Optimise Health Case Study

The Optimise Health app offers a range of services to assist us in everyday journey towards a better life and improve our health through it's pre defined categorised, wide variety of health tests, wellness programs, intravenous (IV) infusions, tailored expert advice, and a health e-store, all available and bookable various problems specific packages

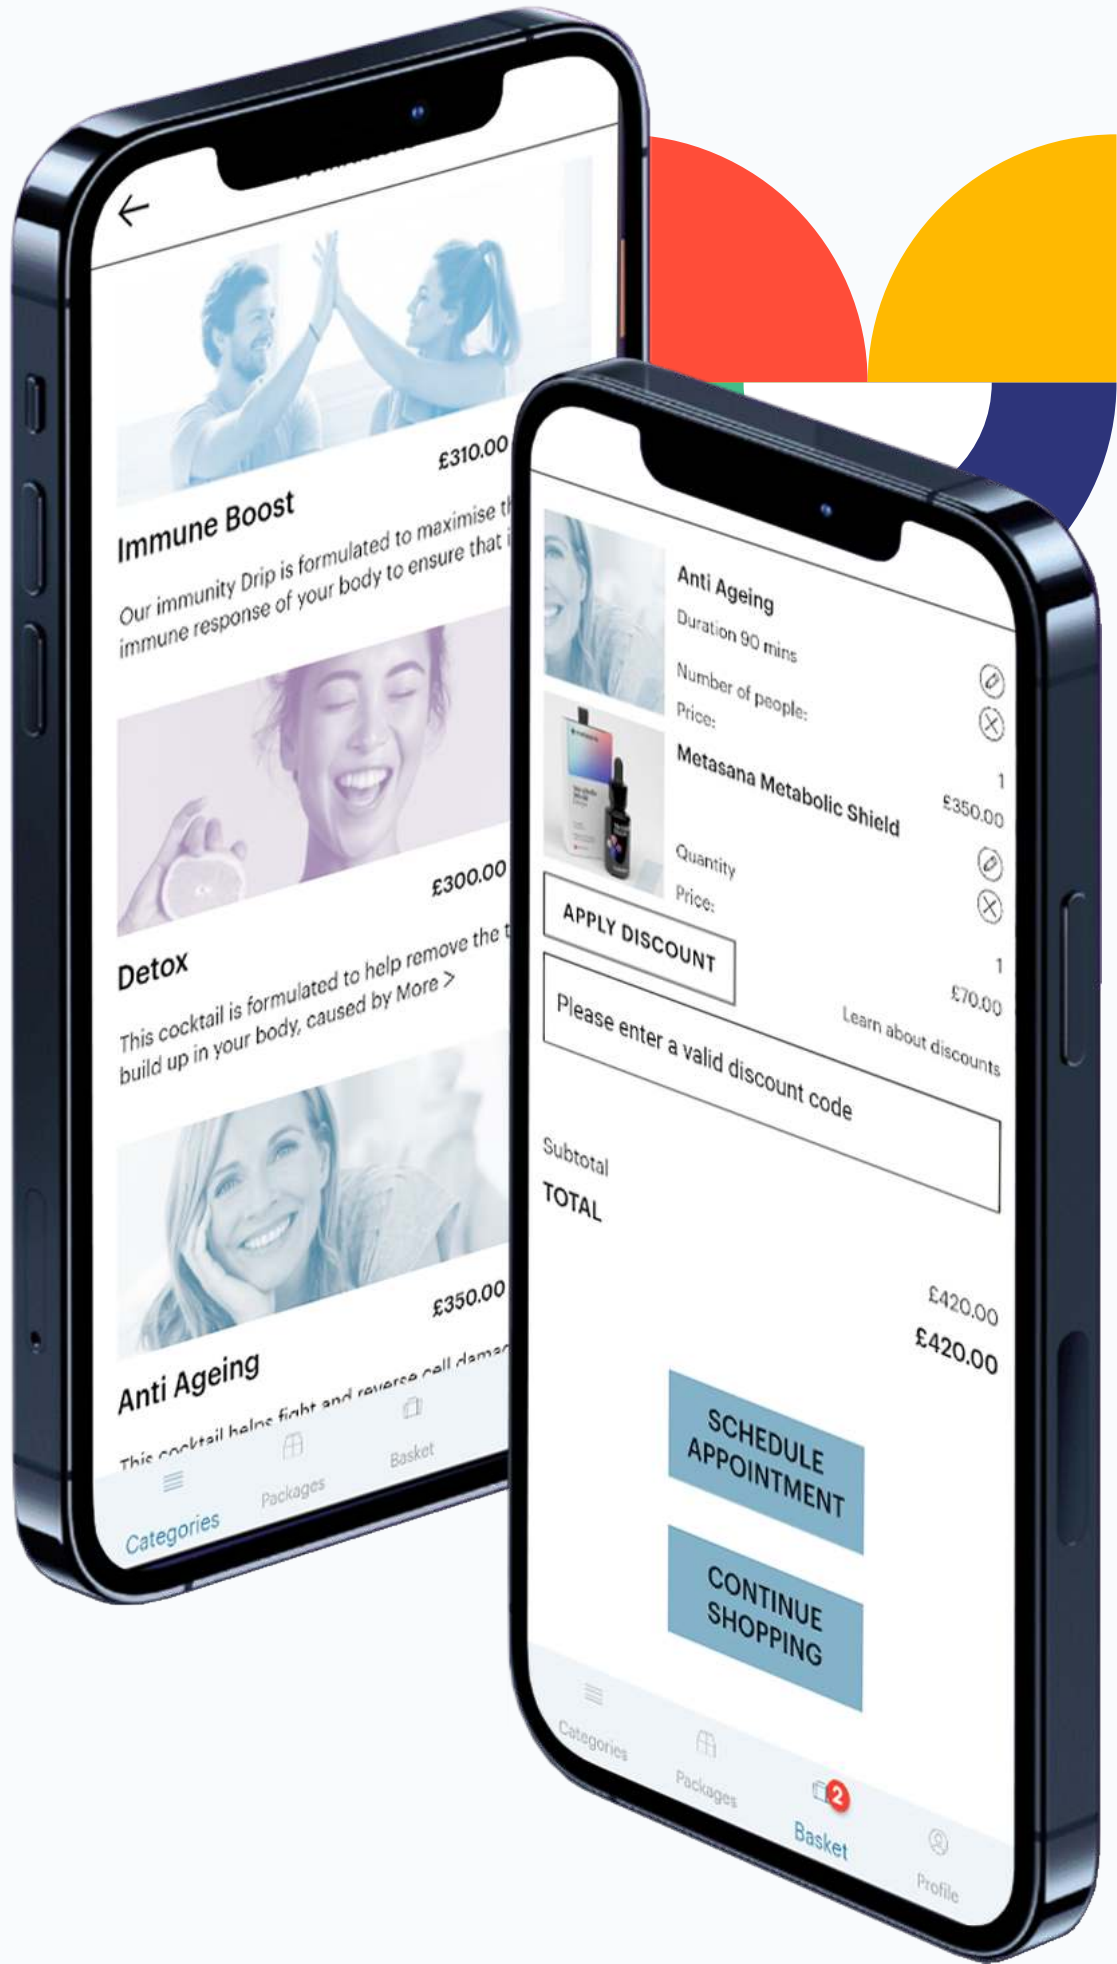

SOLUTIONS

Upgrade flutter sdk and made this compatible for all the supported devices

ACHIEVEMENTS

1. Successfully implemented decent animations in the user interface (UI) that made this app more attractive.
2. Worked on the app's main memory leaks and app size as result we are able to manage the app size as minimum as possible.

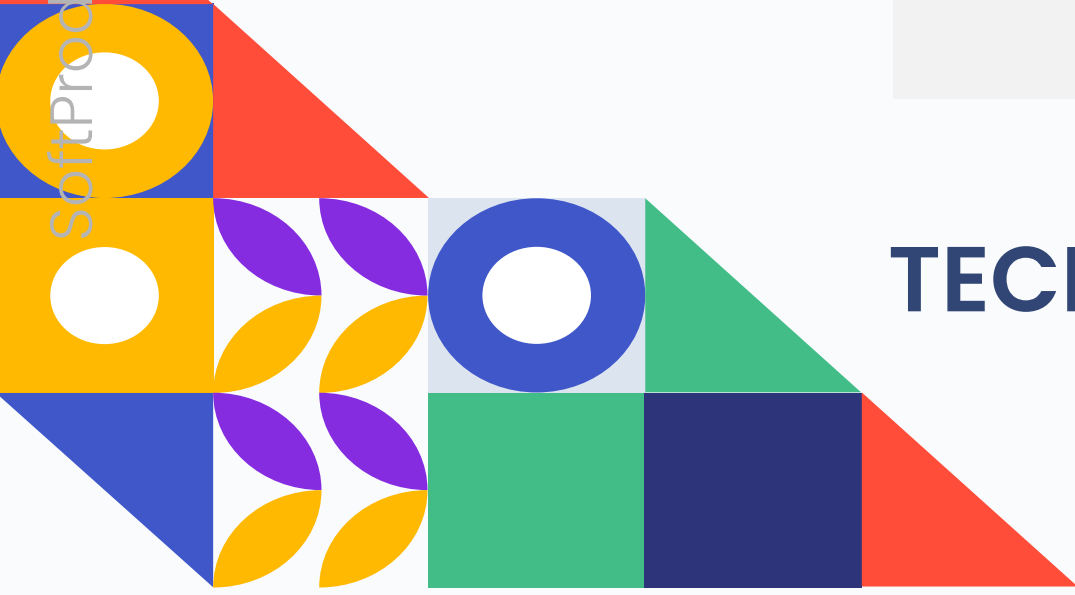

TECHNOLOGY

Firebase

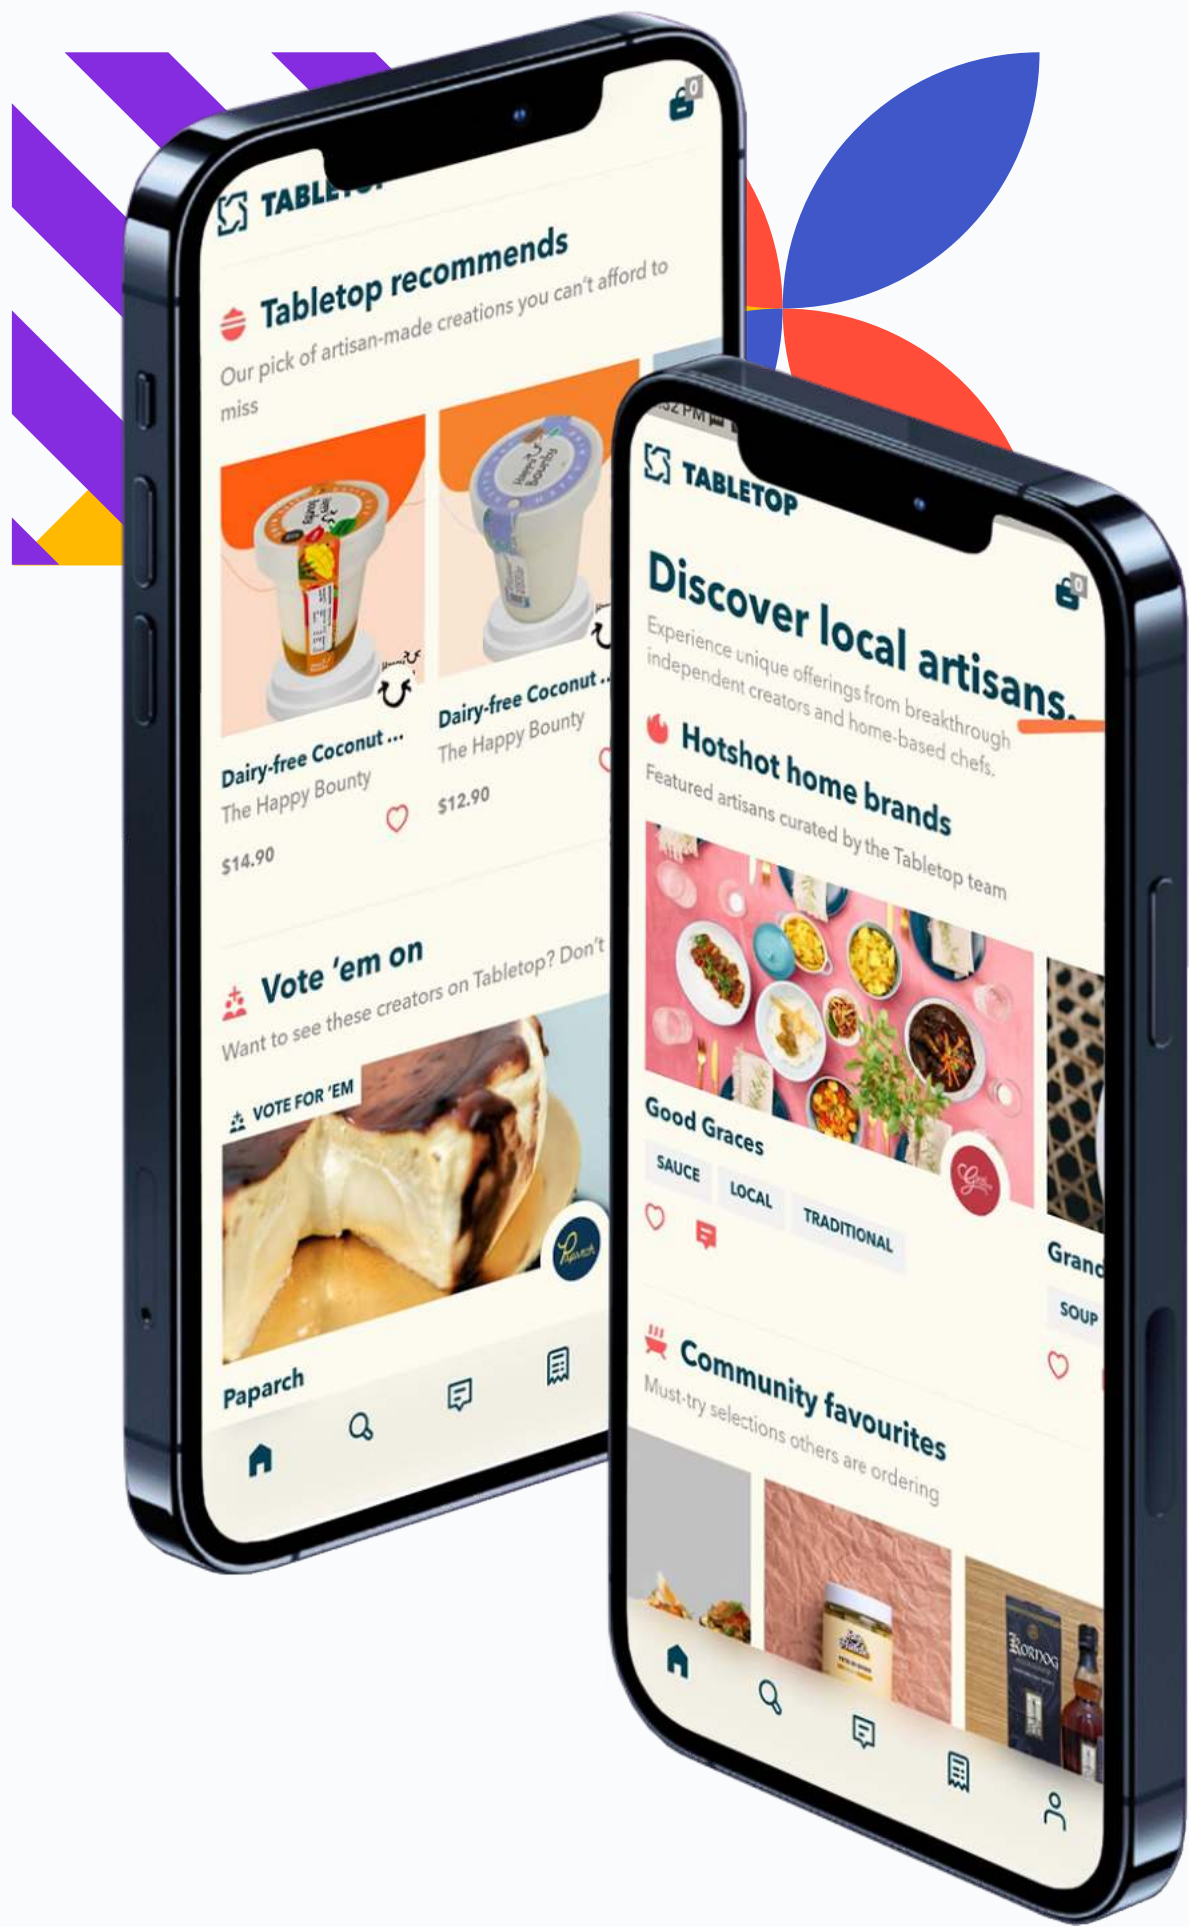

Table Top Case Study

TableTop is the On-demand food services platform for the end-users where they can easily order food from fine restaurants, restaurant chiefs or any other chef, for making it more user-friendly the user can easily connect with them its support staff via text or voice message.

SOLUTIONS

Used Flutter Chat UI
Flame Engine and
upgraded the flutter
SDK

ACHIEVEMENTS

- 1. App response is very fast, the user gets a very good experience in getting real-time notifications, text messages and voice call requests.
- 2. The app gets updated with the new data every week without interrupting its performance.

TECHNOLOGY

Google Analytics

Firebase

Arabica Case Study

The Arabica app is the solution to skip the queue for your favourite food from your favourite restaurants, the user can search nearby restaurants and browse their menu to order and self-pick it up or deliver in the car on their way.

SOLUTIONS

We've done the Japanese number conversation by our own code and for the Arabic we have provided solution with the help of Library.

We have used the library to track the user's current location from the destination location and change the status of arriving.

ACHIEVEMENTS

- 1. In-app support from all the available countries and outlets worked good enough and the whole ecosystem of the app works brilliantly when the user changes the places.
- 2. Through our custom code, we are able to convert the normal text into different-different languages successfully.
- 3. 1000+ downloads and the numbers are still counting

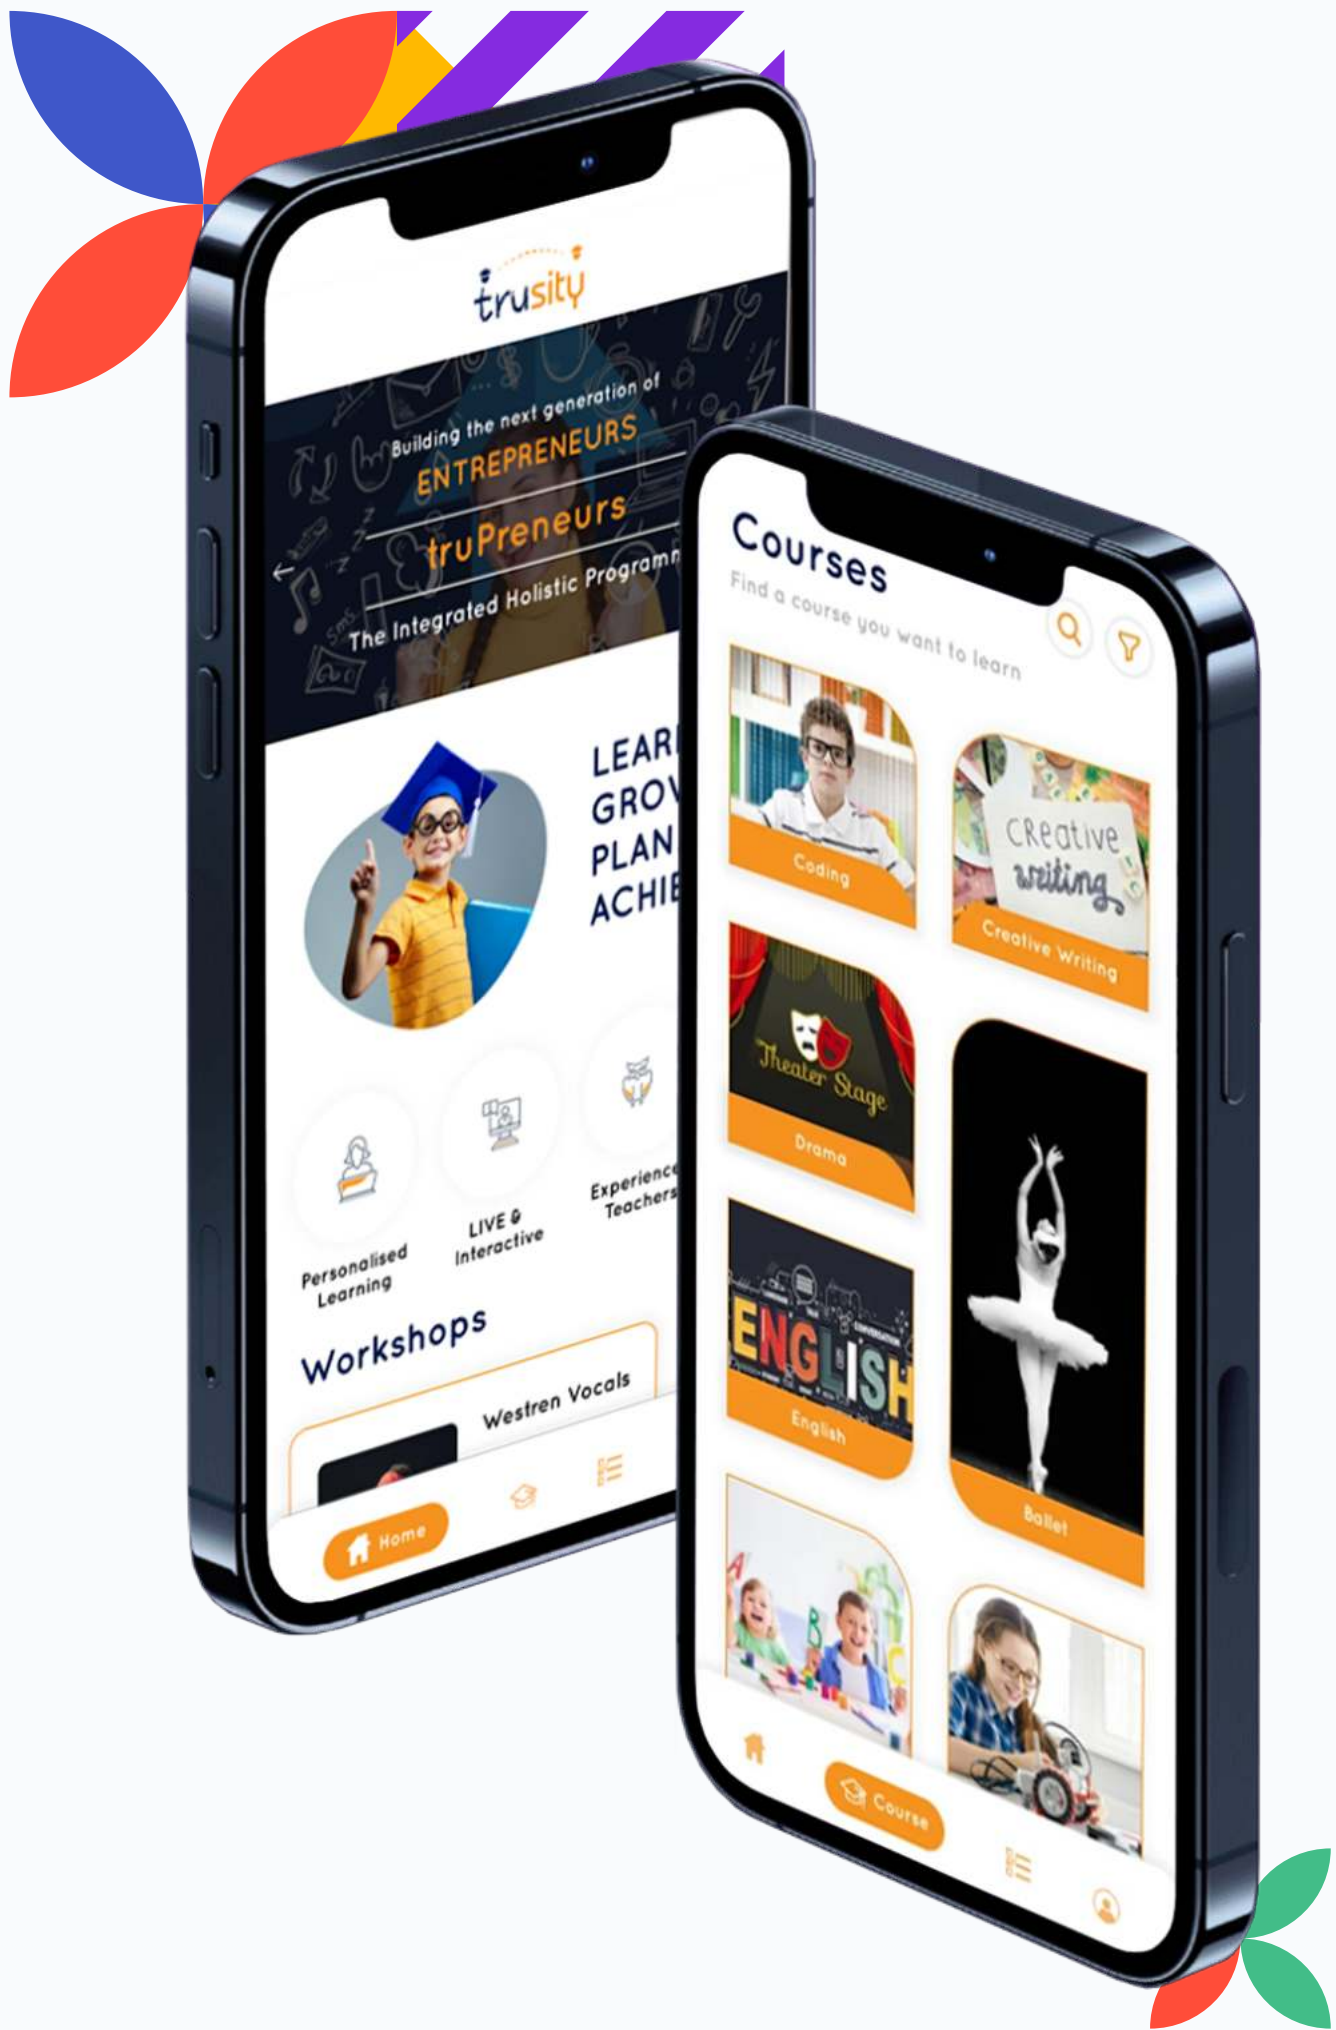

TECHNOLOGY

Trusity Case Study

Trusity is an app that allows children to learn digitally and give various tests based on their curriculums and grades, they can also avail of the free demo sessions if they wish to go for any specific course like IIT JEE, Mandarin, Accounts etc.

SOLUTIONS

We suggested setting up a staging server for testing deploy the code locally so that it can be accessed anytime.

ACHIEVEMENTS

1. Having a good amount of data, somehow we managed to keep the design very attractive and eye catchy for the children to make their experience pleasant. The user experience of this app is quite friendly and easy to use because of well-managed data.
2. The accuracy of this app in tests and quizzes works really well once the user submits them.

TECHNOLOGY

AWS Amplify

Amazon Cognito

stream

Firebase

Meal ID Case Study

The Meal ID is a platform where the end users can generate meal plans by providing the right amount of information about their physical body condition, goals, macros and diet type, the end user can also swap their meals according to their needs.

SOLUTIONS

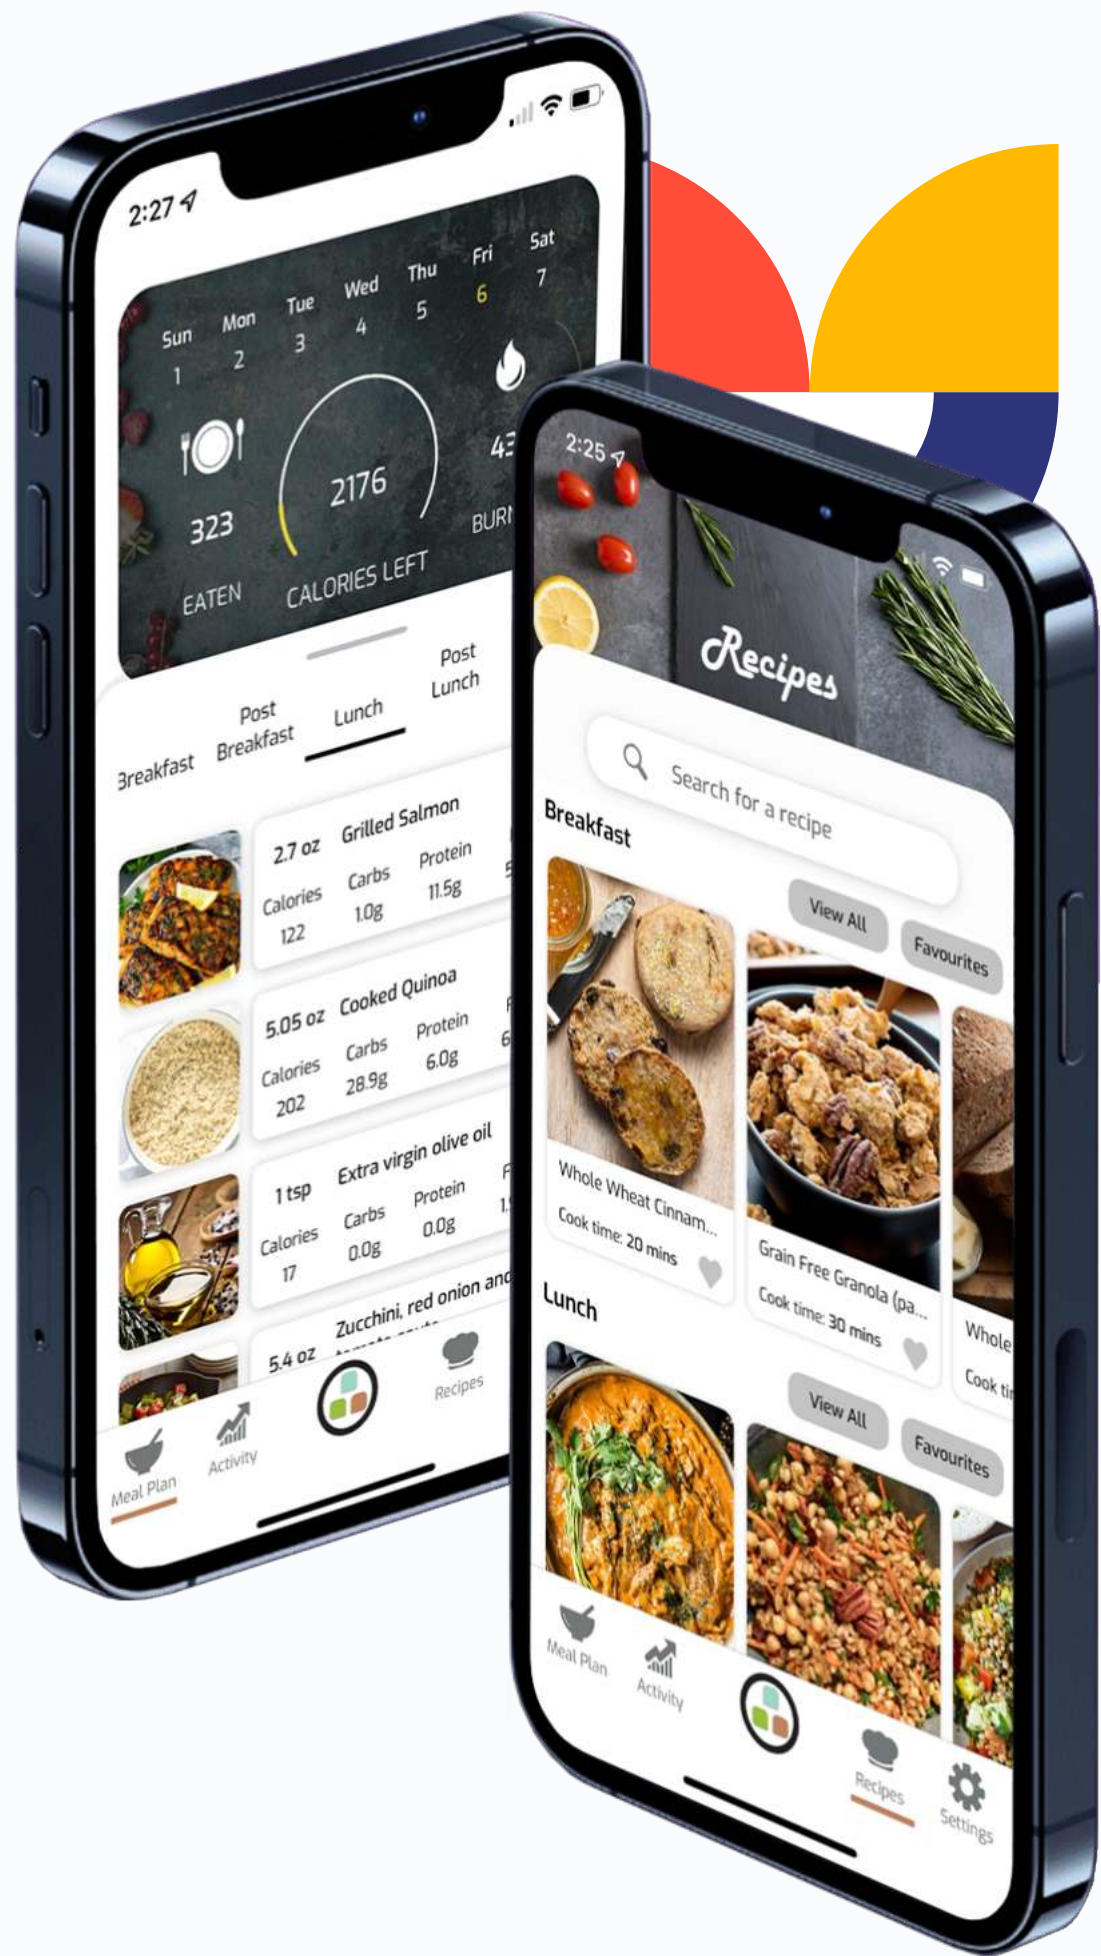

Manage content offsets for handling UI

Implemented fetcher functions to fetch health data from apple's health kit

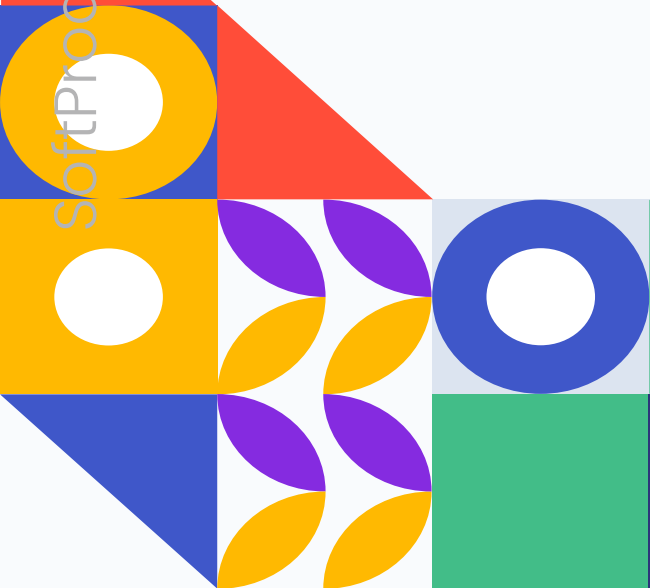

Created promotion offers in-app store

ACHIEVEMENTS

1. Tried to do custom code as much as possible to reduce the dependency on the 3rd parties API as result, the app is working pretty well.
2. Users get more accurate physical data and can compare the transformation through the in-app collage feature to post over social

TECHNOLOGY

Testimonial

Felicity George

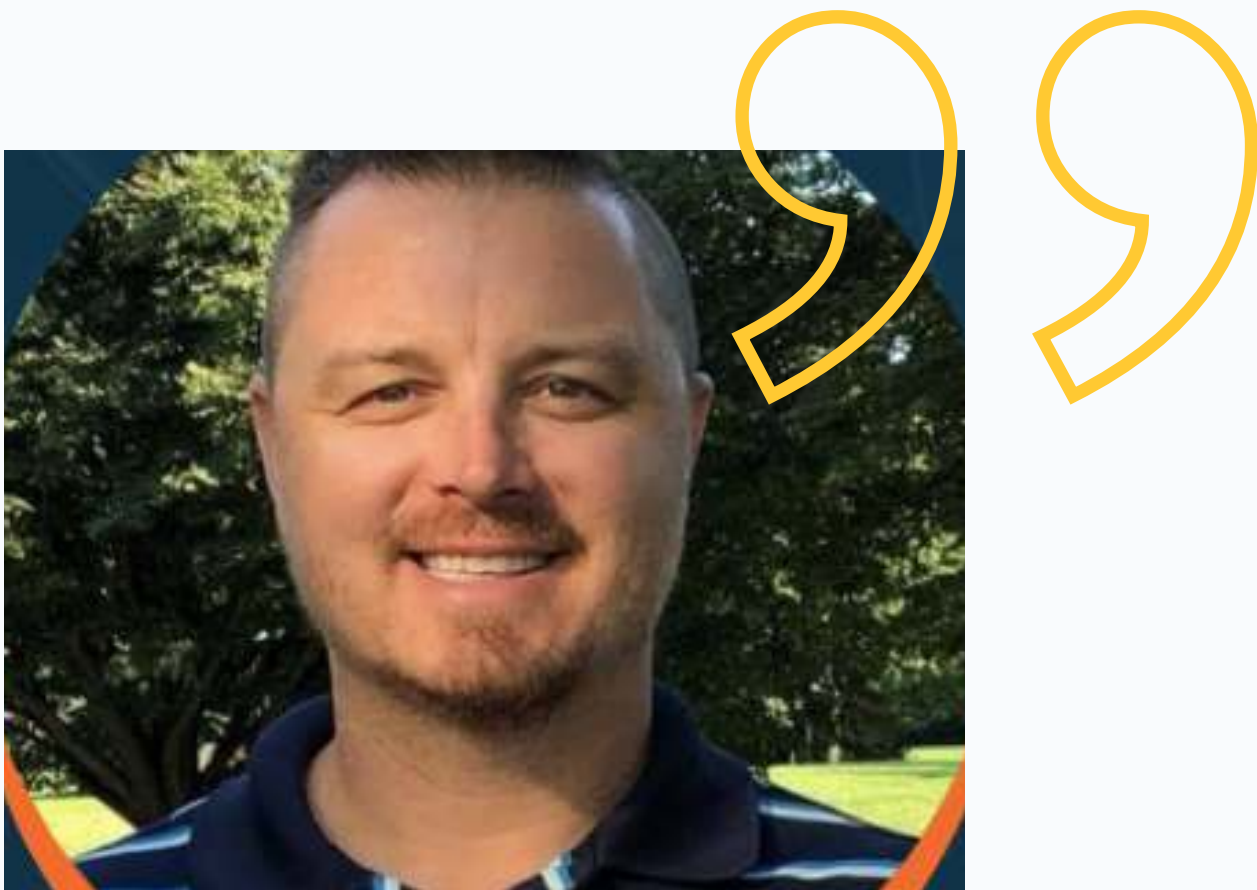

SoftProdigy has been a critical provider in our efforts to reengineer our outdated Ruby/Merb application to Ruby/Rails/Angular. They have been instrumental in assisting with shaping our efforts to take advantage of the newer technologies while minimizing the risk of complexity.

Ryan

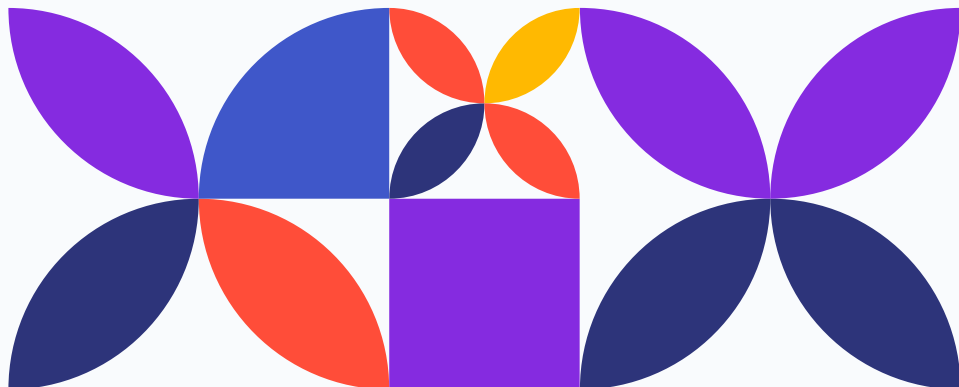

The team at SoftProdigy has played a critical role in the development of our analytics platform. Our work with them is based on a strong partnership, far more valuable than a traditional offshore development relationship. Their work is of an exceptionally high standard and the whole team regularly goes the extra mile to support our business. Whatever the challenge, be it technical or operational, SoftProdigy have always delivered on time and on budget.

Trevor Waddington

I have the utmost trust in what they do and what they deliver. Highlights of working with SoftProdigy are their customer service and overall honesty as a team of developers. They are more interested in delivering quality work that exceeds expectations rather than charging more if features are added or requirements change.

SoftProdigy®
