## About Zignuts Technolab

Zignuts Technolab is a young creative team that brings ideas to life. We create Mobile and Web experiences that inspire. Weather you are looking for technical partner who can provide full-stack solution for your enterprise or startup or we can just round out your team in a particular area. Either way, it can save maximum of your budget and allow to let you focus on your core business.

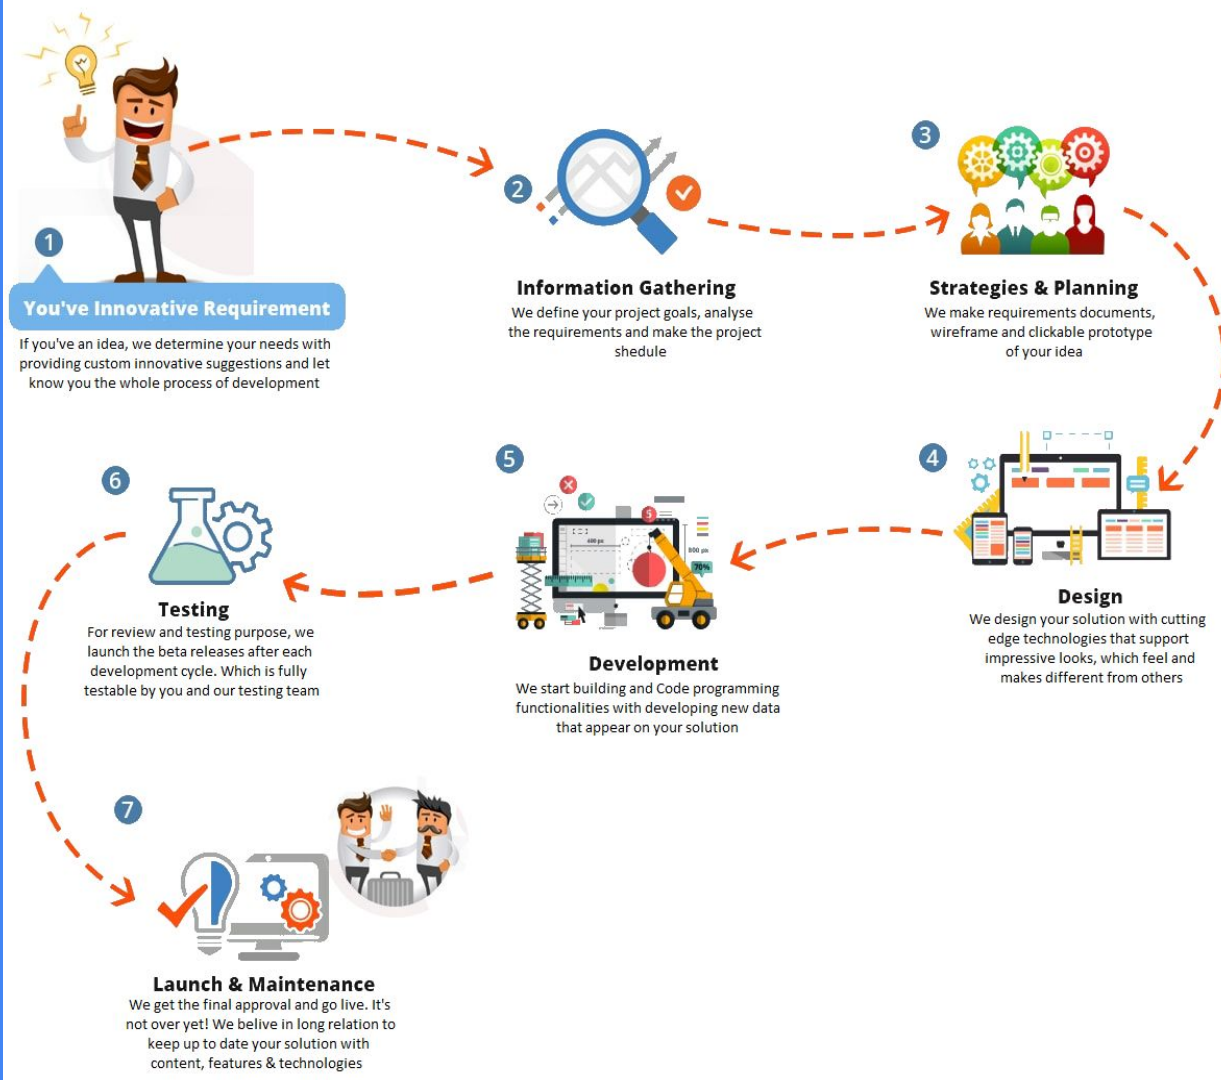

The founders of the company are software industry veterans with extensive experience, including management of multiple teams of varying sizes and successfully implementing large-scale IT projects and deployments. This experience has provided tremendous exposure to Software Architecture and Development, Advanced Strategy, Exploration of Corporate Development Channels, Business Analysis, Data Analytics, Code Reviews, and Product Development, along with proven skills in managing projects with distributed teams across the globe. Our team is proficient in analyzing and translating business requirements into technical requirements and architecture based on extensive experience in strategy, design, development, consulting, managing clients relations, proven technology stack and superior project management skills.

Our team has **skills and proven experience working with modern technologies** such as, **Java, Android, iOS, JavaScript, HTML5/CSS3, PHP, AngularJS, NodeJS, ReactJS, Wordpress and Hybrid (Cross platform) apps.**

# Digital Strategy Meets Creative Technology

If you have a great idea and looking for technical partner who can provide full-stack solution for your business idea or we can just round out your existing team in a particular area, than our Team Germany will help you ideate, plan strategy, advance architecture and design your ideas while keeping startup constraints such as Quality and Timeline in mind.

Once project strategy, advance architecture and design are ready our Team India will help building cutting edge technological solution (Mobile & Web) while keeping startup constraints such as Cost and Rapid development in mind. Technology Team in India is an extension to our Strategy Team, which brings client's idea to life by their technical injection.

## Our Case Studies

# BizimTV - IPTV & Video On Demand

The BizimTV is an IPTV & Video On Demand Solution for android based TV. It allows you to track your favorite stations, movies and series at any time from anywhere. What you need to do is certainly no laptop, no satellite dish and no nerve-racking installations. You just need an internet connection and an Smart TV.

This was a project providing complete IPTV & Video on Demand solution with hardware integration as a part. Our client wanted to build an Android based application which could run in their set-top box, also we have to provide a Web based CMS solution which enables client to manage different user accounts and subscriptions efficiently.

The project was conceptualized, designed & developed in our technolab from scratch. The product was implemented on Android based IPTV App and extended over to the web platform as well in the form of Web based CMS system. We have also build Restful API interface to communicate between application, cms and stream providers. Also we needed to integrate payment gateways to enable users from Germany to buy subscriptions using credit card, direct bank and paypal. One of the challenging part of this project was to integrate IPTV application with Set-top box (Hardware) in a way that users get high quality user experience while running on Smart TV.

# Couponicus - Easy Coupons

Couponicus makes coupon marketing as easy as never before, Determine specifying the nature of the coupon and the discount itself or fallback to a coupon our proposals. Our templates are industry-specific and performance-tested in practice.

Couponicus distribute coupons on user's website, social media Autritten and email. They need to set the various distribution channels once and then use it for all their coupons this. On their site, the coupons are integrated by means of a Widgets. This method is used for example also in the integration of YouTube videos or visitor counters. This requires the widget code to be copied only once in the HTML code of your website. If this is too complicated, we can send instructions to user's web pages maintainer for this integration will be no problem. As soon as the Java widget is integrated once any amendments thereto automatically adopted.

# Daily Studios - Share Your Movements

The Daily Studios App lets you share photos of your special moments with loved ones. All the beautiful moments and scenes you capture with your camera can find a useful home in the Daily Studios App. With this App, you can conveniently store, share, buy or sell those marvelous shots.

The project includes full-stack development service as concept, design and development by Zignuts Technolab. The project is implemented on mobile platform - iPhone & Android apps and extended over to the web platform as well in the form of CMS (Admin) for client, from where he could manage different studios (and a studio their users). We also provided solution for REST Api and integration of payment gateway to the applications.

# Join Our Happy Clients Around The World

“

*“In being mutual partners with Zignuts Technolab, our company now has time to concentrate on the important things and not worry who will develop portions of the internet-based ideas - BizimTV that we dream up everyday. It is hard finding a team that has the knowledge and experience to meet the needs of a project, but Zignuts has delivered the results on time. I highly recommend doing business with Zignuts Technolab, as you will be very happy with the results that they produce. They not only provides excellent service but they think outside of the box, which is a great characteristic in a company.”*

**Naim Mirzada**

Founder & CEO Of Deligo UG, Germany

“

*“We here at Couponicus are very happy with the quality of work delivered by the Zignuts Technolab team. At first we were skeptical to outsource a technical sophisticated development to India, but our skepticism was proven wrong by Gunjan and his great team. The quality of work, the reasonable pricing as well as the flexible and fair responding to additional requests during the project convinced us to continue to work with Zignuts Technolab. I can absolutely recommend anyone to work with Zignuts Technolab, you won't be disappointed.”*

**Thomas C. A. Müller**

Founder & CEO Of Couponicus, Germany

# Join Our Happy Clients Around The World

*"I've worked with our friend at Zignuts Technolab on multiple projects. They have approached each project with an impressive combination of professionalism, creativity and knowledge. Overall, they proved themselves to be more than capable of handling complex development projects."*

**Shubham Bansal**

Founder of OTM System, India

*"Zignuts Technolab is an incredibly professional, dedicated, helpful firm. They are our outsourcing and solution partner in Mobile and Web Applications development. They have very impressive team of professionals. Knowledgeable project manager and professional staff guided me through each phase of projects evolution and always kept my objectives in mind. We continue our long term business relationship with Zignuts Technolab."*
