Our Recent Portfolio

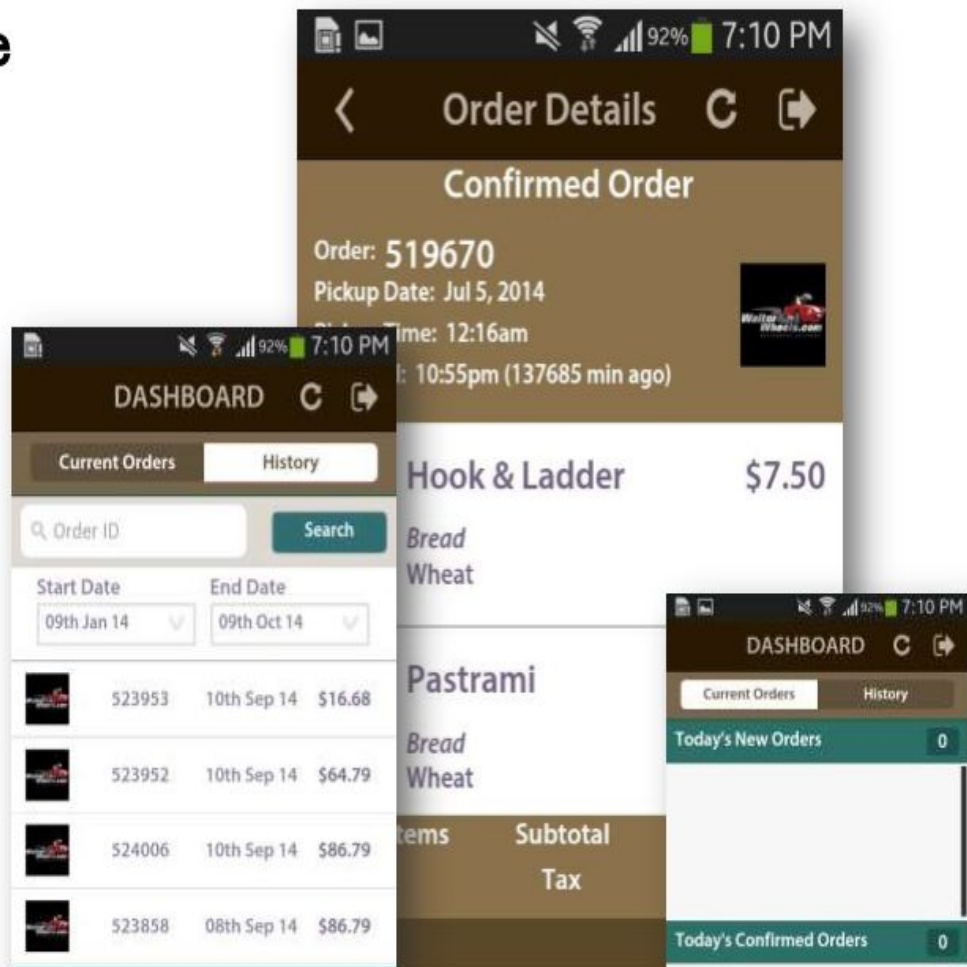

Food Order Delivery Service

We have created an application that helps restaurants to improve efficiency, save time and reduce errors. The restaurant receives order info and confirms receipt of the order. Application is used to dispatch orders to delivery personnel. Application lets restaurants review current orders and previously processed orders.

Solution Highlights:

- Notification alarm
- Click to call
- Mobile Analytics

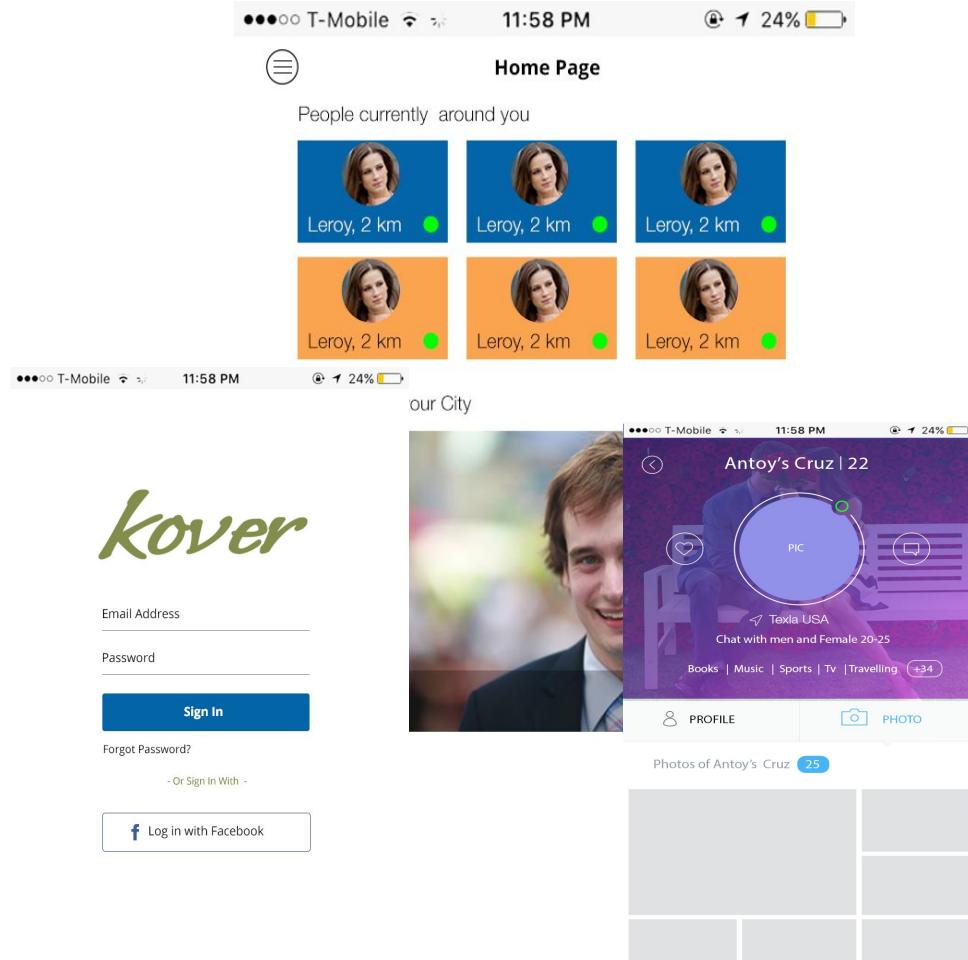

Kover (Blind Dating App)

The app with which you can really get to know a person inside. Blind Date will match you with a person close to look the same as you and you can meet you blind. But as we know that the physical is also an important aspect, after meeting you blindly, you can open your profiles or continue hearing the other person totally blind. It is your decision !!

Solution Highlights :

- Available as both paid and basic versions
- Login via Facebook
- Signup via Gmail
- GEO/GPS Location Tracking
- Payment Method Integration
- Different Searching Parameters
- Push Notification
- Admin Dashboard Support

Emergency Response Training

We have created an App which helps building staff and occupants reduce the confusion and calmly follow directions and emergency procedures. App is customized specifically to the user's building and allows for instant & easily accessible emergency information, anywhere & anytime.

Solutions Highlights:

- Integration with Google street maps
- Available on all leading mobile platforms
- Audio and Video player integration
- Websocket implementation for real time communication
- Bing map integration
- Available on Windows and BlackBerry platform

App store links :

OCR App

We have created an application which can be used for recovering misplaced items such as bank cards, driving license, student's ID cards etc. It avoids cost for issuing new cards. Person who finds such lost item can use this app to return it to owner.

Solutions Highlights:

- Geolocation integration
- Optical character recognition using ABBYY
- Camera Integration
- Third Party Web Services integration

The image displays three overlapping screenshots of the RecoverE application interface, which has a dark theme. The top screenshot shows the main menu with the RecoverE logo and the text "How can we help?". Below this is a "Item category" section with a dropdown menu labeled "Select an item category...". The middle screenshot shows a "License" form with input fields for "Driver Name", "State", and "License Number", followed by a red "Contact DMV" button. The bottom screenshot shows a "Contact Us" form with input fields for "Subject:" (containing "Card Scanner") and "Message:" (containing "I need an business card scanner functionality."), a red "Enter" button, and a red "Contact Us" button. Each screenshot has an "Advertisement Banner" placeholder at the bottom.

Wine Pairings & Cookbook Recipes

This app is used by Wine connoisseurs across California and has a consumer base of around 5000 users. This App provides consumers with the ability to expand their wine varietal knowledge base, review over 1,400 wine varietal, primary ingredient combinations and select the “Best” wine varietal for any given recipe

Solution Highlights:

- Available as both paid and basic versions
- Google Analytics
- Apple iAds for advertisements
- Push notifications using Pushwoosh
- Social Media integration
- Mobile Analytics

App store links :

Survey App

Application is used by sales people to conduct surveys during sales and promotional campaigns.

Solutions Highlights:

- REST webservice Integration with backend
- Ability to work in offline mode and sync data with server once online
- Push Notification Integraton

SportBox

Event Management

We have created an App for individual users to create events and invite other people to those events. Application included ability to create recurring events, event wall for connecting invitees, reminders etc. Application provides ability to manage data using admin panel and uses MySQL for central data storage

Solution Highlights:

- Integration with Phone address book
- Google maps
- WhatsApp style live chat on event wall
- Push notifications using Pushwoosh
- Social Media integration
- SMS using twilio
- Mobile Analytics

In coordination with our clients we turn ideas into products, which we design, develop, and release to market in a manner that balances business need and customer experience.

Secrets of Our Success

Cultural Excellence

- Customer delight
- Pursuit of excellence
- Leadership by example
- Integrity & transparency
- Mutual respect

Technology Excellence

- Always at the frontier of technology progression
- Thirst for all things technical
- Passion to find and implement the “Right” solution

Human Resource Excellence

- Our people are passionate about their work
- Our people are happy

Process Excellence

- Standardization
- Continuous Improvement
- Tailored
- Rigor in implementation

Mobile Capabilities

- Roadmap
- Requirements Definition
- Platform Decision
- Research/Prototyping/MVP

Mobile Strategy

- Native and Hybrid Apps
- UI/UX Design
- Consumer Marketing
- Utility Social Commerce
- Specialty/Transaction
- IoT – Data collection, Algorithms

Mobile Applications

- Specialty/Transaction
- Site Optimization

Mobile Responsive Web

- User Acquisition/Attribution
- UX Analysis
- Monetization

Mobile Analytics

Mobile Technology Options

| | | |
|-----------------------------------|---|--|
| Hybrid App | Write once, run everywhere (platform-agnostic). | Support multiple platforms with one app. |
| Native App | Device and platform specific; resource and price-intensive to maintain. | Best performing app; Good for captive audience (e.g. in-store fixture, In-house company apps). |
| Enterprise Mobile Platform | Client-facing apps that connect to enterprise servers (e.g. Transaction mgmt.); cloud support, hosting services and analytics often included in infrastructure. | Good for global companies rolling out to thousands of employees/associates. |

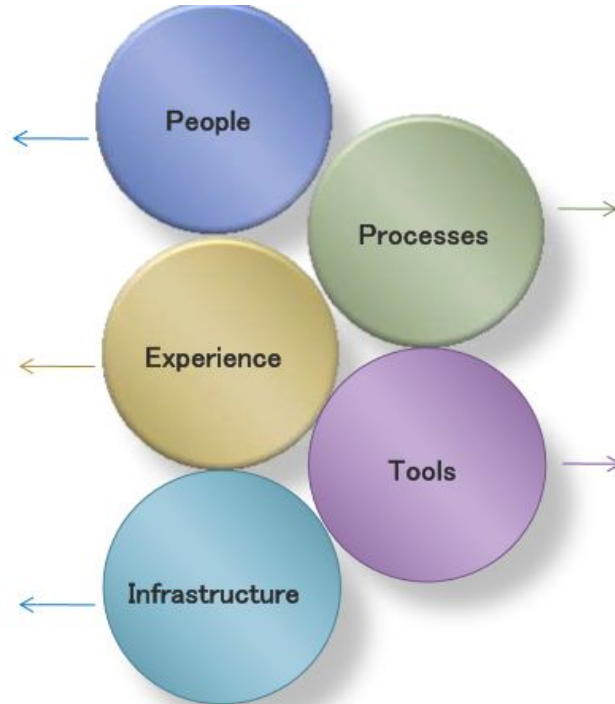

Testing Methodology

Webuters Technologies offers complete package for web testing thus enabling clients to reduce time to market and enhance customer experience.

- Pool of experienced web testing Resources
- Web testing SME's

- Vast experience of handling web projects for multiple clients

- Cloud based Infra on EC2, Rackspace Azure etc.
- Devices available at multiple locations.

- Well defined Web Testing processes.
- Web testing Framework. (A set of artifacts for easy project leverage)

- Association with External Vendors(HP, IBM etc.)
- Open Source Tools

THANK YOU
