## Representative Projects

### London Taxi App

**Project Duration:** 5 Months

**Project Description:** This is a popular Cab Booking Application developed on iPhone & Android, for London.

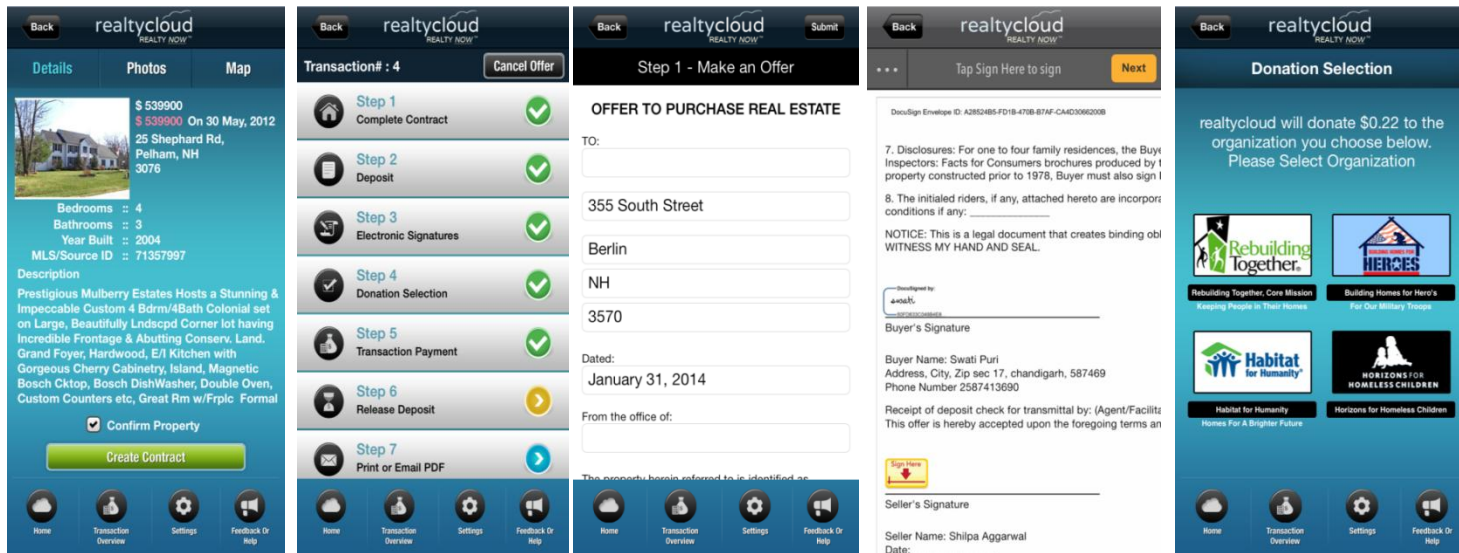

- Helps to find & book a Cab service near current location
- Adds favorite locations/ journeys/ addresses/ Cab Service
- Adding quotes for a location
- Find recently used companies

**Technology:** Core Java, Sqlite, XML, Objective C, CoreData, Web Services

**URL:** [https://market.android.com/details?id=com.ubicabs&feature=search\\_result](https://market.android.com/details?id=com.ubicabs&feature=search_result)

## Realty Cloud

### Project Duration: 1 year

**Project Description:** Realty Cloud is a mobile based application for buyers/sellers (Property Owners/Builders/Real Estate Agents/individual property owners/ landlords) which aims at buying and selling of property undertaking all listings, agreements and payments(to be done through electronic signatures), donations. Registered users would be able to make a purchase and sale agreement, fix a property deal and generate donations for various other organizations.

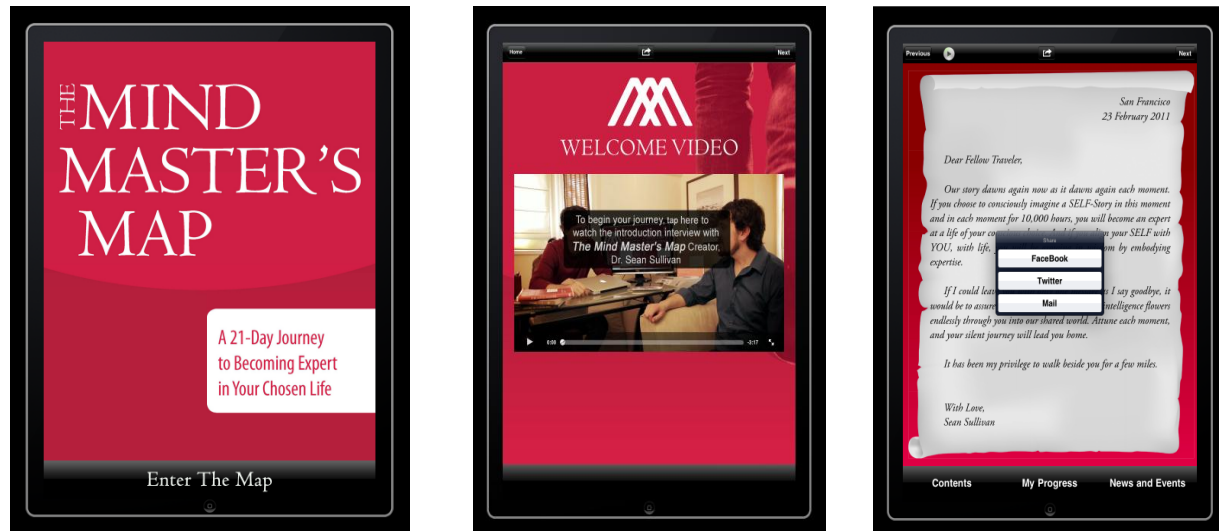

This application will have three types of users; Admin, Seller/Buyer, and Attorney. The users of the site will be able to access the features of the site as per their respective roles. Main features of the application are:

- Property Search from MLS data
- Offer to Purchase Real Estate
- Escrow Payments using PayPal
- Electronic Signature using DocuSign
- Donations
- Print/Email PDF of Offer form

**Technology:** Objective C, PayPal, DocuSign, TBXML, MLS

---

## The Mind Master's Map

**Project Duration:** 4 Months

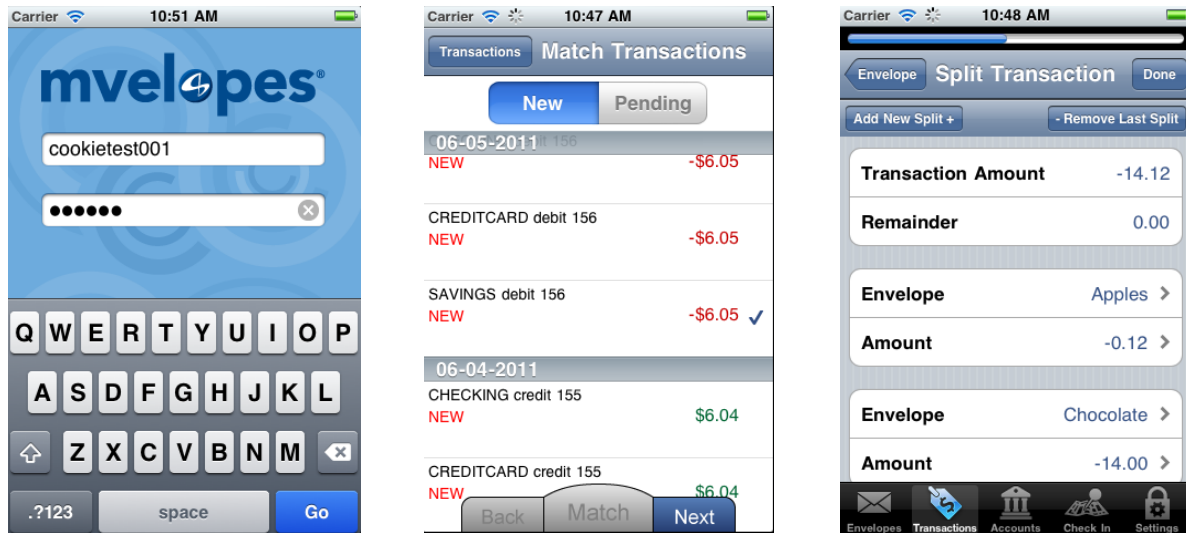

**Project Description:** The Mind Master's Map is a MULTIMEDIA MAP application with multimedia rich e-book. The book intends to make you best version of yourself and is created by Harvard educated psychologist Dr. Sean Sullivan. Its features are –

- Receive your personal “My Mind Map” packet when you complete The Mind Master Challenges (Your “My Mind Map” packet contains the map of your mind that you create by completing The Map!).
- Share your thoughts with friends.
- Watch an exclusive interview introduction with The Map’s creator
- Enjoy The Mind Master soundtrack as hidden treasures spread throughout The Map
- Start Your 21-Days to Becoming the Best Version of Your Self

**URL:** <http://itunes.apple.com/us/app/the-mind-masters-map/id441043981?ls=1&mt=8>

---

## Mvelopes

**Project Duration:** 6 months

**Project Description:** Mvelopes is a budgeting Application, which allows you real-time access to your Mvelopes account at [www.mvelopes.com](http://www.mvelopes.com), and does your budgeting on your iPhone /Android Phone. You can enter expenses, view envelope balances, and assign transactions in real time. Everything you do automatically updates your Mvelopes.com account. Some of the features are –

- Complete & real-time synchronization with the Mvelopes web app.
- Access, add, or change financial data while on the go.
- Simultaneous access to account information by multiple users.
- Take pictures of receipts /supporting documents and attach them to transactions for documentation.
- Use location-based features to “check in” to nearby locations, allowing Mvelopes to know balances.

**Technology:** Objective C, SQLite 3, Eclipse, Java

**URL:** <http://itunes.apple.com/us/app/mvelopes/id417933753?mt=8>

---

## LRG Mobile wallet

**Project Duration:** 9-10 Months

**Project Description:** The LRG Mobile Wallet. Secure, convenient, and FREE, the LRG Mobile Wallet is the easiest way to access your LRG Debit Rewards MasterCard® account anytime, anywhere. Mobile wallet users receive:

### EASY ACCOUNT MANAGEMENT

- View your transaction history, check your balance, and find ATM or cash reload locations near you—all in real-time.
- Send cash to a friend or family member instantly with our 'SHARE FUNDS' feature.

### SHOPPING

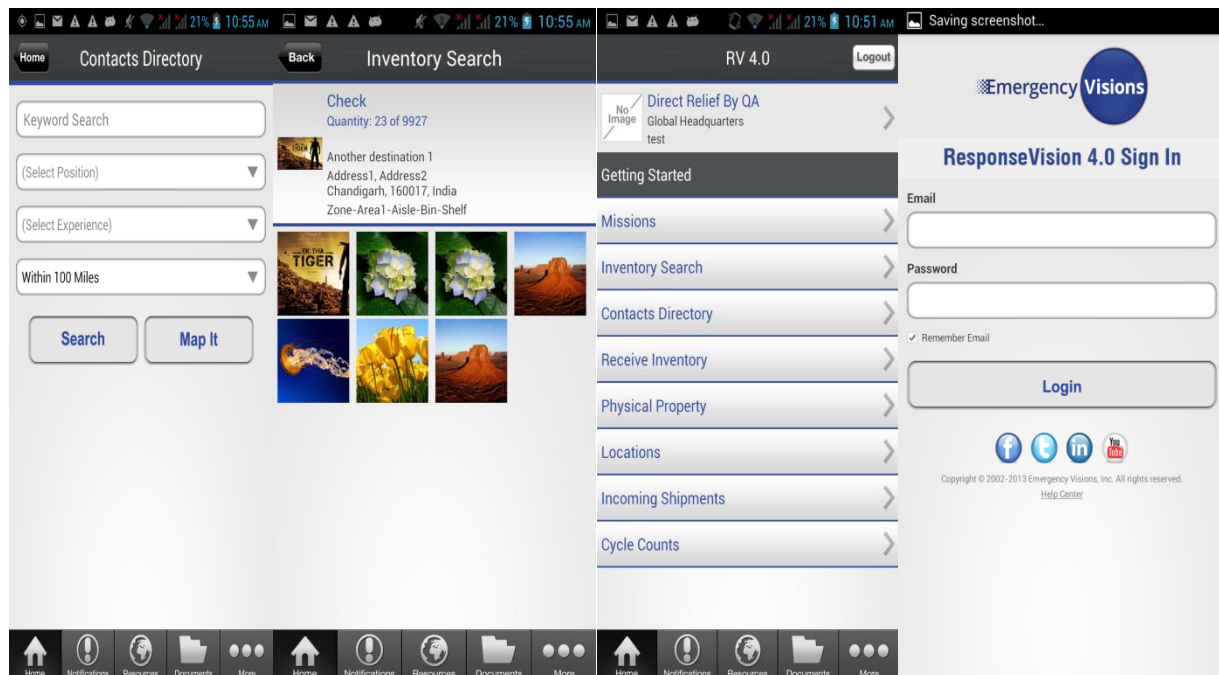

- Use your LRG Card and personalized Promo code at checkout to receive an exclusive 20% OFF discount on [www.shop.L-R-G.com](http://www.shop.L-R-G.com).

Website: <https://www.lrgmastercard.com/>

**Technology:** Objective C, SQLite 3, Eclipse, Java

**URL:** <https://itunes.apple.com/us/app/lrg-mobile-wallet-app/id592884995?mt=8>

## Response Vision

**Project Duration:** 6 months

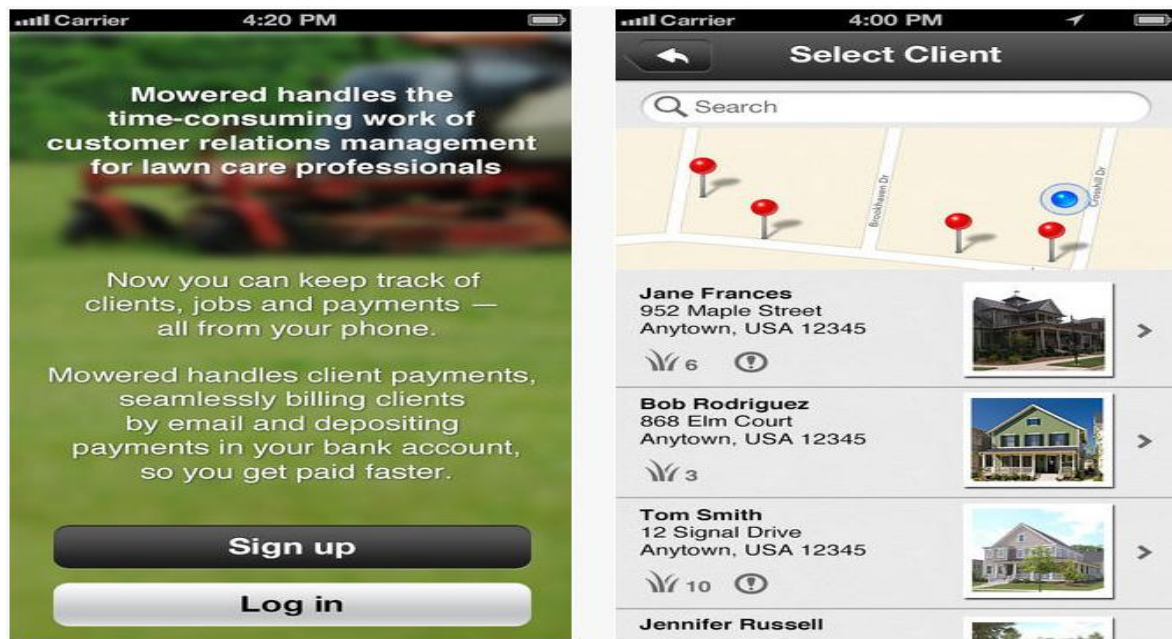

**Project Description:** This project is a SAAS based application which will provide a broad and easy to use solution to manage Emergency Response logistics. The application is a Disaster Resource Management (DRM) solution that empowers you to prepare for, respond to, and recover from catastrophic events and to improve the coordination of people and resource on a daily basis. The application is supports web & mobile (ios, android & windows).

**Technology:** Xcode, Objective C, MVC, iOS, MAC OS X

**App Link:** <https://itunes.apple.com/us/app/responsevision-4.0-mobile/id687682051?mt=8>

---

## Mowered

**Project Duration:** 6 Months

**Project Description:** Mowered is the easiest way for lawn care professionals to handle customer relations management and billing from their iPhone. Mowered stores your lawn care client information and allows you to send electronic bills directly from the job site. Your clients pay online by credit card and the payments are automatically deposited into your bank account. Mowered ends the money chase, allowing you to focus on what's important.

Mowered is a great solution for lawn mowing businesses, landscapers, tree services businesses, weed control businesses, pest control businesses and others that need the flexibility to send client bills and process payments electronically.

**Technology:** Objective C, SQLite 3, Eclipse, Java

**URL:** <https://itunes.apple.com/us/app/mowered/id687727466?ls=1&mt=8>

---

## Alive wallpaper

**Project Duration:** 6 Months

**Project Description:** Inspiring video wallpapers that won't drain your battery or slow your device. Alive saves to the SD card to prevent memory problems. Half the scenes are free. Buying the rest helps us release more :) USE

User play the game with the following controls:

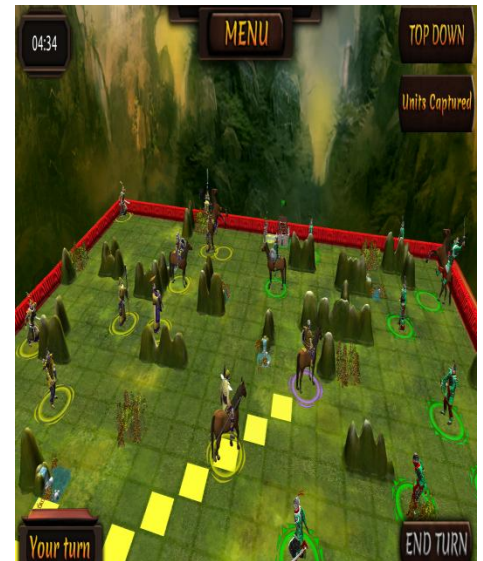

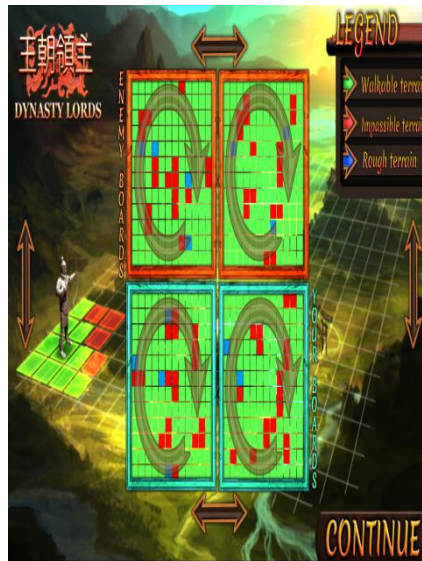

- Touch screen
- Accelerometer
- Buttons Features

**Technology:** Unity3D.

**URL:** Not Live Yet

---

## Dynasty Lords

**Duration** – 3 months

### Description-

The game is based on the old Avalon Hill game **Feudal**. The game however will be set in ancient China sometime between the Han to Tang dynasties. Two emperors are vying for supremacy over the land.

The game board is of dimensions 24 x 24 consisting of four 12 x 12 panels. Two options are available. One will have standard fixed mountainous and rough terrain and the other will have randomly generated terrain. Setup will remain hidden as in the Feudal rules. Two views would be available. One is a “classical” two dimensional view of the whole game board with players scrolling and zooming into and out of chosen areas. It would be akin to what the player would see was he/she playing the game on a physical game board. The pieces for this view could simply be 2D. The other is a three dimensional view like that seen in the picture below. The players could pan over the 3D game map with a bird’s eye view.

**Technology Used** – Unity 3D and scripting in C#

---

## Steam Willy

**Project Duration:** 3 months

**Project Description:** Steam Willy is an Endless Game with Opportunity to Score Maximum and Beat the other Users with Game Centre. It is a Simple Game to Play based on Touch Functionality as Character is Going Right with some Force which will be increasing with time.
