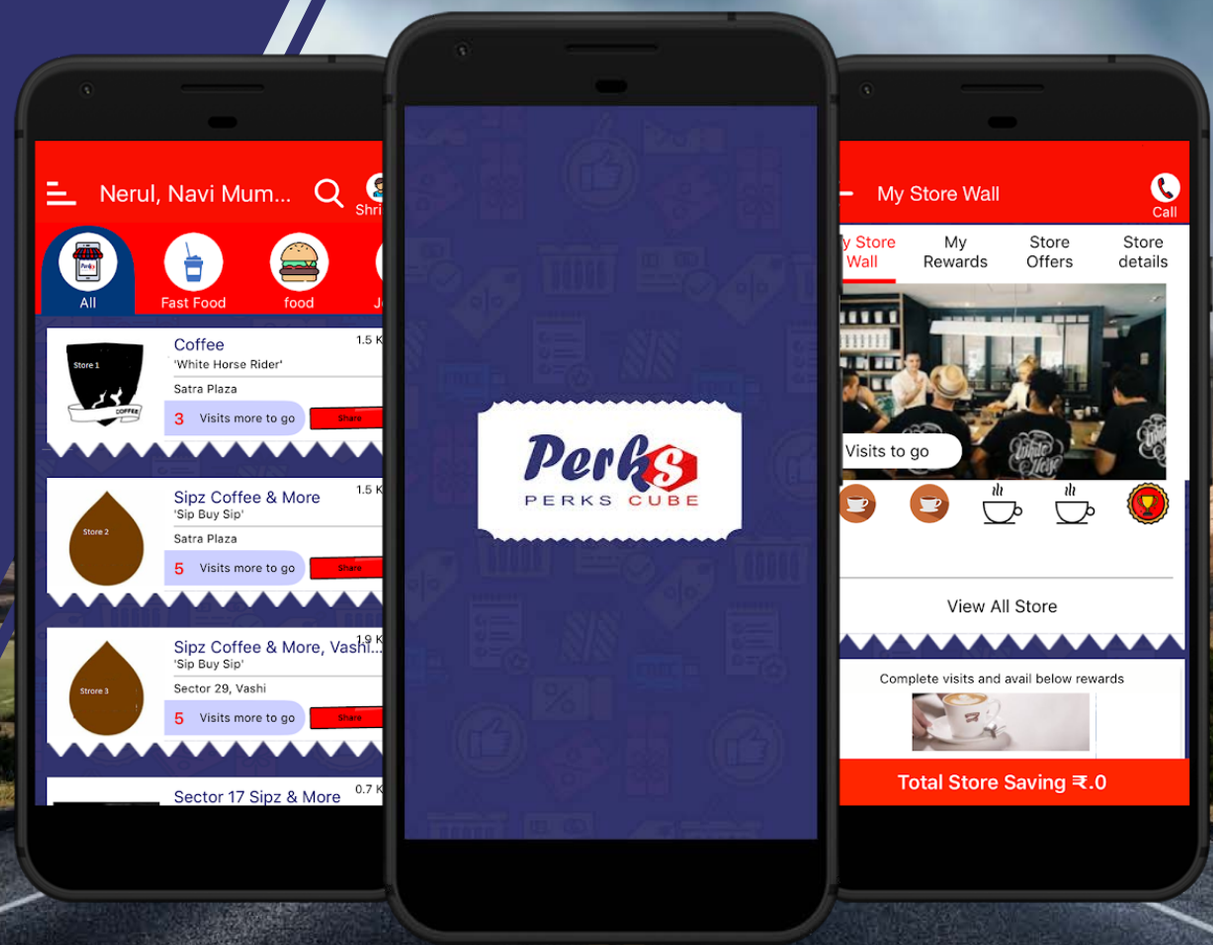
Innowrap designed and developed Perks cube App to let you stamp every visit you make at a local store and earn you a reward.

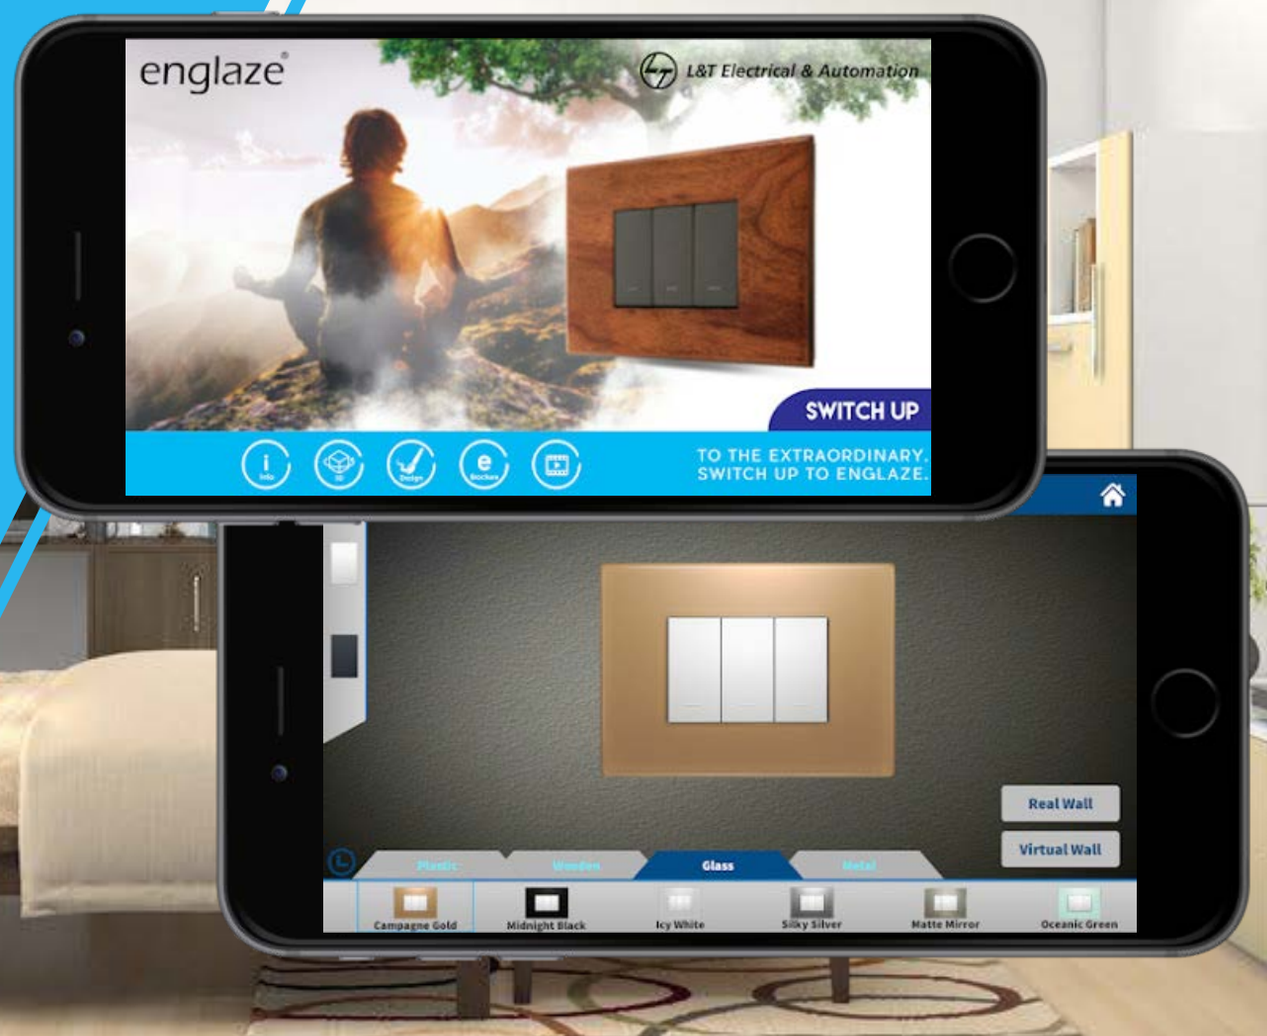
Services Rendered

- UI/UX designing
- Android Development
- IOS development
- Web development
- Testing & Deployment



Larsen & Toubro

There is an option to view the products in 3D wall and see how it looks on the wall. You can turn it around by touching the screen of the phone or tablet and view it from all sides (180 degree rotation).
Make your Own Switch where User can select the textures/colors of the plate and the switches and customize his own switchboard with changing colors of plates and button of 3m model.
You can also select the wall color from the virtual color pallet available to see on which wall color the switchboard suits the best. The user can then save the image of the wall with the customized switch board and he can either email it to himself



ZoopCall

Zoop Call is a tele-calling facility made to support sales operations by providing services like creating campaigns, auto-dialers, reporting, custom disposition etc.

Innowrap Technologies helped Zoop call expand their operations by scaling their existing product to other call centers via a SaaS medium.
