TECHNO LABS PVT. LTD.

We architect and build IT solutions

About us

Founded in 2007, Cubet Techno Labs is an end-to-end SMAC (social, mobile, analytics and cloud) mobile design and development company with office at Kochi, India and London, UK. With expertise in insightful product strategy, well-crafted design and proficient development for high-end web and mobile application technologies.

Our team works collectively to ensure that the passion behind our work resonates in every project we take on. As craftsmen, we take pride in our work, striving to produce solutions that are original and reliable

Understanding our client's business and requirements remain our primary focus and always to compliment the same, our team keeps abreast with the latest trends in information technology. Our inbuilt strategic custom development methodology helps us to deliver integrated rich internet applications. Finally, we provide holistic fulfilling experience to our clients combining our solid cross vertical experience and expertise.

Mobility Solutions

We've been at this game for a while, in fact since the very emergence of mobile apps in 2007.   As a result we have a unique mix of industry knowledge and cross platform skills covering iOS & Android platforms.

We are thought-leaders in wearable technologies and have seen how mobile app technology is transforming enterprise mobility and workforce efficiency across a broad range of platforms.

Cubet is not a one-size fits all type of organisation and we'll work flexibility to suit your business objectives.
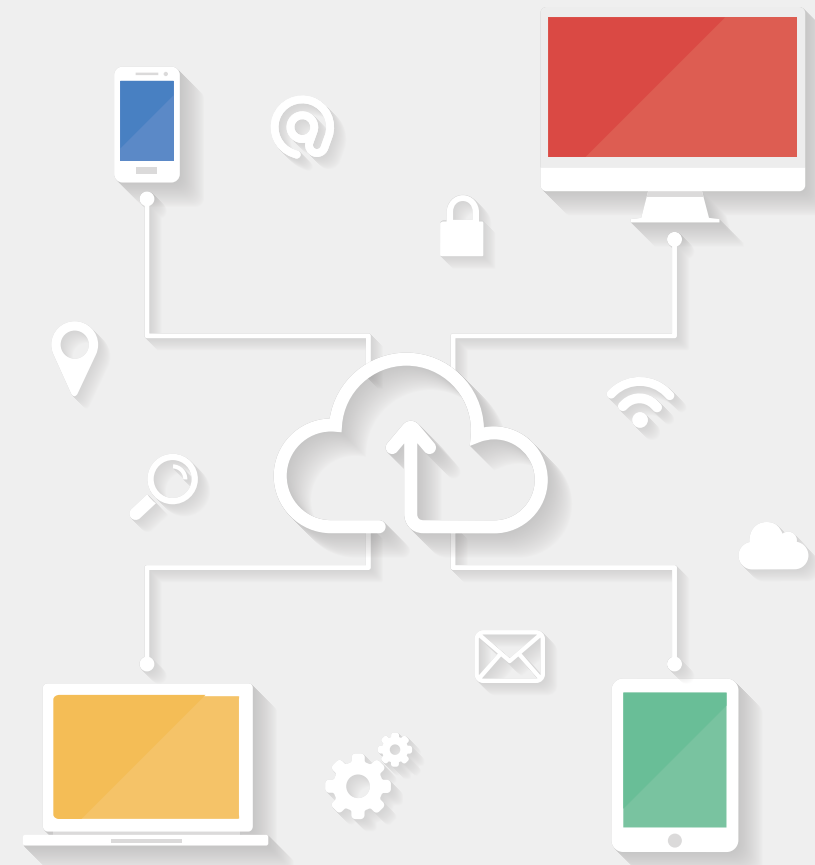

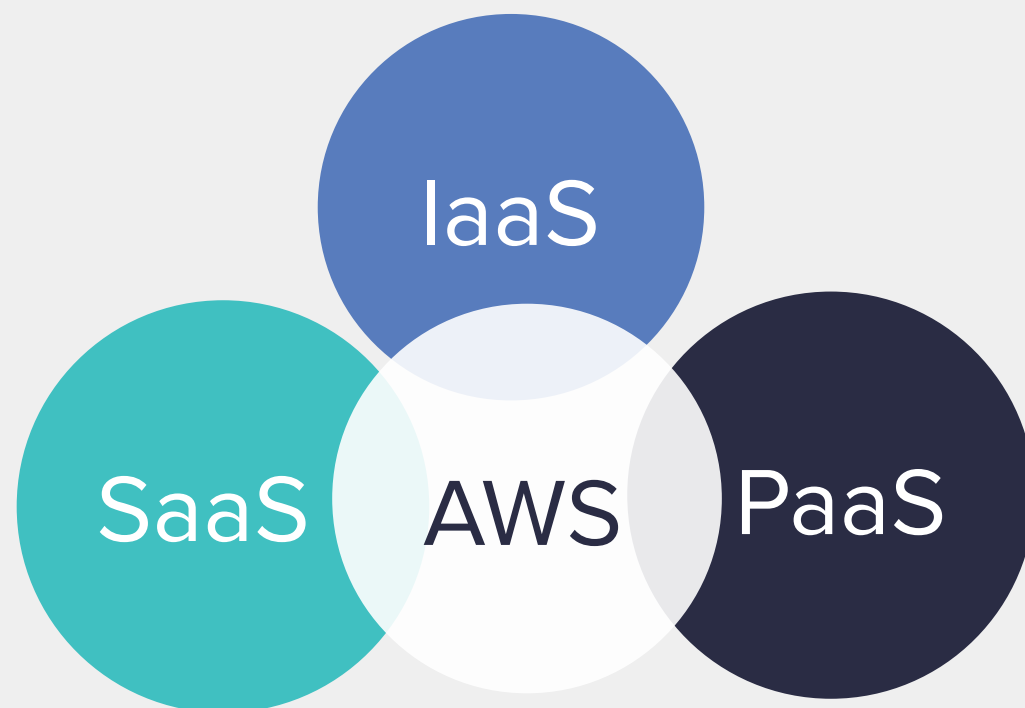

- Enterprise Mobility Applications
- Productivity Apps
- Healthcare & Fitness Apps
- Geolocation based App development
- Social Media & Creative Apps
- IoT Apps
- Wearable Tech Apps

UI/UX

As a customer experience consultancy, we can help you improve experiences with your products and services by understanding your customers. We do this by identifying issues with your user experience (UX) through research and testing. Our goal is to help you increase revenue, improve efficiency, enforce brand consistency—and provide a better customer experience.
