# DELIVERY MODELS

With the finest combination of next-generation methodologies, leading procedures and highly skilled people, the delivery excellence and agility are at the core of operations for Exioms. This enables us to form and deliver appropriate solutions while reducing the time and cost.

# ENGAGEMENT MODEL

Aligned in line with industry expectations, Exioms have a wide range of models designed for various services and solutions that we offer. These have been formulated through years of experience in the industry, thus ensuring quality performance, high functionality and exceptional efficiency.

## FIXED

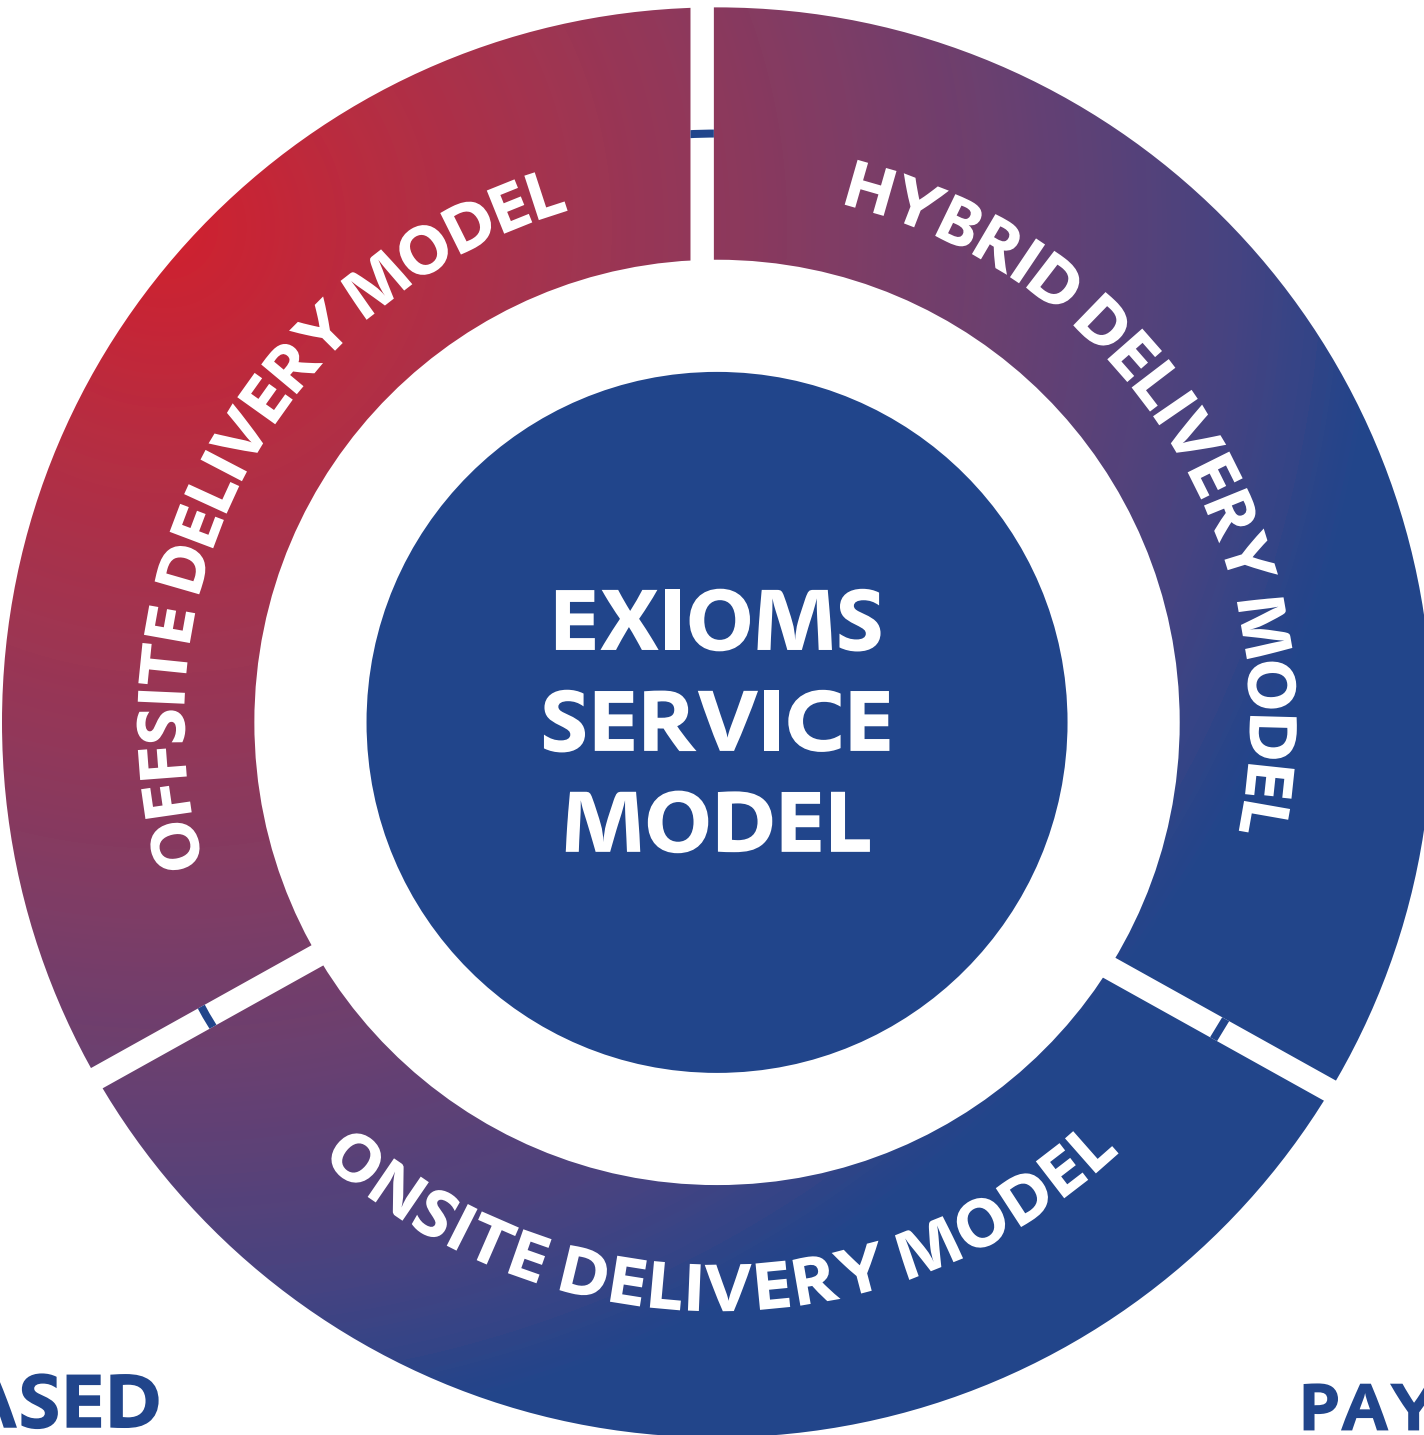

Under this model, we help you to reap maximum benefit by predefining the project plan, deciding its priorities and laying out a detailed execution strategy.

## BOT

The model allows the complete establishment of an offshore subsidiary, gaining the client with a greater management control.

## RESOURCE BASED

Creating a managerial control, skilled professionals are hired as per the client requirements to accomplish the project.

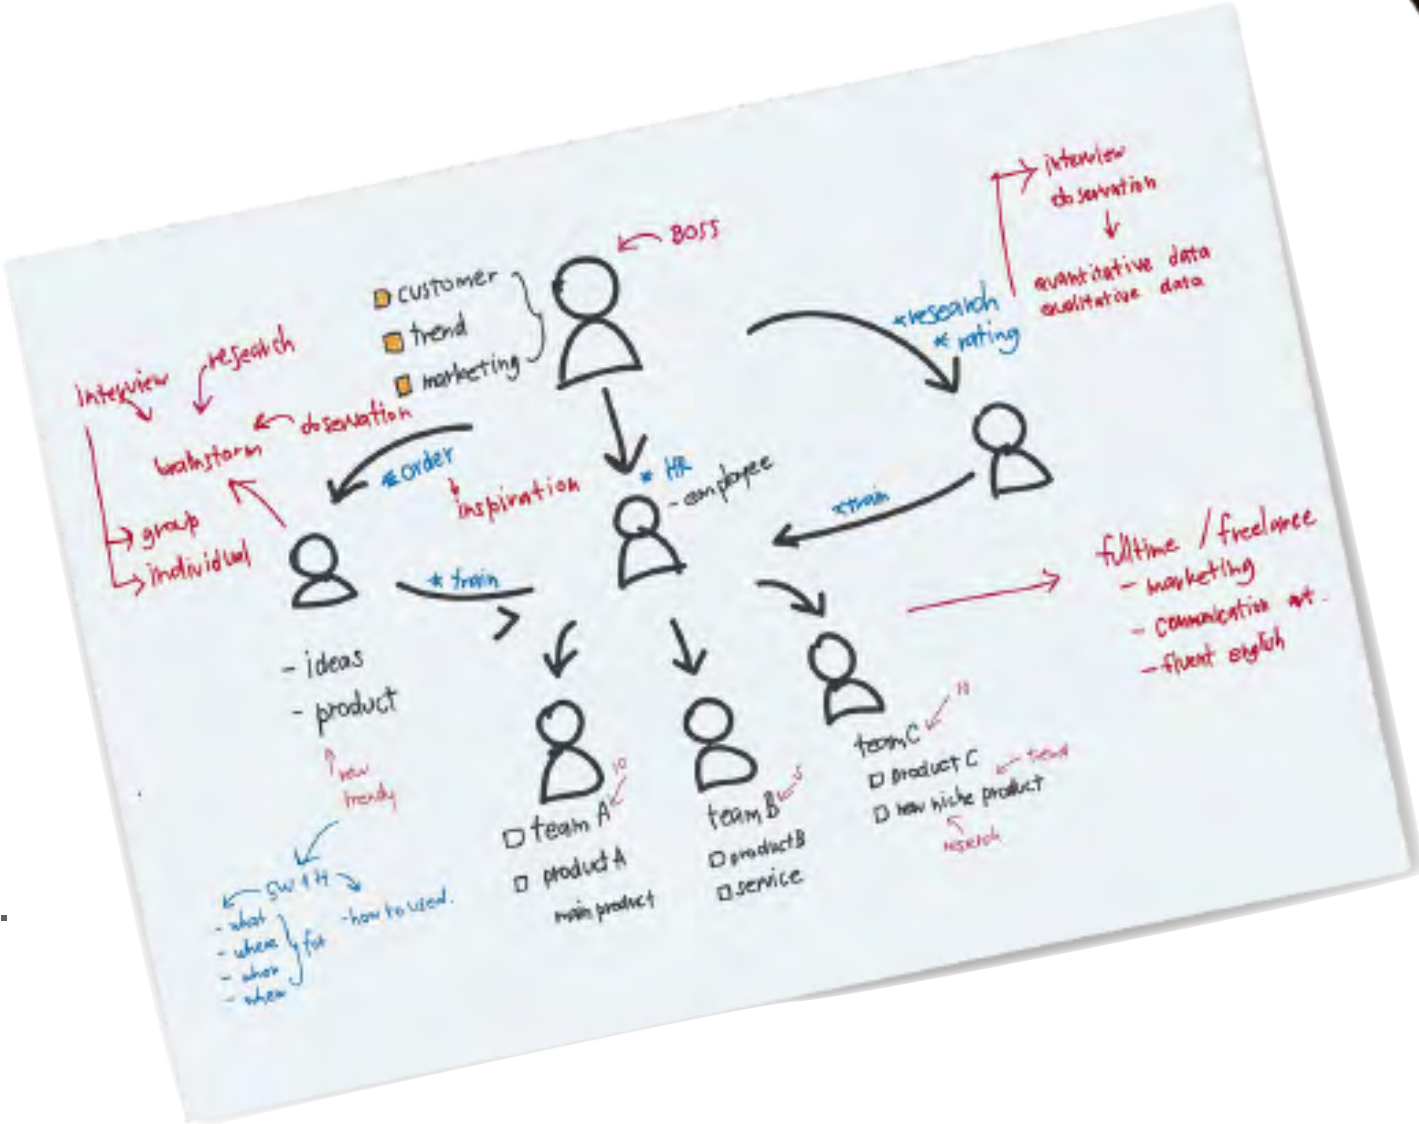

## TIME & MATERIAL

Clients can take control over the development progress and cost in this model, instead of facing additional overpriced changes.

## HYBRID

A combination of both onsite and offshore, this delivery model enhances great efficiency and optimizes the cost of project development.

## PAY-AS-YOU-GO

On this usage-based model there are no wasted resources, since clients only pay for the services that procured.

# CUSTOMER STORIES

Together with our customers, we create stories. Around 500+ leading companies from all industries have benefited from Exioms to streamline work, make teams stronger and grow more productive. The real-world examples illustrates how Exioms has risen to the toughest challenges, ensured business success and supported scientific endeavour worldwide.

A ticket resolution system was built to maintain reports for resolving issues raised by their IT and SAP departments and its different modules.

To relieve users by sharing the status, a custom-solution app was designed to notify bank with the request for currency exchange.

The API based technology designed has abled to launch the WTI mobile application along with the one-click booking system on web.

Along with the CRM solution, a field-force tracking system was designed for the on-field employees with the help of geo-location technology.

A complete media solution was delivered to launch the USA brand in India. It included from developing brand-identity system to logo design.
