LiveWireLabs

WE BUILD
CLEAN, RESPONSIVE
AND
QUALITY PRODUCTS.

We are a design & development laboratory focused on Mobile & Web Applications.

Led by a British Expat, our business model is to bring together the best talent in the country, combined with a development process focused approach. We have a complete stack of developers covering a multitude platforms to deliver quality code and finished products that maximise the goals of our customers.

TALENT

We have the best talent in the country.

The hirng process we implement is stringen, versatile & by design leads remarkable individulas to our doorstep.Our process includes logical and technical tests.

We hire individuals who add value to our firm and therefore will be invaluable to your product.

PROCESS

Our firm is focused on the development process, which in turn ensures accurate, transparent and well structured product.

We build test cases and use several cloud based project management tools to keep our clients invlolved at a pro-active level.

This focus on the process is what differentiates us from our competition and

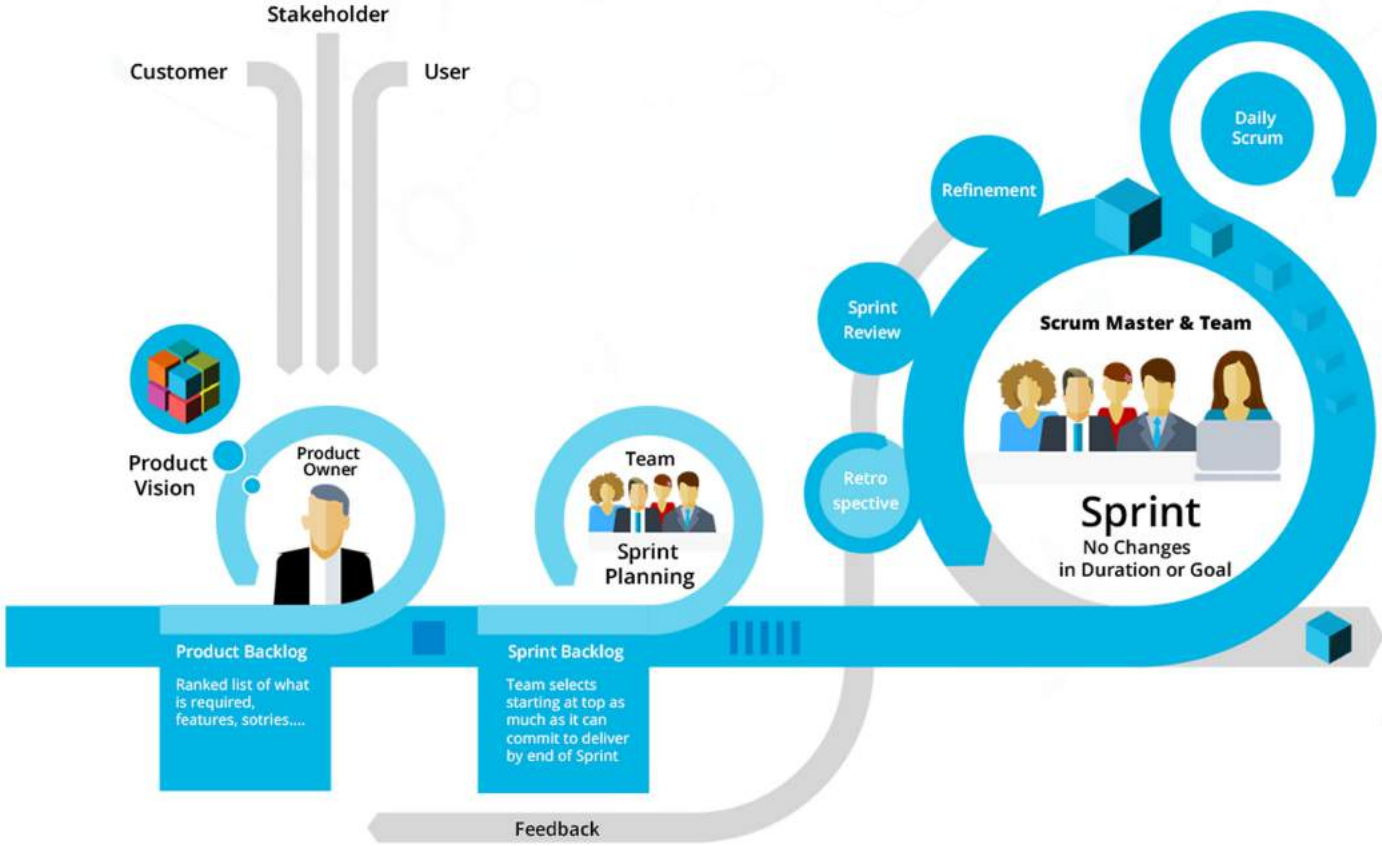
DELIVERY

We deliver on time by design.

Time and quality? Is that really possible? Yes it is because we control the stories based on our clients time constraints.

If there are sprints and stories with too many variables, we highlight to our clients the variable timeline and nature of the same.

AGILE METHODOLOGY



We use the Agile method, breaking up the product into sprints during ideation and conceptualization.

We then have regular scrum meetings to shorten the feedback loop through our pro-active development process.

Refinements and changes are completed mid-sprint leaving no surprises and a clean finished product.

TECHNOLOGY STACK

IOS

We have an extensive team of Apple Certified Developers,with our C level team having more more 16 years of iOS development, this is one of our core areas of strength.

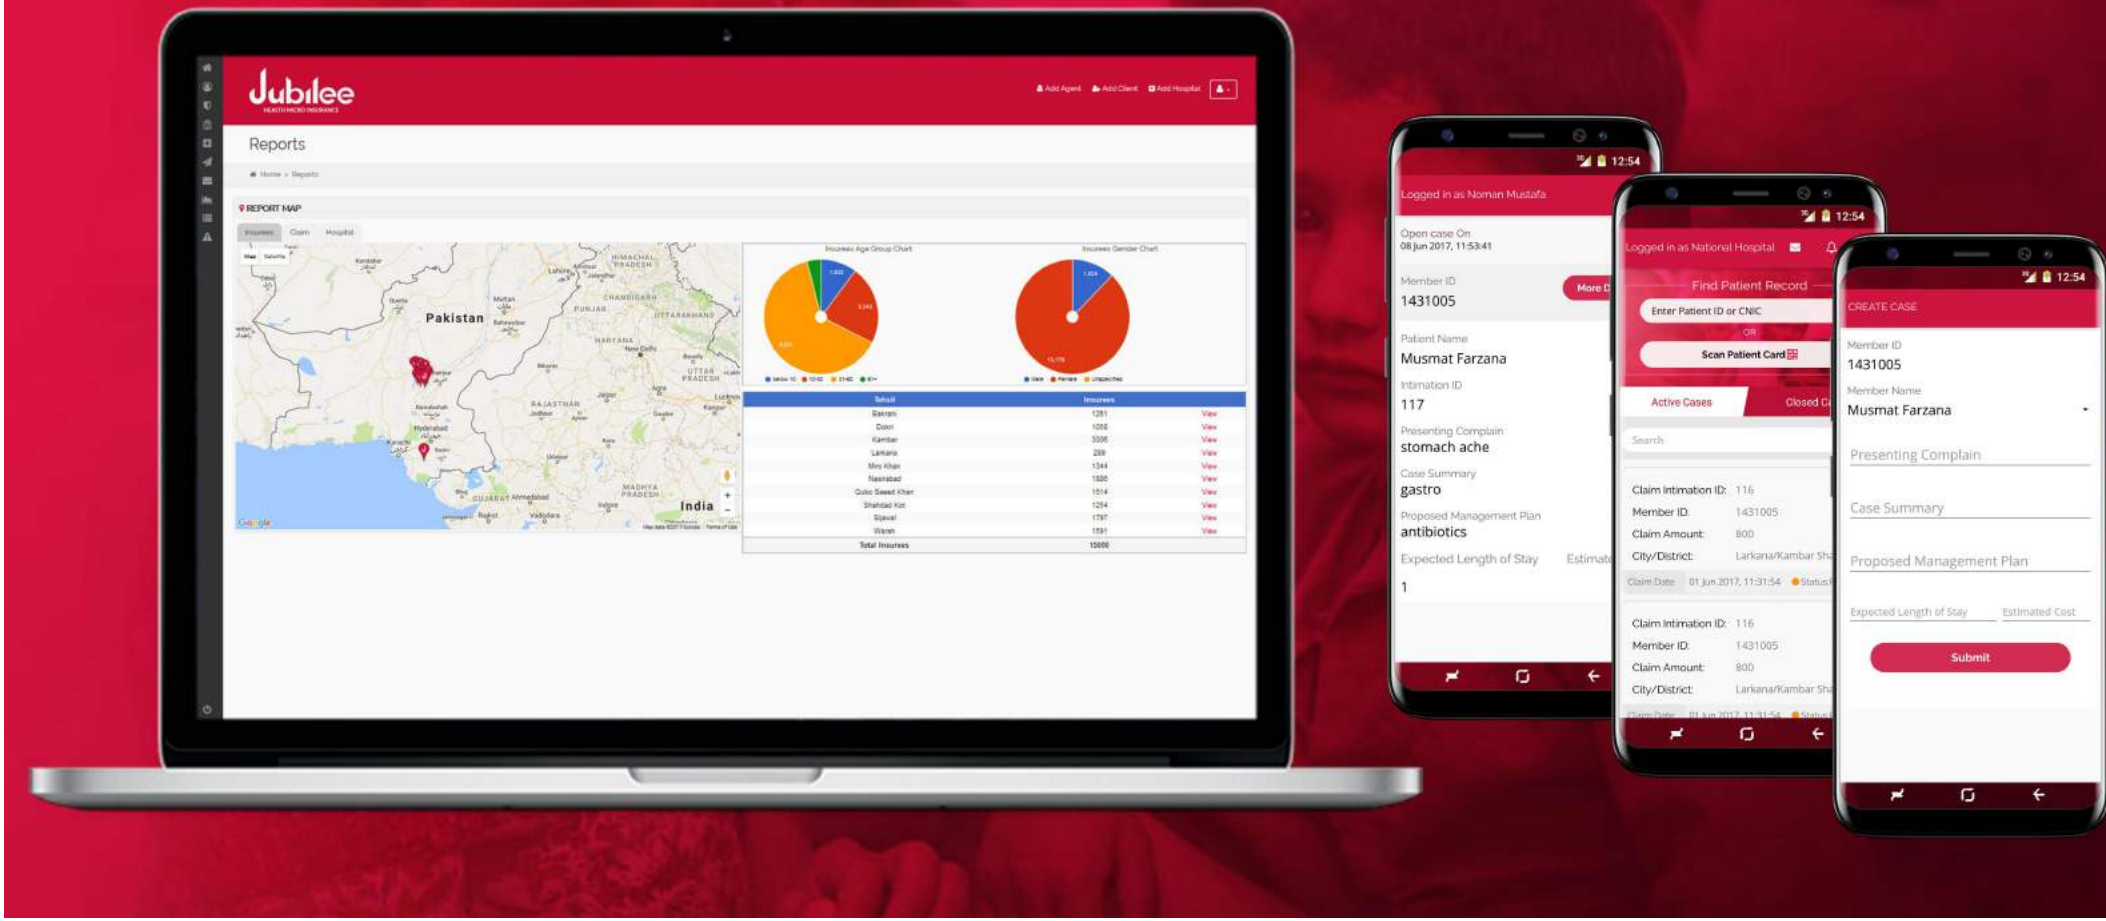
FEATURED PROJECTS

Jubilee
HEALTH MICRO INSURANCE

COMPLETE SOLUTION FOR COMPLETE PROTECTION

صحت نعمت



The largest Telco in Pakistan with over 70 million customers, their problem was they use multiple platforms in various departments to automate internal HR requests to manage all official requests.

We provided them a middleware backend solution that integrated with multiple platforms to streamline their HR system into one simple front-end application available both on Web as well as Mobile.

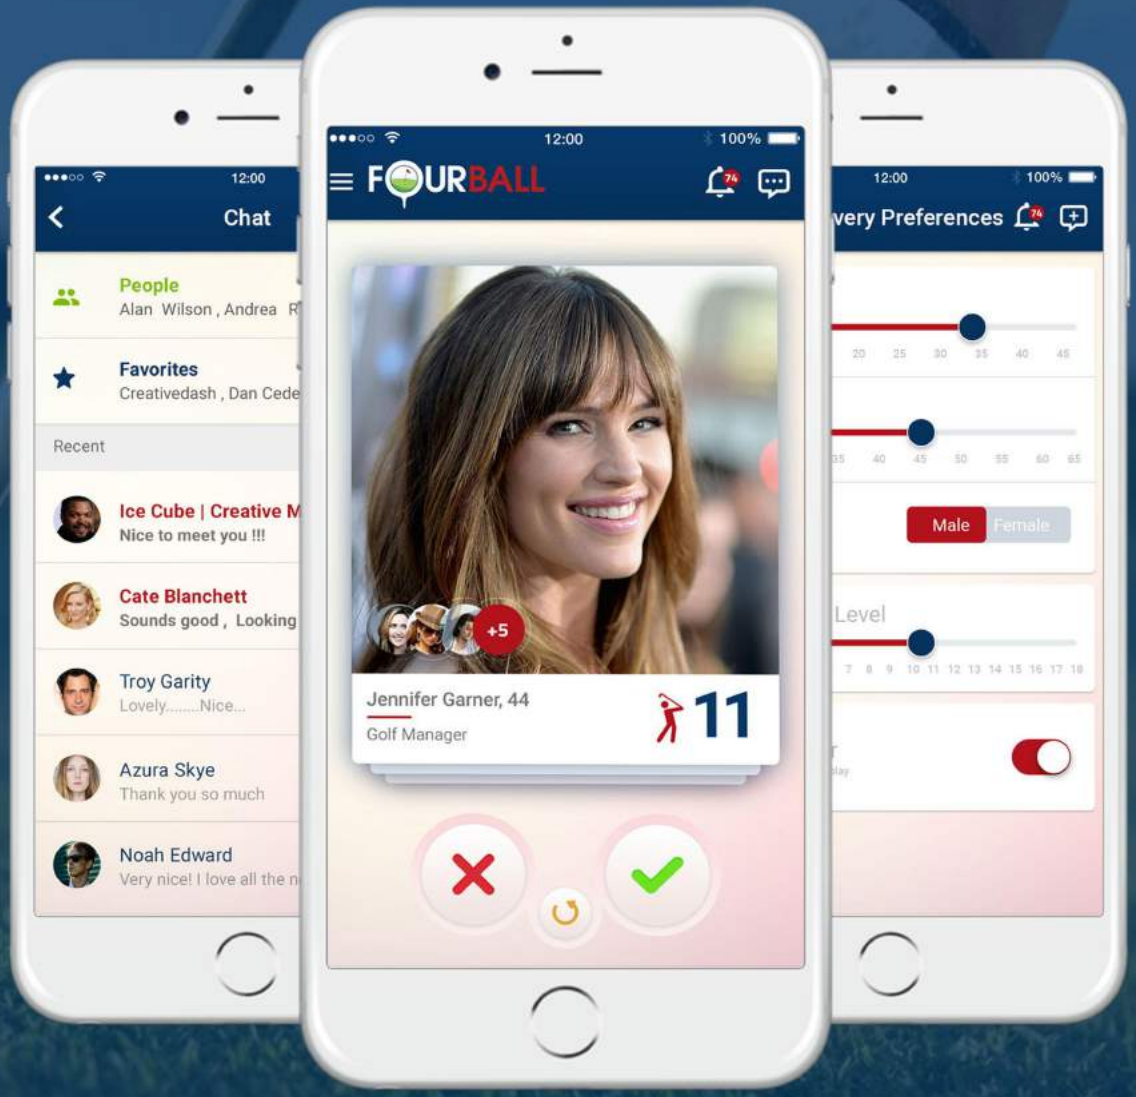
All official requests are processed at the click of a button saving Jazz time and money!

FOURBALL

Meet, Book, Golf

A versatile solution to the traditional 'single-ball' problem, golf is a lot more fun with friends. The app is targeting users on while they travel or even beginners who do not have a regular golf group yet.

A mobile app very similar to Tinder, this helps users find other golfers in their proximity. You can also add people from your social networks and



SLEEP FAN

A simple and highly successful product. This works on the premise that humans can not sleep or relax with complete, eery silence.

The app provides background noise in the form of multiple types of fans with adjustable volumes as well as timers. It works like a charm!

Alan's Orchard
FRESH BOX

Farm fresh produce brought to your iPhone, it never was this easy to stay healthy, Get farm fresh fruits and vegetables delivered at your door step. Conveniently manage the schedule with flexibility of daily,

weekly and monthly Fresh- Box programs. Keep track of delivery through notifications.

Kick Series

Kick Celebrity - Kick Monster - Kick Politician

160K+
DOWNLOADS

This is a series of games developed for our client on the Unity 3D platform.

Kickseries contains explosive gameplay times ten! Use the incredible arsenal of guns, nun-chucks, tasers, tomatoes, land-mines etc to attack over 10 different characters. Each figure reacts in it's own unique way.

Even if you are a stress free person, this series of games is a perfect stress reliever!
