Sample Work

Smart Door Lock and Door Bell

Smart device that allows apartment owners to see in real time who is requesting to visit them, be it a friend or a delivery man. Real-time alerts, HD video and two-way audio makes it easy to answer your door from anywhere through the smartphone app. The device also allows you to control the front door without the traditional mechanical keys. It allows keyless, remote or fingerprint-secured entry to family members, friends, housekeepers and others without worrying about lost or copied keys.

Technologies:

Node.js, Angular 2, Objective-C, Android SDK
