Let`s do IT togehter

150 times a day people check their phone notifications

[CHECK THE MOBILE SOLUTION WHICH WORKS FOR YOU. WE WILL DO THE REST]

	Native app	Cross-Platform app	Mobile website
Quality of UI	★ ★ ★	★	★
Ability to explore all OS features	★ ★ ★	★	—
Access to smartphones' hardware	★ ★ ★	★ ★	—
Performance	★ ★ ★	★ ★	★
UX (Following Google's, Apple's design guidelines/patterns)	★ ★ ★	★	★
Ability to upload apps to PlayMarket, AppStore	★ ★ ★	★ ★ ★	—
Development speed	★	★ ★	★ ★ ★
Multi platfom ability	—	★	★ ★

We suggest to choose Cross-Platform Development for Apps with limited functionality and fixed budget. However, if the application is based on Enterprise Architecture and if you want to create app with rich user interface and/or heavy graphics, then go with Native Application Development.
