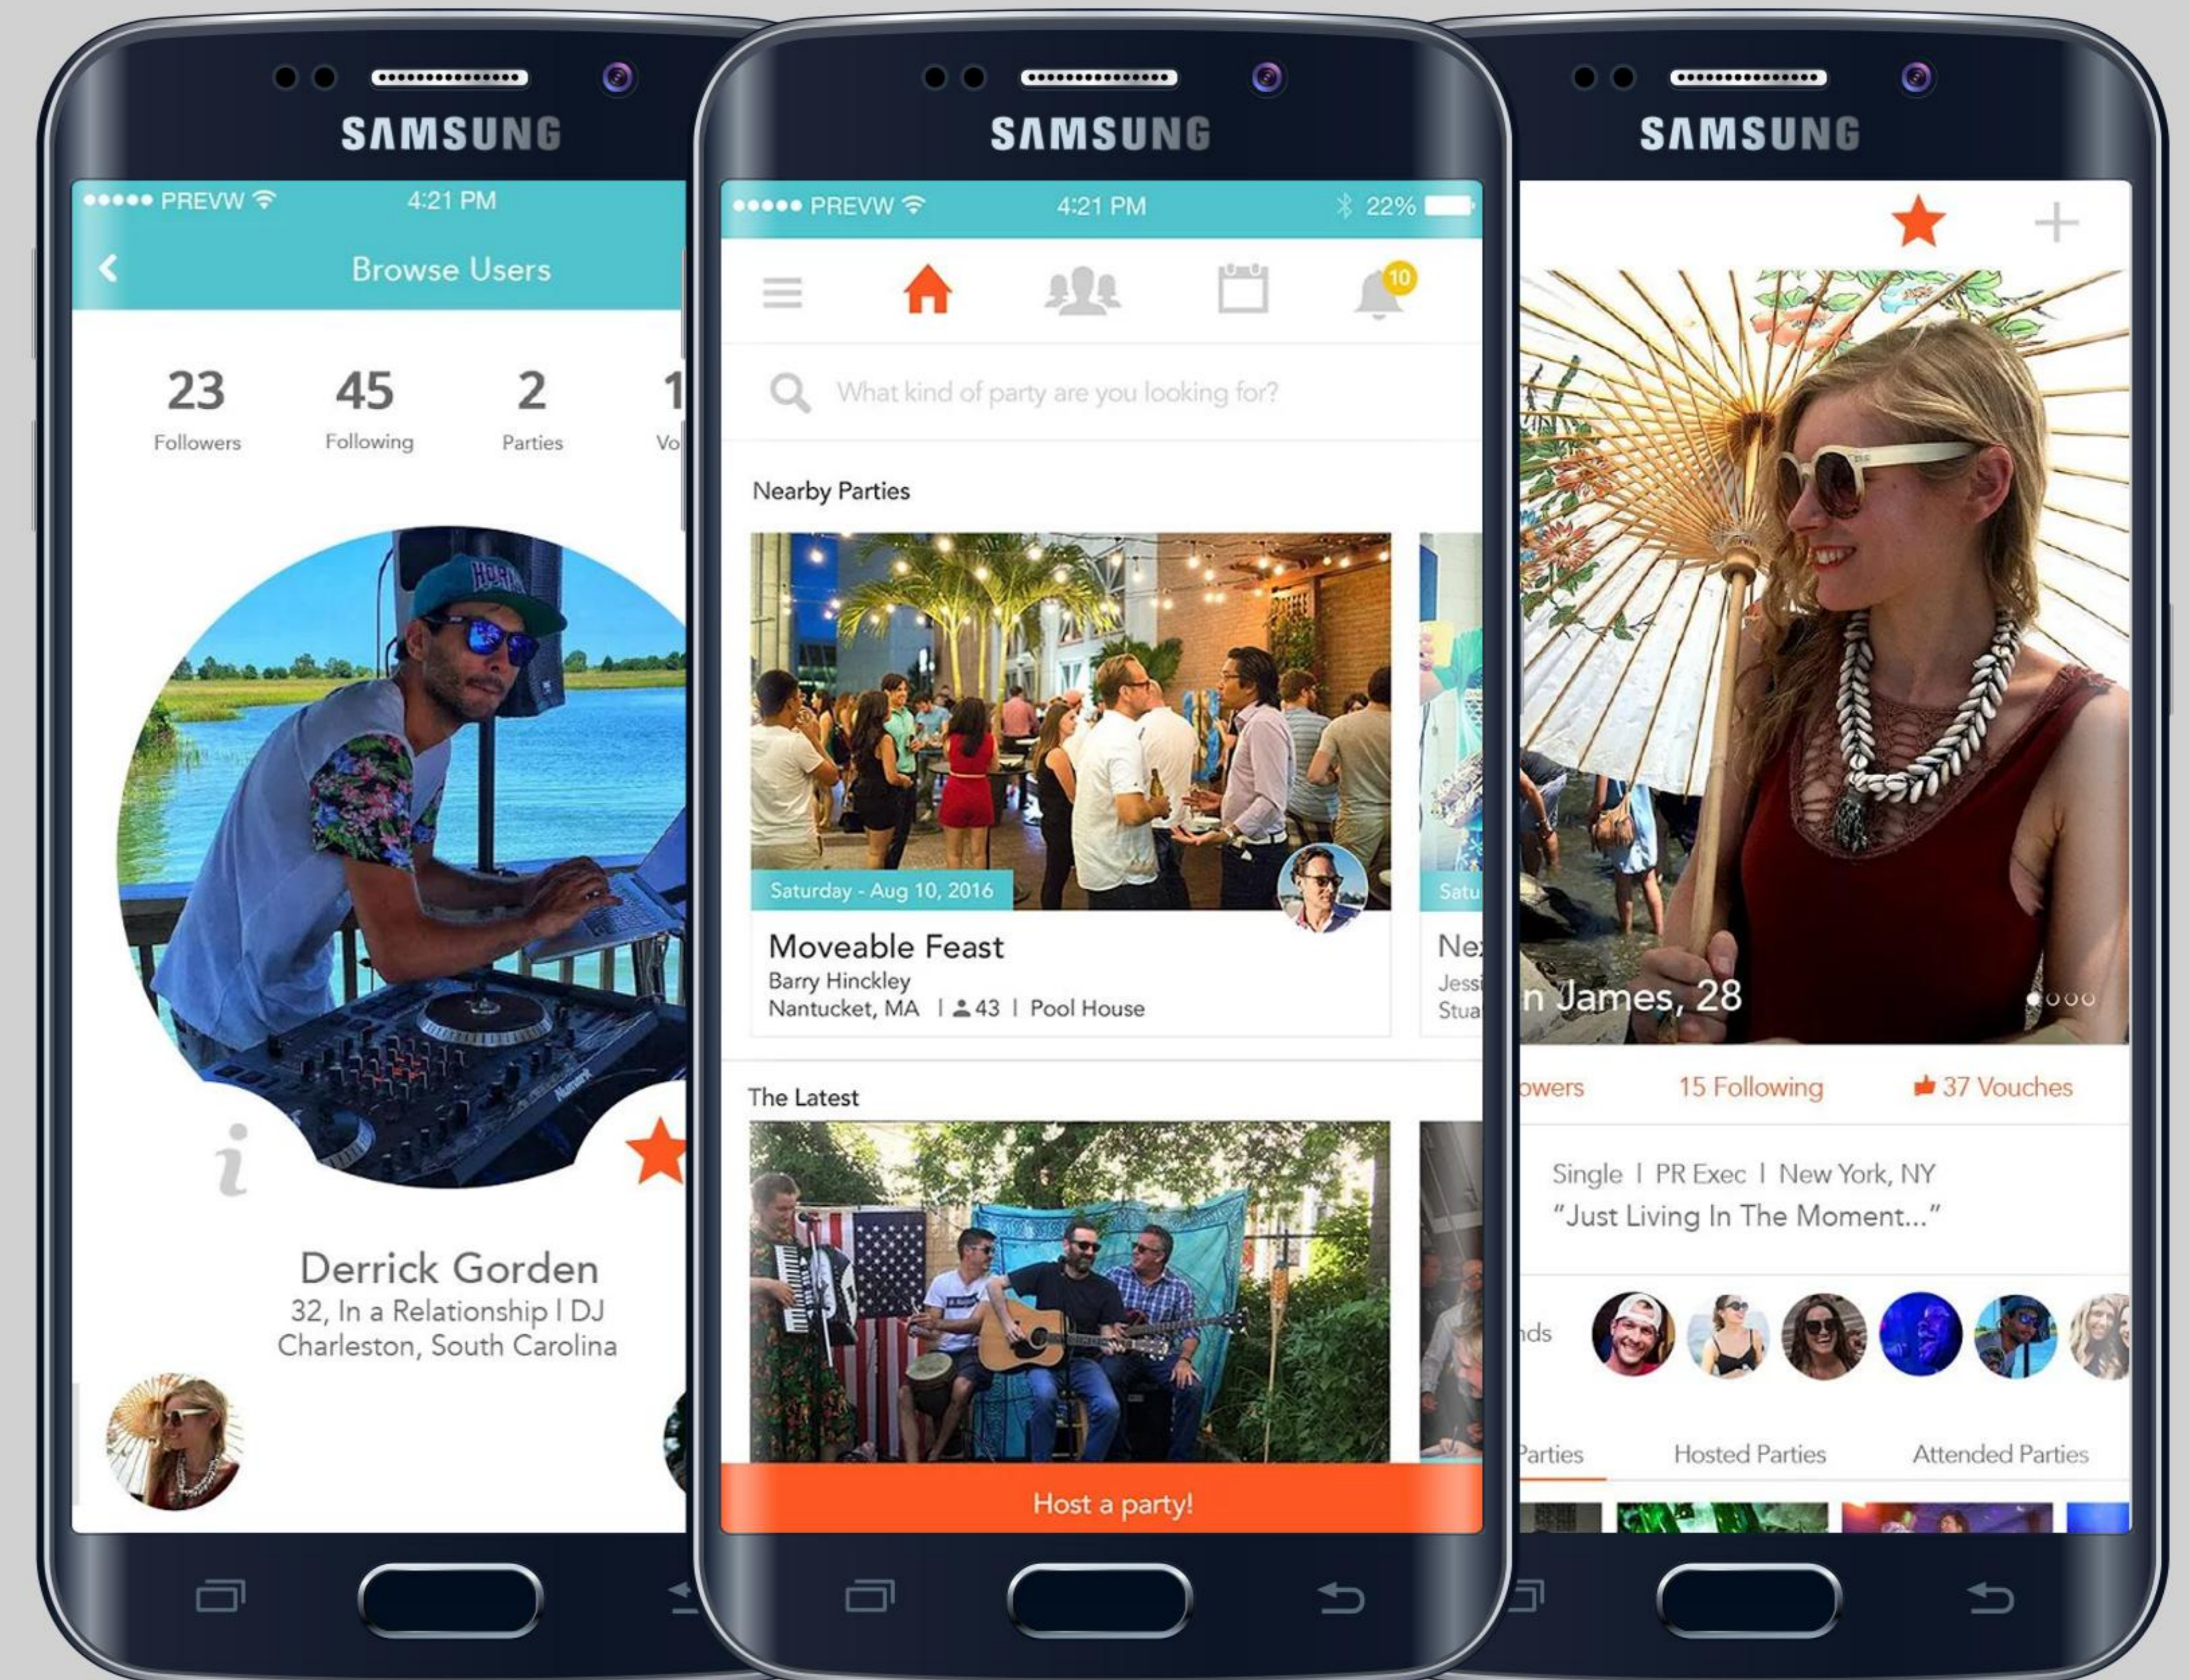

ROOMZ - The app for room service

Our sleek app lets you have an amazing experience while interacting with hotel staff and services. Avoid unnecessary calls and order a service with a single tap. Browse through the rich pictures of the restaurants food and drinks and have them in your room minutes later. Never get lost with Roomz, as you can always see all of the hotel's information such as phone, website, location, Skype and more.

PhotoFix

Our professional photo editing services have no rival in turnaround or cost. With the ability to edit 1000's of photos within hours at pennies on the dollar allowing you to spend more time doing what you love, shooting, not editing!

Yotme

Yotme is opening doors to private parties and outings around the world and inspiring hosts to throw great parties. As part of the YotMe community, a party with the same old crew just became a party for friends, new and old to meet and mingle. It works like this: A host publishes their party to the Yotme marketplace where potential guests can send a “join” request.
