About Emizen Tech

Emizen Tech is an offshore software development company, having a closely knitted team of 100+ multi- talented software professionals with integrated transitional capabilities and ability to generate creative idea that speaks itself.

Over the past 7+ years operations, Emizen tech has reached the soaring heights of success, and has gained global customer footprint, enveloping USA, UK, Singapore, Canada, Europe, Australia, UAE etc.

Our Story

Founded in 2013, Emizen tech has developed 600+ projects for web, desktop and mobile for 250+ customers globally. We have served more than 30 different industries with a team of 100+ Software engineers.

We are Creating robust software solutions and delivering them with great levels of professionalism and diligence is our goal. It is backed by a great sense of commitment, tremendous industry exposure, great teamwork and credible technical expertise. Our committed professionals aim to provide our customers with software solutions par excellence.

Engagement model

We, Emizen Tech proposes fixed pricing/Hourly rate methodology matching Client expectation of a fixed price /Hourly price model. The pricing structure is expected to provide a true cost of services based on web application development requirements.

Unlike other companies where they force you to select their choice, with us you are always free to select your own engagement model as per your business needs. We do have a few predefined models we frequently use such as below.
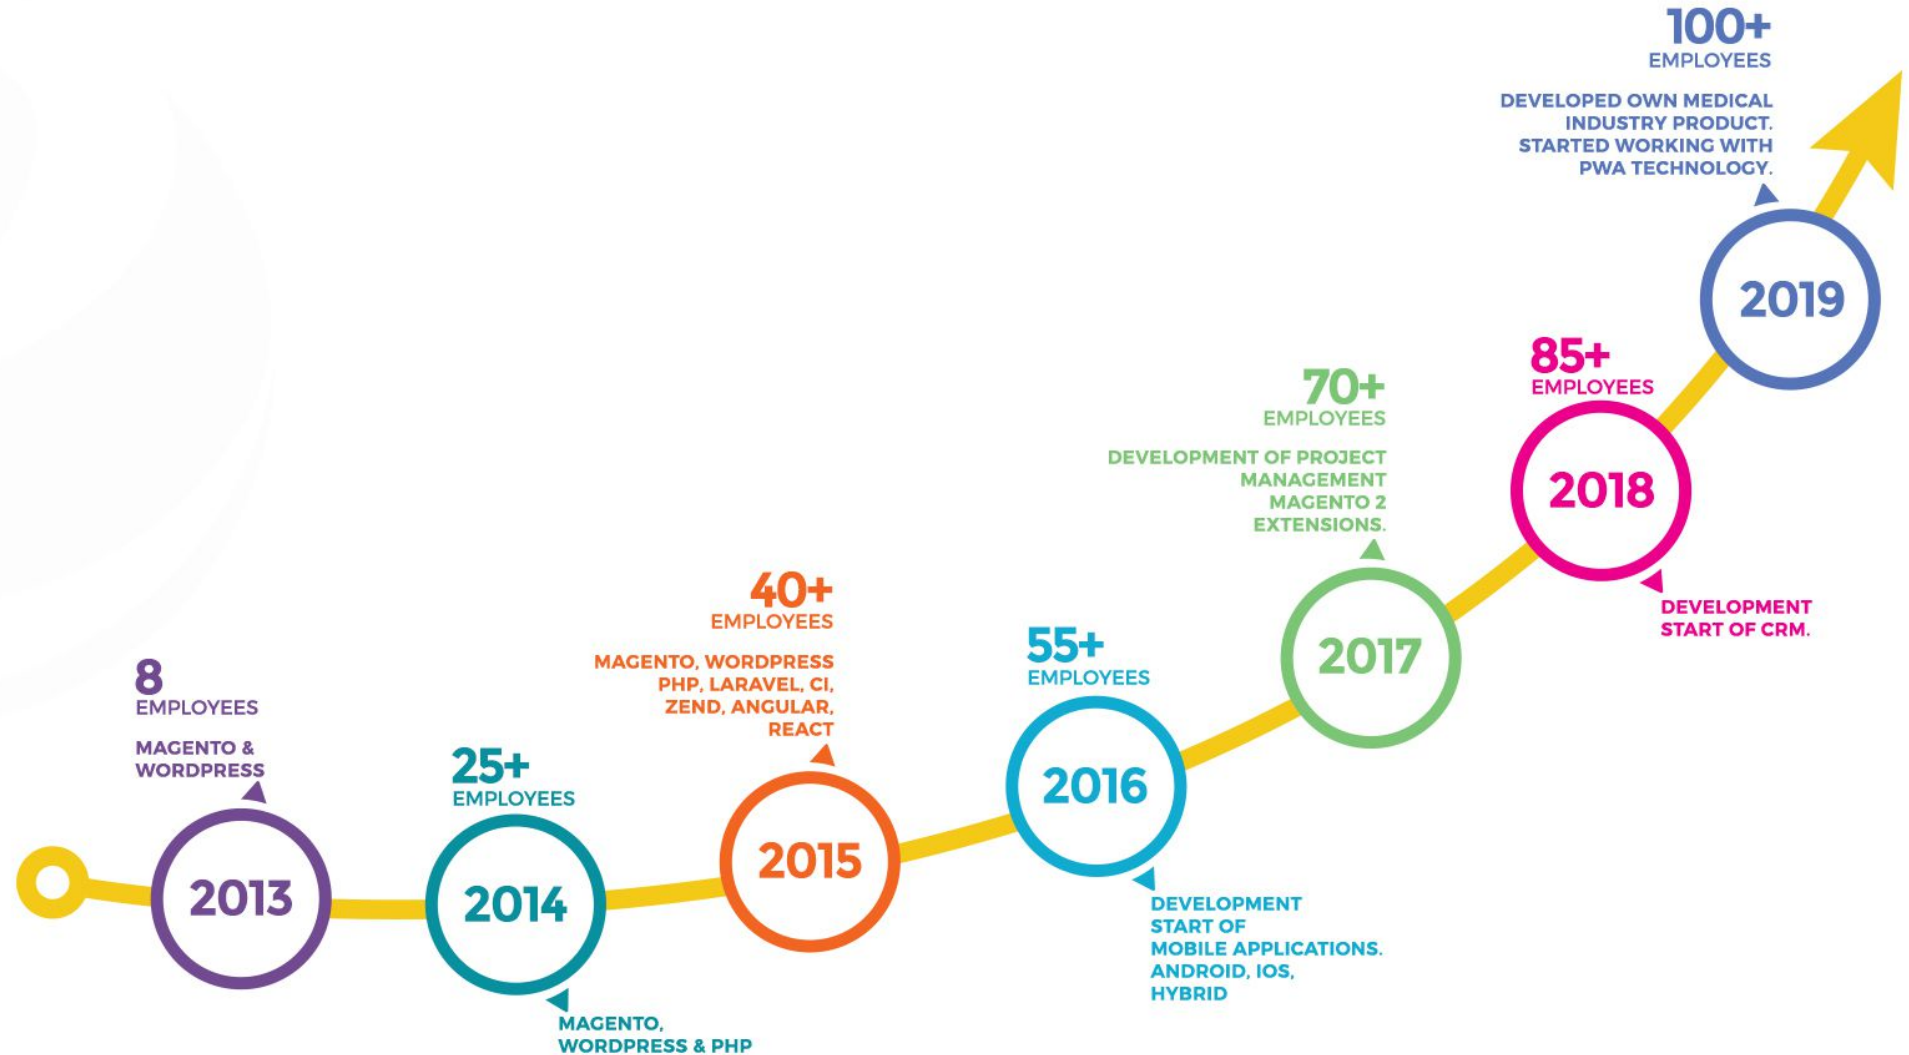

Fixed Price Model: We support a fixed bid model for projects whose arrangements are accessible up front or   for small pilot projects that execute a test and establish long-term business relationships.

Hourly Price Model: We also provide engagement model where hourly or monthly rates are charged if the project is iterative in nature and lacks visibility on its progress and end result. It is also most applicable for the customers looking to extend there technical   team.

Communication Barriers: We speak with clients in their respective time zones. Just get in touch with us and let us know what you require. We will always have a solution for you.

COMPANY
PROGRESS

It has been over 6+ years and EmizenTech has been the same in delivering the services which replicate excellence in quality. We strive to turn the vision of our clients into a reality and continue to help them gain success in their business.
